

2026 DA0-002 Practice Questions: CompTIA Data+ Exam (2025) - High Pass-Rate CompTIA Exam Dumps DA0-002 Demo

P.S. Free & New DA0-002 dumps are available on Google Drive shared by Prep4SureReview: <https://drive.google.com/open?id=1AImO8yCLFFhUgWphAOdoz9Kz9YNNxUK>

As we know, information disclosure is illegal and annoying. Of course, we will strictly protect your information. That's our society rule that everybody should obey. So if you are looking for a trusting partner with right DA0-002 guide torrent you just need, please choose us. I believe you will feel wonderful when you contact us. We have different DA0-002 prep guide buyers from all over the world, so we pay more attention to the customer privacy. Because we are in the same boat in the market, our benefit is linked together. If your privacy let out from us, we believe you won't believe us at all. That's uneconomical for us. In the website security, we are doing well not only in the purchase environment but also the DA0-002 Exam Torrent customers' privacy protection. We are seeking the long development for DA0-002 prep guide.

Our DA0-002 exam material is full of useful knowledge, which can strengthen your capacity for work. As we all know, it is important to work efficiently. So once you have done your work excellently, you will soon get promotion. You need to be responsible for your career development. The assistance of our DA0-002 guide question dumps are beyond your imagination. You will regret if you throw away the good products. One of the significant advantages of our DA0-002 Exam Material is that you can spend less time to pass the exam. People are engaged in modern society. So our goal is to achieve the best learning effect in the shortest time.

Top-Selling DA0-002 Realistic Practice Exams

Who don't want to be more successful and lead a better life? But it's not easy to become better. Our DA0-002 exam questions can give you some help. After using our DA0-002 study materials, you can pass the exam faster and you can also prove your strength. Of course, our DA0-002 Practice Braindumps can bring you more than that. You can free download the demos to take a look at the advantages of our DA0-002 training guide.

CompTIA Data+ Exam (2025) Sample Questions (Q16-Q21):

NEW QUESTION # 16

A data professional wants to identify all customers who made a purchase in January. Given the following table:

CustomerID

Month

Sales

0001

January

13000

0002

March

10000

0003

April

23000

0004

May

10000

Which of the following types of functions should the professional use to flag the customers?

- A. Statistical
- B. Date
- **C. Logical**
- D. Mathematical

Answer: C

Explanation:

This question falls under the Data Analysis domain, focusing on selecting the appropriate function type to filter data in a query. The task is to flag customers who made a purchase in January, which involves a conditional check.

* Statistical (Option A): Statistical functions (e.g., AVG, STDEV) analyze data distributions, not suitable for flagging specific months.

* Logical (Option B): Logical functions (e.g., WHERE Month = 'January' in SQL) are used to apply conditions and flag rows based on criteria, which fits the task.

* Mathematical (Option C): Mathematical functions (e.g., SUM, ROUND) perform calculations, not conditional flagging.

* Date (Option D): Date functions (e.g., MONTH()) manipulate dates, but the Month column is already in text format, so a logical comparison is sufficient.

The DA0-002 Data Analysis domain includes "applying the appropriate descriptive statistical methods using SQL queries," and logical functions are best for conditional flagging.

Reference: CompTIA Data+ DA0-002 Draft Exam Objectives, Domain 3.0 Data Analysis.

NEW QUESTION # 17

Given the following tables:

Individual table

ID

FirstName

LastName

1

John

Doe
Output
ID
FullName
1
JohnDoe

Which of the following is the best option to display output from FirstName and LastName as FullName?

- A. Join
- B. Filter
- C. Group
- **D. Concatenate**

Answer: D

Explanation:

This question falls under the Data Acquisition and Preparation domain of CompTIA Data+ DA0-002, focusing on data manipulation techniques. The task is to combine FirstName and LastName into a single FullName field (e.g., "JohnDoe").

* Concatenate (Option A): Concatenation combines two or more strings into one (e.g., using CONCAT in SQL or "+" in Python), which is the correct method to create FullName from FirstName and LastName.

* Filter (Option B): Filtering selects specific rows based on conditions, not suitable for combining fields.

