Salesforce Certified Advanced Administrator Sample Questions (Q45-Q50):

NEW QUESTION # 45

Universal Containers wants to track expense reports and expense line items. Values from expense line item records need to be aggregated and displayed on the expense record.

Which type of relationship should an administrator use to ensure that expense line items can be aggregated?

- A. Hierarchical
- B. Master-detail
- C. Lookup

- D. Roll-up summary

Answer: B

NEW QUESTION # 46

What needs to be done before converting lookup to Master detail relationship

- A. Make sure that all lookup fields have values
- B. Use Data Loader to convert all lookup to Master detail
- C. OWD of master must be public Read/Write
- D. First delete lookup field and create new Master Detail

Answer: A

NEW QUESTION # 47

Cloud Kicks uses a dashboard with multiple components based on Account, Case, and Opportunity reports.

The system administrator adds a dashboard filter on Account Owner. When filtering the dashboard by Account Owner, records are now missing from several Opportunity components.

What is the recommended way for the system administrator to resolve this issue?

- A. Create a joined Accounts and Opportunities report for the components.
- B. Add a cross-filter to the Opportunity source reports.
- C. On the Opportunity components, change the equivalent field.
- D. Use a custom report type for Accounts with or without Opportunities.

Answer: C

Explanation:

The equivalent field is the field that matches the dashboard filter field on the source report object. For example, if the dashboard filter is on Account Owner, then the equivalent field on the Opportunity object is Opportunity Owner. Changing the equivalent field ensures that the dashboard filter applies correctly to the Opportunity components. References:
