AACE-PSP exam is designed to be comprehensive and challenging, and candidates are expected to demonstrate a high level of proficiency in the subject matter. Planning & Scheduling Professional (PSP) Exam certification is valid for five years and must be renewed by meeting certain continuing education requirements.

AACE International Planning & Scheduling Professional (PSP) Exam Sample Questions (Q176-Q181):

NEW QUESTION # 176

Activity durations are normally estimated in an intuitive and subjective way. All of the following will improve duration accuracy EXCEPT

- A. Use the people responsible for performing the work as a resource to assign activity durations.
- B. Divide activities into smaller activities. This will increase activity detail and duration estimate accuracy.
- C. Use gross building square footages. The pluses and minuses all average out.
- D. Look at each activity independently and don't follow specific logic paths when assigning activity durations.

Answer: A

Explanation:

* Activity Duration Estimation Techniques:

Accurate estimation methods include detailed breakdowns, using experienced personnel, and analyzing specific factors for individual activities.

Relying on gross estimates or averages (as in A) introduces significant inaccuracies.

* PSP Study Guide Reference:

The PSP Study Guide emphasizes the importance of detailed and specific input to improve estimation accuracy.

* Analysis for Selection:

Option A: Incorrect method, as averages do not provide accurate results for individual activities.

Option B: Misguided suggestion; focusing independently on activities without logic paths introduces potential errors.

Option C: Correct. Dividing activities enhances detail and estimation precision.

Option D: Correct. Involving the executors ensures realistic and experienced-based durations.

* Conclusion: The correct answer is A, as using gross estimates is not an effective method for improving accuracy.

NEW QUESTION # 177

Which of the following is NOT input data to the construction planning process?

- A. Input from the owner
- B. Input from the contractor
- C. Bonding capacity of subcontractors
- D. The contract

Answer: C

Explanation:

* Input Data for Construction Planning:

Construction planning relies on data from the owner, contractor, and contract terms to establish project parameters.

Bonding capacity is not typically part of the planning inputs but rather a procurement and contractual concern.

* PSP Study Guide Reference:

Key inputs include project requirements, constraints, and stakeholder inputs as outlined in the PSP guide.

* Conclusion: The correct answer is C, as bonding capacity is not a direct input to the construction planning process.

NEW QUESTION # 178

Determine the correct formula and date for the late finish for Activity 9004.

- A. LF of 10002 less 24 days
- B. LS of 9004 plus 72 days
- C. LF of 8001 plus 72 days
- D. LS of 10002 less lag of 7 days plus 1 day equaling 20 Nov 2023

Answer: A

NEW QUESTION # 179

The Cost Estimate is NOT developed to:

- A. predict uncertain future costs
- B. providing the basis for budgets
- C. determine the project performance goals
- D. quantify cost, and price the resources required by the Scope of Work

Answer: C

NEW QUESTION # 180

What is a key first step in developing a critical path method schedule?

- A. Defining the execution plan to meet the required scope of work.
- B. Setting out the resource to be used and its limitations.
- C. Drawing a bar chart of the key phrases of the work.
- D. Drawing the logic diagram

Answer: D

NEW QUESTION # 181
