BONUS!!! Download part of VCE4Plus 1Z0-1055-25 dumps for free: [https://drive.google.com/open?id=1Gc53wbe3DFa-6QFO\\_C5xy4tm8V\\_Yrhwl](https://drive.google.com/open?id=1Gc53wbe3DFa-6QFO_C5xy4tm8V_Yrhwl)

The features of the 1Z0-1055-25 dumps are quite obvious that it is based on the exam pattern. As per exam objective, it is designed for the convenience of the candidates. This content makes them expert with the help of the 1Z0-1055-25 practice exam. They can get 1Z0-1055-25 exam questions in these dumps. Old ways of teaching are not effective for 1Z0-1055-25 Exam Preparation. In this way students become careless. In our top 1Z0-1055-25 dumps these ways are discouraged. Now make the achievement of 1Z0-1055-25 certification easy by using these 1Z0-1055-25 exam questions dumps because the success is in your hands now.

## Oracle 1Z0-1055-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Implementing Supplier Invoices: This section of the exam measures skills of Financial Systems Specialists and covers the setup and processing of supplier invoices. It focuses on understanding supplier invoice processing, AI-assisted automation, and key configurations such as invoice options, distribution sets, tolerances, holds, approvals, and release procedures. Candidates also learn how to manage business rules for invoice validation and processing efficiency.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Implementing Accounts Payable Balances: This section of the exam measures skills of Finance Operations Managers and covers Accounts Payable (AP) reporting, analysis, and period closing activities. It explains AP balance configurations, calendar management, and reconciliation with the General Ledger. Candidates must understand the setup of aging periods, payables calendars, and best practices for ensuring accurate financial close processes.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Implementing Payments: This section of the exam measures skills of Payments Configuration Specialists and focuses on the payment lifecycle in the Oracle Fusion Payables module. It includes understanding the supplier payment process, AI role in automation, and the configuration of payment options, methods, disbursement choices, and process profiles. The section also involves managing approval workflows and payment process templates for secure and accurate disbursement management.</li></ul>

Topic 4	<ul style="list-style-type: none"> <li>Implementing Expenses: This section of the exam measures skills of Expense Management Administrators and focuses on managing and configuring employee expense processes. It includes expense report processing, approval rules, and audit policies. Candidates must understand system configurations for templates, corporate card programs, conversion rate policies, travel integration, and AI-driven automation in expense management.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Setting up Common Configurations in the Supplier Invoice to Payments Process This section of the exam measures skills of Accounts Payable Analysts and focuses on understanding the core setup required for supplier invoicing and payment processes. It covers the Enterprise Structure, Financial Reporting Structure, and Data Security model. Candidates must know the purpose of Business Units and Reference Sets and be able to manage Supplier and Bank Account Master Data effectively.</li> </ul>

## 1Z0-1055-25 Online Bootcamps & 1Z0-1055-25 Exam Paper Pdf

VCE4Plus enjoys the reputation of a reliable study material provider to those professionals who are keen to meet the challenges of industry and work hard to secure their positions in it. If you are preparing for a 1Z0-1055-25 Certification test, the 1Z0-1055-25 exam dumps from VCE4Plus can prove immensely helpful for you in passing your desired 1Z0-1055-25 exam.

### Oracle Fusion Cloud Financials: Payables and Expenses 2025 Implementation Professional Sample Questions (Q49-Q54):

#### NEW QUESTION # 49

Your Company is considering using BI publisher to create additional reports. They want to know about the various features and benefits of this tool.

Which are two benefits of BI publisher customize feature?

- A. Report output is sent to an e-commerce site
- B. You do not need any special roles to access this feature
- C. A backup copy of the report is automatically saved in my folders
- D. Writing code is not required
- E. Patches do not override report customizations

**Answer: C,E**

#### NEW QUESTION # 50

Which three options are available to filter data when you submit the Prepare Payables to Ledger Reconciliation Report?

- A. Primary Ledger
- B. Supplier
- C. Natural Account
- D. Business Unit
- E. Accounting Period
- F. Balancing Segment Value

**Answer: D,E,F**

Explanation:

Comprehensive and Detailed In-Depth

The Prepare Payables to General Ledger Reconciliation process in Oracle Financials Cloud is essential for ensuring that your payables and general ledger data are aligned. When submitting this process, you have several parameters available to filter and select the specific data you need for reconciliation. The key parameters include:

Business Unit (Option A):

Purpose: Allows you to reconcile data for a specific business unit within your organization. This is particularly useful if your enterprise structure includes multiple business units and you need to focus on one at a time.

Reference:

Accounting Period (Option B):

Purpose: Enables you to select the accounting period (either open or closed) for which you want to prepare the reconciliation data. This ensures that the report focuses on the transactions relevant to the specified time frame.

Balancing Segment Value (Option C):

Purpose: Allows you to filter the data by specific balancing segment values, which correspond to entities like companies or divisions within your chart of accounts. This is useful for reconciling data at a more granular level.

While options D (Supplier), E (Primary Ledger), and F (Natural Account) are important attributes within the payables and general ledger modules, they are not listed as direct filter parameters for the Prepare Payables to General Ledger Reconciliation process. Therefore, the correct answers are A. Business Unit, B. Accounting Period, and C. Balancing Segment Value.

