

H11-861_V4.0 Reliable Test Prep & H11-861_V4.0 Associate Level Exam

P.S. Free & New H11-861_V4.0 dumps are available on Google Drive shared by Test4Sure: <https://drive.google.com/open?id=1fNngugaWrGEImFjX54PfnF46Gz6h4U6>

If you decide to beat the exam, you must try our H11-861_V4.0 exam torrent, then, you will find that it is so easy to pass the exam. You only need little time and energy to review and prepare for the exam if you use our HCIP-Collaboration V4.0 prep torrent as the studying materials. So it is worthy for them to buy our product. The HCIP-Collaboration V4.0 prep torrent that we provide is compiled elaborately and highly efficient. You only need 20-30 hours to practice our H11-861_V4.0 Exam Torrent and then you can attend the exam. Among the people who prepare for the exam, many are office workers or the students.

Huawei H11-861_V4.0 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Operations and Maintenance: This domain measures skills of Operations Engineers and Network Administrators in monitoring IIoT systems, troubleshooting network and device issues, and maintaining overall system health and performance.
Topic 2	<ul style="list-style-type: none">Cybersecurity and Risk Management: This section assesses the expertise of Security Engineers and Compliance Officers in securing IIoT environments by applying security frameworks, identity and access management, threat detection, and risk mitigation strategies.
Topic 3	<ul style="list-style-type: none">Integration and Application: This section targets Solution Developers and System Integrators involved in integrating IIoT systems with existing enterprise applications, cloud platforms, and analytics tools for data-driven decision making.
Topic 4	<ul style="list-style-type: none">Technical Concepts: This section measures skills of Industrial IoT Engineers and Network Engineers and covers fundamental technical principles relevant to Industrial Internet of Things (IIoT), including architectures, protocols, data management, and integration technologies.
Topic 5	<ul style="list-style-type: none">Implementation and Configuration: This domain targets IIoT Solution Architects and System Integrators, focusing on configuring IoT devices, network connectivity, communication protocols, and edge computing components used in IIoT deployments.

Updated Huawei H11-861_V4.0 Exam Questions for H11-861_V4.0 Exam Success

We often receive news feeds and what well-known entrepreneurs have done to young people. The achievements of these entrepreneurs are the goals we strive for and we must value their opinions. And you may don't know that they were also benefited from our H11-861_V4.0 study braindumps. We have engaged in this career for over ten years and helped numerous entrepreneurs achieved their H11-861_V4.0 certifications toward their success. Just buy our H11-861_V4.0 learning materials and you will become a big man as them

Huawei HCIP-Collaboration V4.0 Sample Questions (Q24-Q29):

NEW QUESTION # 24

Assume endpoints T1 and T2 are registered with the same SC node zone (signaling routing is enabled on the SC). After T1 calls the number of T2 using H.323, T1 communicates with T2. How many TCP connections are established in this process?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: A

Explanation:

With signaling routing enabled on the SC, both the H.225 call signaling and the H.245 control channel are each split into two TCP legs (T1→SC and SC→T2), resulting in $2 \times 2 = 4$ TCP connections.

NEW QUESTION # 25

At an SMC video conferencing system site, the customer wants to deploy a conferencing system with converged firewall ports, with a planned DMZ. The SC1 is deployed on the intranet and SC2 is deployed in the DMZ. In this case, which of the following deployment modes is the most suitable one for SC1 and SC2?

- A. SC1 and SC2 are both proxy SCs.
- B. SC1 is the registration SC, and SC2 is the proxy SC.
- C. SC1 and SC2 are both registration SCs.
- D. SC1 is the proxy SC, and SC2 is the registration SC.

Answer: B

Explanation:

Deploying SC1 as the registration SC on the intranet allows internal endpoints to register directly, while placing SC2 as a proxy SC in the DMZ handles external signaling traversal and secures the demilitarized zone.

NEW QUESTION # 26

Assume endpoints T1 and T2 are registered with the same SC node zone. After T1 calls the number of T2 using H.323, T1 and T2 communicate with each other. Which of the following statements are true about the call process? (Choose all that apply.)

- A. In this process, the H.225 RAS signaling interaction between T1 and T2 must pass through the SC.
- B. In this process, the H.225 call signaling interaction between T1 and T2 must pass through the SC.
- C. 225 RAS messages (registration, admission, status) always traverse the SC (gatekeeper) for endpoints in the same zone.
- D. In this process, the media stream must be directly transmitted between T1 and T2.
- E. Endpoint control signaling involved in this process mainly includes H.225 RAS, H.225 Call Signaling, and H.245.

Answer: A,D,E

Explanation:

RTP media is exchanged directly between T1 and T2 once the call is established.

The call control sequence involves H.225 RAS (registration/admission), H.225 call signaling (SETUP/CONNECT), and H.245 control for capabilities.

NEW QUESTION # 27

The new and old MCU architectures differ in bandwidth and codec resource usage during cascading. The new architecture supports multiple working modes, such as MCU, SFU, and IAU. The old architecture does not provide different working modes of the MCU. Which of the following statements is false about MCU cascading?

- A. When the MCU of the old architecture is cascaded with the MCU of the new architecture, the proxy channel consumes bandwidth and codec resources.
- **B. When the MCU of the old architecture is cascaded with the MCU of the new architecture, the cascading channel consumes bandwidth and codec resources.**
- C. When MCUs of the new architecture are cascaded, both the cascading channel and proxy channel consume bandwidth and codec resources.
- D. When MCUs of the old architecture are cascaded, the cascading channel consumes bandwidth and codec resources.

Answer: B

Explanation:

When cascading an old-architecture MCU with a new-architecture MCU, only the proxy channel on the new side consumes bandwidth and codec resources - the legacy MCU's cascading channel is not used.

NEW QUESTION # 28

During a point-to-point call between different GKs, the local GK sends an LRQ request to the neighboring GK to query the information about the called node.

- **A. TRUE**
- B. FALSE

Answer: A

Explanation:

In H.323, when a gatekeeper needs to locate an endpoint outside its zone, it issues a LocationRequest (LRQ) to the neighboring gatekeeper to retrieve the called party's address.

NEW QUESTION # 29

.....

With the development of economic globalization, your competitors have expanded to a global scale. Obtaining an international H11-861_V4.0 certification should be your basic configuration. What I want to tell you is that for H11-861_V4.0 Preparation materials, this is a very simple matter. And as we can claim that as long as you study with our H11-861_V4.0 learning guide for 20 to 30 hours, then you will pass the exam as easy as pie.
