If you really want to clear exam and gain success one time, choosing us will be the wise thing for you. If you hesitate about us please pay attention on below about our satisfying service and high-quality Data-Architect guide torrent.

Salesforce Certified Data Architect Sample Questions (Q75-Q80):

NEW QUESTION # 75

Northern Trail Outfitters (NTO) plans to maintain contact preferences for customers and employees. NTO has implemented the following:

1. Customers are Person Accounts for their retail business.
2. Customers are represented as Contacts for their commercial business.
3. Employees are maintained as Users.
4. Prospects are maintained as Leads.

NTO needs to implement a standard communication preference management model for Person Accounts, Contacts, Users, and Leads.

Which option should the data architect recommend NTO to satisfy this requirement?

- A. Create a custom object to maintain preferences and build relationships to Lead, Person Account, and Users.
- B. Create case for contact preferences, and use this to validate the preferences for Lead, Person Accounts, and Users.

- C. Create custom fields for contact preferences in Lead, Person Account, and Users objects.
- D. Use Individual objects to maintain the preferences with relationships to Lead, Person Account, and Users.

Answer: D

NEW QUESTION # 76

Universal Containers (UC) has adopted Salesforce as its primary sales automated tool. UC has 100,000 customers with a growth rate of 10% a year, UC uses an on-premise web-based billing and invoice system that generates over 1 million invoices a year supporting a monthly billing cycle.

The UC sales team needs to be able to pull a customer record and view their account status, Invoice history, and opportunities without navigating outside of Salesforce.

What should a data architect use to provide the sales team with the required functionality?

- A. Create a visual force tab with the billing system encapsulated within an iframe.
- B. Write an Apex callout and populate a related list to display on the account record.
- C. Create a custom object and migrate the last 12 months of Invoice data into Salesforce so it can be displayed on the Account layout.
- D. Create a mashup page that will present the billing system records within Salesforce.

Answer: D

NEW QUESTION # 77

Universal Containers (UC) is concerned that data is being corrupted daily either through negligence or maliciousness. They want to implement a backup strategy to help recover any corrupted data or data mistakenly changed or even deleted. What should the data architect consider when designing a field -level audit and recovery plan?

- A. Implement an AppExchange package.
- B. Reduce data storage by purging old data.
- C. Review projected data storage needs.
- D. Schedule a weekly export file.

Answer: C

Explanation:

Option C is the best answer because reviewing projected data storage needs is an important step in designing a field-level audit and recovery plan. You need to estimate how much data storage you will need in the future and plan accordingly. Option A is not correct because reducing data storage by purging old data may not be sufficient or desirable for backup purposes. Option B is not correct because implementing an AppExchange package may not be customized or compatible with your org's requirements. Option D is not correct because scheduling a weekly export file may not be frequent or granular enough for field-level audit and recovery.

NEW QUESTION # 78

Northern Trail Outfitters Is planning to build a consent form to record customer authorization for marketing purposes.

What should a data architect recommend to fulfill this requirement?

- A. Create a custom object to maintain the authorization.
- B. Use AppExchange solution to address the requirement.
- C. Utilize the Authorization Form Consent object to capture the consent.
- D. Use custom fields to capture the authorization details.

Answer: C

Explanation:

The Authorization Form Consent object is a standard object that allows you to capture customer consent for marketing purposes. It has fields such as Consent Captured Date, Consent Captured Source, Consent Description, and Consent Status. You can use this object to create consent forms and track customer responses.

This is the best option to fulfill the requirement, as it does not require any custom development or external solution.

NEW QUESTION # 79

Universal Container (UC) has accumulated data over years and has never deleted data from its Salesforce org. UC is now exceeding the storage allocations in the org. UC is now looking for option to delete unused from the org.

Which three recommendations should a data architect make in order to reduce the number of records from the org?

Choose 3 answers

- A. Identify records in objects that have not been modified or used in last 3 years.
- B. Use Rest API to permanently delete records from the Salesforce org.
- C. Archive the records in enterprise data warehouse (EDW) before deleting from Salesforce.
- D. Use hard delete in Bulk API to permanently delete records from Salesforce.
- E. Use hard delete in batch Apex to permanently delete records from Salesforce.

Answer: A,C,D

Explanation:

Using hard delete in Bulk API, identifying records that have not been modified or used in last 3 years, and archiving the records in EDW before deleting from Salesforce are all good recommendations to reduce the number of records from the org. Using hard delete in batch Apex or Rest API may not be as efficient or scalable as Bulk API

NEW QUESTION # 80

.....

Having a general review of what you have learnt is quite necessary, since it will make you have a good command of the knowledge points. Data-Architect Online test engine is convenient and easy to learn, and it has the testing history and performance review. It supports all web browsers, and you can also have offline practice. Before buying Data-Architect Exam Dumps, you can try free demo first, so that you can have a deeper understanding of the exam. We have online and offline chat service for Data-Architect training materials. If you have any questions, you can contact us, and we will give you reply as quickly as we can.
