

Oracle Autonomous Database Cloud 2025

Professional latest test questions & 1Z0-931-25 reliable braindumps & Oracle Autonomous Database Cloud 2025

Professional free practice dumps

Explore Oracle Autonomous Database Cloud 2022 Certified Professional Practice Course

Please Get the Link of the Exam to proceed further - <https://www.educationry.com/?product=pass-oracle-autonomous-database-cloud-2022-certified-professional-certification-exam-educationry>

You will get a set of the latest exam questions and answers in the exam dumps. If you want to understand all the topics of the exam, then using the exam test dumps is the best choice. You will actually question of the exam according to the latest syllabus in the exam dumps that are prepared by the experts. The actual questions and answers are also given along with them for your better understanding. The subject matter experts have verified these exam real questions and answers, so you can use them without being worried.

If you want to know more about the exam dumps of the exam, then check out the exam questions dumps demo. We want you to be fully satisfied before purchasing the exam dumps. To make the right decision about purchasing the exam question dumps and saving your time and effort, make sure to check the demo before buying the exam dumps.

We know that you need to check the updates for your exam regularly during the preparation. This always keeps its exam dumps updated to save valuable time from outdated exam dumps. You will receive the most recent exam dumps at the time of payment and if the updates are introduced after the purchase, then you will also get them right away.

We promise you that you will nail your exam in just one attempt. You just have to use the exam dumps for two weeks to memorize the real questions and answers, and you will be ready to take your exam. In the event, you have the will to pass the exam dumps, then the very first of all you need to start off your preparations with the practice exam. It is actually a widespread fact that you will answer questions if your ideas will likely be cleared.

So that you can clear your exam, you need to look for the newest this exam dumps pdf questions which will not just assist you in passing the exam but in addition, tends to make you capable to master the exam. This can be an extraordinary chance to get tremendous marks in your exam and process your know-how within no time at all. You can very easily prepare with the updated exam dumps without the need of any anxiousness and get outstanding good results with the extraordinary pdf dumps and get 100% good results. This is a respectable chance to effectively float using your exam dump, start preparation with Exam dumps pdf, and endorse your preparation.

Whereas the Oracle 1Z0-931-25 web-based version of our practice test is compatible with iOS, Android, Windows, Linux, and Mac. Additionally, you can take the Oracle 1Z0-931-25 web-based practice test online using Chrome, Firefox, Safari, MS Edge, Internet Explorer or any other popular browser.

Oracle 1Z0-931-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Developing on Autonomous Database: This section of the exam measures the skills of Application Developers and focuses on developing and extending applications using Autonomous Database. It covers using generative AI for natural language queries, Autonomous JSON Database, Oracle Text for document search, location-based analysis with Autonomous Spatial, Autonomous Graph for data relationships, and integration with Object Storage, enabling developers to build intelligent, scalable applications.

Topic 2	<ul style="list-style-type: none"> Autonomous Database Shared: This section of the exam measures the skills of Cloud Engineers and focuses on creating and managing shared Autonomous Database instances. It includes provisioning, scaling, and starting or stopping instances, as well as database consolidation with Elastic Resource Pools. It also covers user management, cloning, database migration, monitoring, backup and restore processes, and introduces Data Guard for high availability, ensuring cloud engineers can maintain optimal database performance.
Topic 3	<ul style="list-style-type: none"> Autonomous Database Tools: This section of the exam measures the skills of Data Analysts and covers the tools available within Autonomous Databases for advanced data processing and analytics. It includes Oracle Machine Learning, APEX, and SQL Developer Web for database development, as well as data transformation, business model creation, data insights, and data analysis, allowing analysts to extract valuable insights from large datasets.
Topic 4	<ul style="list-style-type: none"> Autonomous Database Dedicated: This section of the exam measures the skills of IT Architects and explores the workflows and functionality of Autonomous Database Dedicated and Autonomous Database Cloud@Customer. It includes provisioning dedicated resources, setting up OCI policies, monitoring infrastructure, scheduling maintenance tasks such as patching, and managing encryption keys for enhanced security. IT Architects will learn how to integrate dedicated database environments within their cloud strategy.