* Join (Option C): Joining combines data from multiple tables, but the task involves manipulating data within a single table.

* Group (Option D): Grouping (e.g., GROUP BY in SQL) is for aggregation, not for combining fields into a new column.

The DA0-002 Data Acquisition and Preparation domain includes "executing data manipulation," and concatenation is the standard technique for combining fields like FirstName and LastName into FullName.

Reference: CompTIA Data+ DA0-002 Draft Exam Objectives, Domain 2.0 Data Acquisition and Preparation.

NEW QUESTION # 18

A data analyst needs to create a combined report that includes information from the following two tables:

Managers table

ID
First_name
Last_name
Job_title
1001
John
Doe
Manager
1002
Jane
Roe
Director

Non-managers table

ID
First_name
Last_name
Job_title
1003
Robert
Roe
Business Analyst
1004
Jane
Doe
Sales Representative
1005
John
Roe
Operations Analyst

Which of the following query methods should the analyst use for this task?

- A. Nested
- **B. Union**
- C. Join
- D. Group

Answer: B

Explanation:

This question pertains to the Data Acquisition and Preparation domain, focusing on combining data from two tables. Both tables have the same structure (ID, First_name, Last_name, Job_title) and contain employee data, suggesting the task is to create a single list of all employees.

* Group (Option A): Grouping (e.g., GROUP BY in SQL) is for aggregation (e.g., counting employees by job title), not combining tables into a single report.

* Join (Option B): Joining tables (e.g., INNER JOIN) requires a common key and combines tables horizontally, but there's no indication of a relationship between the tables (e.g., no shared key beyond ID, which isn't linked).

* Union (Option C): UNION combines the rows of two tables with the same structure into a single result set, removing duplicates, which is ideal for creating a combined report of all employees from both tables.

* Nested (Option D): Nested queries (e.g., subqueries) are used for complex filtering, not for combining tables into a single list.

The DA0-002 Data Acquisition and Preparation domain includes "executing data manipulation," and UNION is the best method for combining two tables with identical structures into a single report.

Reference: CompTIA Data+ DA0-002 Draft Exam Objectives, Domain 2.0 Data Acquisition and Preparation.

NEW QUESTION # 19

A data analyst is creating a report about cars sold within the last twelve months. The current data set only contains information from the last ten months. Which of the following is the most appropriate way to accomplish this task?

- A. Parse the records from the last two months of the previous year and append them to the data table.
- B. Join the records from the last two months of the previous year and append them to the data table.
- C. Merge the records from the last two months of the previous year and append them to the data table.
- **D. Extract the records from the last two months of the previous year and append them to the data table.**

Answer: D

NEW QUESTION # 20

A data analyst wants to understand several datasets at the variable level. Which of the following should the analyst consult to find this information?

- A. Data flow diagram
- B. Data lineage
- **C. Data dictionary**
- D. Data versioning

Answer: C

Explanation:

This question pertains to the Data Concepts and Environments domain, focusing on documentation for understanding datasets. The analyst needs variable-level details (e.g., field definitions), which points to a specific type of documentation.

* Data lineage (Option A): Data lineage tracks data flow and transformations, not variable definitions.

* Data dictionary (Option B): A data dictionary provides detailed information about variables (e.g., name, type, description), which is exactly what the analyst needs.

* Data flow diagram (Option C): A data flow diagram shows data movement, not variable-level details.

* Data versioning (Option D): Data versioning tracks changes to datasets, not variable definitions.

The DA0-002 Data Concepts and Environments domain includes understanding "data schemas and dimensions," and a data dictionary is the primary tool for variable-level information.

Reference: CompTIA Data+ DA0-002 Draft Exam Objectives, Domain 1.0 Data Concepts and Environments.

NEW QUESTION # 21

.....

It is acknowledged that there are numerous DA0-002 learning questions for candidates for the DA0-002 exam, however, it is impossible for you to summarize all of the key points in so many materials by yourself. But since you have clicked into this website for DA0-002 practice materials you need not to worry about that at all because our company is especially here for you to solve this problem. We have a lot of regular customers for a long-term cooperation now since they have understood how useful and effective our DA0-002 Actual Exam is.
