AgilePM-Foundation Practice Test Fee, AgilePM-Foundation Exam Questions And Answers

As the saying goes, an inch of gold is an inch of time. The more efficient the study guide is, the more our candidates will love and benefit from it. It is no exaggeration to say that you can successfully pass your AgilePM-Foundation exams with the help our AgilePM-Foundation learning torrent just for 20 to 30 hours even by your first attempt. And to cater to our customers' different study interests and hobbies, we have multiple choices on the AgilePM-Foundation Exam Materials versions for you to choose: the PDF, the Software and the APP online.

APMG-International Agile Project Management (AgilePM) Foundation Exam Sample Questions (Q24-Q29):

NEW QUESTION # 24

Which of the following statements about diverse teams are true?

- * Quicker to make decisions than teams of 'similar.'
- * Members understand each other immediately.

- A. Both 1 and 2 are true.
- B. Only 2 is true.
- C. Only 1 is true.
- **D. Neither 1 nor 2 is true.**

Answer: D

Explanation:

* Statement 1: Incorrect. Diverse teams tend to take longer to make decisions due to differing perspectives and approaches.

However, this trade-off leads to more thorough and creative decision-making, which is a recognized strength of diverse teams.

* Statement 2: Incorrect. Members of diverse teams often require time to align on communication styles, goals, and processes. Effective collaboration in diverse teams is developed through trust-building and active engagement, as outlined in Agile team practices.

Why Diverse Teams Matter in Agile: Agile emphasizes collaboration and innovation, which are enhanced by diverse teams.

However, the process of building trust and understanding takes time. AgilePM recommends fostering inclusivity and addressing conflicts constructively to harness the strengths of diverse teams.

Key AgilePM Concepts Referenced:

* Building Effective Teams: AgilePM Handbook, Chapter 5, Section 5.3.

* Trust and Transparency in Teams: Chapter 4, Section 4.6.

NEW QUESTION # 25

During what phase should a baseline of the Evolving Solution be put into operational use?

- A. Foundations
- B. Post-Project
- **C. Deployment**
- D. Evolutionary Development

Answer: C

NEW QUESTION # 26

Which of the following describes the role of the Product Owner in an Agile context?

- A. Responsible for monitoring progress against the baselined Delivery Plan
- **B. Accountable for maximizing the value of the product or service developed by the Delivery Team**
- C. Accountable for the Scrum Teams' effectiveness, improving their practices within the Scrum framework
- D. Responsible for approving the solution as technically fit for purpose prior to deployment

Answer: B

Explanation:

The Product Owner is value steward and single ordering voice for the product backlog. Their accountability is to maximize value from the team's work by clarifying outcomes, ordering backlog items, and ensuring transparency of goals, acceptance criteria, and readiness. They continuously engage customers and stakeholders, translate learning into backlog adjustments, and make scope trade-offs that protect time, cost, and quality. The Product Owner does not approve technical fitness (that sits with technical leadership and agreed quality criteria) nor manage a baselined delivery plan in a command-and-control sense; plans are living forecasts shaped by empirical evidence. Team effectiveness coaching belongs to the Scrum Master. By holding outcome accountability while collaborating closely with delivery and business roles, the Product Owner ensures increments align to strategy, benefits, and the evolving Business Case—precisely what option B states.

NEW QUESTION # 27

In the context of AgilePM, what two types of Increment are associated with what is delivered?

- **A. Solution and Product**
- B. Timebound and Freeform
- C. Team and Individual
- D. Product and Process

Answer: A

Explanation:

AgilePM distinguishes between increments in terms of what is actually delivered to stakeholders. The emphasis is on a Solution—the integrated outcome that delivers business value—not merely isolated technical outputs. As delivery progresses, teams create Solution Increments that accumulate into a releasable Product (the broader, user-facing capability). This distinction helps align day-to-day development with business outcomes: every increment should be a cohesive slice of the evolving solution that is demonstrably usable or verifiable, while the Product view ensures that increments collectively support release goals and benefits realization. AgilePM's focus on MoSCoW prioritization and timeboxing supports this by ensuring each Solution Increment contains the right mix of Must/Should/Could features to satisfy acceptance and maintain momentum. In practice, reviews showcase the Solution Increment's usability to business representatives, while release planning considers how these increments roll up into Product evolution. Therefore, the two types associated with what is delivered are best captured by Solution and Product, making option A the fit with AgilePM terminology and intent.

NEW QUESTION # 28

What DSDM product reflects the approach to the management of the project as a whole and considers, from a management perspective, how the project will be organized and planned?

- **A. Foundation Summary**
- B. Terms of Reference
- C. Delivery Plan
- D. Management Approach Definition

Answer: A

NEW QUESTION # 29