1Z0-931-25 Practice Braindumps, 1Z0-931-25 Mock Test

All contents are being explicit to make you have explicit understanding of this exam. Some people slide over ticklish question habitually, but the experts help you get clear about them and no more hiding anymore. Their contribution is praised for their purview is unlimited. None cryptic contents in 1Z0-931-25 practice materials you may encounter.

Oracle Autonomous Database Cloud 2025 Professional Sample Questions (Q30-Q35):

NEW QUESTION # 30

To whom, and in which order, are dedicated Exadata Infrastructure resources provisioned?

- A. Fleet Administrator, Autonomous Exadata Infrastructure -> Database Administrator -> Autonomous Container DB -> Autonomous DB
- B. Fleet Administrator, Autonomous Exadata Infrastructure -> Autonomous Container DB -> Database Administrator -> Autonomous DB**
- C. Database Administrator, Autonomous Exadata Infrastructure -> Fleet Administrator -> Autonomous Container DB -> Autonomous DB
- D. Database Administrator, Autonomous Container DB -> Autonomous DB -> Fleet Administrator -> Autonomous Exadata Infrastructure

Answer: B

Explanation:

Provisioning dedicated Exadata Infrastructure resources for Autonomous Database follows a specific hierarchical order:

Fleet Administrator, Autonomous Exadata Infrastructure -> Autonomous Container DB -> Database Administrator -> Autonomous DB (A):

Fleet Administrator provisions Autonomous Exadata Infrastructure: The Fleet Administrator, responsible for infrastructure management, first sets up the Autonomous Exadata Infrastructure (AEI), which includes the physical Exadata hardware and networking configuration.

Fleet Administrator provisions Autonomous Container DB (ACD): Within the AEI, the Fleet Administrator creates the ACD, a container that hosts multiple Autonomous Databases.

Database Administrator provisions Autonomous DB: Finally, the Database Administrator (DBA) provisions individual Autonomous Databases within the ACD, configuring them for specific workloads (e.g., ATP or ADW).

The incorrect options are:

B: The Database Administrator cannot provision the ACD before the AEI is set up by the Fleet Administrator.

C and D: The Database Administrator does not provision the AEI or ACD; these are infrastructure-level tasks handled by the Fleet Administrator.

This order ensures proper separation of infrastructure and database management responsibilities.

NEW QUESTION # 31

Which two license types does the customer need to benefit from BYOL when leveraging on-premise Enterprise Database licenses in Oracle Autonomous Database?

- A. Exadata
- B. Active Data Guard
- C. Transparent Data Encryption (TDE)
- D. Real Application Clusters (RAC), but only when scaling beyond 16 OCPUs
- E. Multitenant

Answer: D,E

Explanation:

Full Detailed In-Depth Explanation:

Bring Your Own License (BYOL) allows using existing on-premises Oracle licenses in the cloud:

A: False. Exadata is included in Autonomous Database; no separate license is needed.

B: False. Active Data Guard is an optional feature, not required for BYOL.

C: True. RAC is needed for BYOL when scaling beyond 16 OCPUs, as Autonomous Database uses RAC for high availability in larger deployments.

D: True. Multitenant is mandatory, as Autonomous Database uses a multitenant architecture (CDB/PDB).

E: False. TDE is included by default, not a BYOL requirement.

NEW QUESTION # 32

Which of the following is not required for connecting to Autonomous Database (ADB) via SQL Developer?

- A. Connection Name
- B. Database name
- C. Password
- D. Service
- E. Username

Answer: A

Explanation:

Connecting to Autonomous Database (ADB) via SQL Developer requires specific parameters. The correct answer is:

Connection Name (E): The Connection Name is a user-defined label in SQL Developer to identify the connection in the tool's interface. It is not a technical requirement for establishing the database connection itself, making it optional in terms of connectivity.

