The Certified Agile Scrum Product Owner (CASPO-001) certification exam is a globally recognized credential that validates an individual's knowledge and expertise in Agile Scrum product ownership. CASPO-001 exam is administered by the Global Association for Quality Management (GAQM), which is a leading provider of professional certifications in the field of quality management and Agile practices. The CASPO certification is designed to help professionals who are responsible for managing product development and delivery to gain a deeper understanding of Agile Scrum principles, practices, and techniques.

The CASPO exam covers a broad range of topics related to Agile Scrum product ownership, including product backlog management, stakeholder engagement, product visioning, and user story creation. It also evaluates the candidate's ability to work with Scrum teams, manage product releases, and handle product-related risks and issues. CASPO-001 Exam is designed to assess both theoretical and practical knowledge, which makes it very practical for real-world applications.

GAQM Certified Agile Scrum Product Owner (CASPO) Sample Questions (Q75-Q80):

NEW QUESTION # 75

What best describes the relationship of the Product Owner and the stakeholders? (Choose the best answer)

- A. The Product Owner provides the stakeholders with acceptance forms at the Sprint Review to record their formal agreement over the delivered software.
- B. The Product Owner has the final call over the requirements and should involve the stakeholders as little as possible.
- C. The Product Owner writes the User Stories as provided by the stakeholders.
- **D. The Product Owner actively asks for stakeholder input and expectations to process into the Product Backlog.**

Answer: D

Explanation:

TheScrum Guidestates: "The Product Owner is also accountable for effective Product Backlog management, which includes... representing the needs of many stakeholders in the Product Backlog." Option C reflects this collaborative approach-actively seeking stakeholder input to shape the Product Backlog. Option A is too passive; the Product Owner interprets, not just transcribes. Option B contradicts Scrum's emphasis on stakeholder engagement. Option D introduces a formal process not in Scrum; the Sprint Review is for feedback, not signed agreements. Thus, C is best.

NEW QUESTION # 76

Who is responsible for maximizing the value of the product? (Choose the best answer)

- A. Scrum Master
- B. Senior Executives
- **C. Product Owner**
- D. Developers

Answer: C

Explanation:

The Product Owner has explicit accountability for product value. TheScrum Guidestates: "The Product Owner is accountable for maximizing the value of the product resulting from the work of the Scrum Team."

* A:The Scrum Master ensures Scrum effectiveness, not value.

* B:Correct-value maximization is their role.

NEW QUESTION # 77

Which statement best describes the Sprint Backlog as an outcome of the Sprint Planning? (Choose the best answer)

- **A. It is the Developers' plan for the Sprint.**
- B. It is ordered by the Product Owner.
- C. Each task is estimated in hours.
- D. It is a complete list of all work to be done in a Sprint.
- E. Every item has a designated owner.

Answer: A

Explanation:

The Scrum Guide defines the Sprint Backlog as "a plan by and for the Developers" that includes selected Product Backlog items and a plan to deliver the Sprint Goal. Option C accurately reflects this ownership and purpose. Option A is too absolute-while it's a plan, it's not necessarily "complete" as it can evolve during the Sprint. Option B is incorrect-Scrum does not mandate hour-based estimates; estimation is up to the Developers' discretion. Option D is false-items don't require individual owners; the Developers collectively own the Sprint Backlog. Option E is wrong-the Product Owner orders the Product Backlog, not the Sprint Backlog, which is managed by the Developers. Thus, C is the best description.

NEW QUESTION # 78

True or False: Management does not have a role within Scrum.

- A. False
- B. True

Answer: A

Explanation:

Management has a role in supporting Scrum, though not within the Scrum Team. The Scrum Guide notes: "Scrum Teams are cross-functional, meaning the members have all the skills necessary to create value each Sprint. They are also self-managing... Various practices exist to forecast progress, like burn-downs, burn-ups, or cumulative flows." Management provides resources, removes impediments, and sets organizational context, but doesn't manage the team directly.

* A: False-management supports externally.

NEW QUESTION # 79

How much work must the Developers do to a Product Backlog item it selects for a Sprint? (Choose the best answer)

- A. All development work and at least some testing.
- B. As much as it has told the Product Owner will be done for every Product Backlog item it selects in conformance with the Definition of "Done".
- C. As much as it can fit into the Sprint. Any remaining work will be transferred to a subsequent Sprint.
- D. A proportional amount of time on analysis, design, programming, testing, and documentation.

Answer: B

Explanation:

The Scrum Guide mandates that all work selected for a Sprint must meet the Definition of "Done": "The Increment is the sum of all the Product Backlog items completed during a Sprint and the value of the increments of all previous Sprints." During Sprint Planning, the Developers forecast what they can deliver as a "Done" Increment, committing to that scope. Option A reflects this accountability. Option B suggests incomplete work carries over, which violates the Increment's usability requirement. Option C is too vague and not tied to "Done." Option D imposes a process Scrum doesn't require. Thus, A is correct.