The required parameters are:

Password (A): Essential for user authentication alongside the username.

Service (B): Refers to the service name (e.g., high, medium, low) from the wallet's tnsnames.ora, specifying the performance level and connection type.

Username (C): Required to identify the database user.

Database name (D): Needed to specify the target database or PDB within the ADB instance, typically provided via the wallet configuration.

Without A, B, C, and D, the connection cannot be established, but E is merely a convenience.

NEW QUESTION # 33

Which statement is FALSE about Data Insights?

- A. Data Insights are automatically generated by various analytic functions built into the database
- B. The results of the Insight analysis appear as a series of bar charts in the Data Insights dashboard
- C. Data Insights provides a wide range of graphical data presentation capabilities

- D. Data Insights display information about patterns and anomalies in the data of entities in your Oracle Autonomous Database

Answer: A

Explanation:

Data Insights is a feature in Autonomous Database that helps users understand their data. The false statement is:

Data Insights are automatically generated by various analytic functions built into the database (C): This is incorrect. Data Insights are not solely the result of automatic execution of built-in analytic functions (e.g., AVG, SUM, or RANK). Instead, they are generated through a combination of user-initiated analysis and Oracle's machine learning-driven capabilities within the Data Insights dashboard (part of Database Actions or OCI console). Users select datasets or tables, and the system applies algorithms to identify patterns (e.g., trends in sales) or anomalies (e.g., outlier transactions), but this process isn't just a passive outcome of pre-existing database functions-it's an active, curated feature requiring configuration. For example, a user might explore a SALES table, and Data Insights highlights a spike in Q4 sales, but this requires user input to define scope, not just automatic function output.

The true statements are:

Data Insights display information about patterns and anomalies in the data of entities in your Oracle Autonomous Database (A):

True. The feature visualizes trends (e.g., seasonal sales increases) and outliers (e.g., unexpected data drops) in tables or views, helping users spot significant data behaviors. For instance, it might show a bar chart of monthly revenue with an anomaly flagged for a sudden dip.

Data Insights provides a wide range of graphical data presentation capabilities (B): True. It offers visualizations like bar charts, line graphs, and scatter plots, customizable to represent data insights effectively. E.g., a line graph might track customer sign-ups over time, with options to adjust axes or filters.

The results of the Insight analysis appear as a series of bar charts in the Data Insights dashboard (D): True, partially. While bar charts are a common default (e.g., comparing sales by region), the dashboard supports multiple chart types, but the statement's focus on bar charts aligns with typical output for simple insights.

The misconception in C overlooks the interactive, ML-assisted nature of Data Insights, distinguishing it from passive function-based analytics.

NEW QUESTION # 34

What is the difference between Autonomous Data Warehouse (ADW) and Autonomous Transaction Processing (ATP) databases?

- **A. Only ADW uses columnar compression by default.**
- B. Only ATP supports automatic backups.
- C. Only ADW supports autoscaling
- D. Only ATP manages optimizer statistics.

Answer: A

Explanation:

ADW and ATP are tailored for different workloads:

Correct Answer (C): "Only ADW uses columnar compression by default" is true. ADW employs Hybrid Columnar Compression (HCC) for analytics, optimizing storage and query performance, while ATP uses row-based storage for transactional workloads (though HCC can be enabled manually).

Incorrect Options:

A: Both ADW and ATP manage optimizer statistics automatically.

B: Autoscaling is supported by both ADW and ATP.

D: Automatic backups are standard for both.

This reflects their design focus: ADW for analytics, ATP for transactions.

NEW QUESTION # 35

.....

If you want to inspect the quality of our 1Z0-931-25 Study Dumps, you can download our free dumps from Dumps4PDF and go through them. The unique questions and answers will definitely impress you with the information packed in them and it will help you to take a decision in their favor. The high quality and high pass rate has become a reason for thousand of candidates to choose.