### NEW QUESTION # 51

Which reference data sharing method can you use for Payables Payment Terms when working with reference data sets in Payables?

- A. Assignment to multiple sets; no common values allowed
- B. Assignment to one set only; no common values allowed
- C. Assignment to multiple sets with common values allowed

**Answer: A**

Explanation:

Comprehensive and Detailed In-Depth

In Oracle Fusion Applications, reference data sharing (also known as SetID) enables organizations to share common configuration data across various organizational units, such as business units, without unnecessary duplication. This approach streamlines maintenance and ensures consistency of reference data across the enterprise.

Payment Terms in Oracle Payables define the conditions under which a company pays its suppliers. These terms can vary between business units based on factors like regional practices or supplier agreements. To accommodate this variability, Oracle Payables employs a specific reference data sharing method for Payment Terms.

Reference Data Sharing Methods:

Assignment to One Set Only; No Common Values Allowed:

Each reference data object instance is assigned to a single set exclusively.

No sharing of values across multiple sets.

Example: Asset Prorate Conventions are defined and assigned to only one reference data set.

Assignment to One Set Only, with Common Values:

Reference data objects can be assigned to one set, but there's a common set whose values are accessible to all business units.

Example: Receivables Transaction Types are assigned to a common set that's available to all business units.

Assignment to Multiple Sets; No Common Values Allowed:

A reference data object instance can be assigned to multiple sets.

There's no common set; each set operates independently.

Example: Payables Payment Terms use this method, allowing each payment term to be assigned to one or more sets.

For Payables Payment Terms, the applicable method is "Assignment to multiple sets; no common values allowed." This means that each payment term can be associated with one or more reference data sets, but there's no overarching common set that includes all payment terms. This flexibility allows organizations to define payment terms specific to certain business units while also sharing others across multiple units as needed.

Practical Application:

Shared Payment Terms: If multiple business units operate under similar payment conditions, a single payment term (e.g., "Net 30") can be assigned to multiple reference data sets corresponding to those units.

Specific Payment Terms: For unique business units with distinct payment agreements, specific payment terms (e.g., "Net 15") can be created and assigned exclusively to the relevant reference data set.

This approach ensures that each business unit has access to the payment terms relevant to its operations without unnecessary proliferation of identical terms across the system.

Reference Data Sets and Sharing Methods

Payment Terms

### NEW QUESTION # 52

You participated as a functional consultant in the implementation of Oracle Procurement as well as Payables for customer ABC Consulting. A Payables Analyst has logged a ticket stating that the "Create Supplier" task is not showing up in the Supplier work area.

a. You checked the related settings and found that the Payables Analyst user account has been defined as a Procurement Agent. Why was the Payables Analyst NOT able to see the "Create Supplier" task in the Supplier work area?

- **A. The analyst was not given the Supplier Manager role.**
- B. The analyst was not given the Procurement Requester role.
- C. The analyst was not given the Procurement Administrator role.
- D. The analyst was not given the Supplier Administrator role.

**Answer: A**

Explanation:

Comprehensive and Detailed In-Depth

In Oracle Fusion Applications, access to specific tasks and functionalities is governed by the roles assigned to a user. The "Create Supplier" task within the Supplier work area is a critical function that allows authorized users to add new suppliers to the system. To access this task, a user must possess the appropriate roles that grant the necessary permissions.

A . The analyst was not given the Procurement Administrator role.

The Procurement Administrator role encompasses a broad range of procurement-related activities, including configuration and oversight functions. However, the ability to create suppliers is not inherently included within this role's permissions. Therefore, assigning the Procurement Administrator role alone would not grant access to the "Create Supplier" task.

B . The analyst was not given the Supplier Manager role.

The Supplier Manager role is specifically designed to manage supplier-related activities, including the creation and maintenance of supplier records. Assigning this role to a user provides them with the necessary permissions to access the "Create Supplier" task within the Supplier work area. In the scenario described, the absence of the Supplier Manager role is the reason the Payables Analyst cannot see the "Create Supplier" task. This is corroborated by Oracle's documentation, which states that users require the Supplier Manager role to create suppliers.

support.oracle.com

C . The analyst was not given the Supplier Administrator role.

While the Supplier Administrator role grants access to certain supplier-related functions, it does not include the permissions necessary to create new suppliers. Users with only the Supplier Administrator role may have visibility into supplier information but lack the capability to add new supplier records. Therefore, the absence of this role is not the cause of the issue.

D . The analyst was not given the Procurement Requester role.

The Procurement Requester role is intended for users who initiate purchase requisitions and related procurement activities. This role does not encompass supplier creation capabilities. Assigning the Procurement Requester role would not grant access to the "Create Supplier" task, and its absence is not related to the issue at hand.

In summary, to enable the Payables Analyst to access the "Create Supplier" task, the Supplier Manager role must be assigned to their user account. This role provides the necessary permissions to create and manage supplier records within the Oracle Fusion Applications.

### NEW QUESTION # 53

A company has assigned a withholding tax classification to an invoice line to withhold two taxes, each tax withheld at different rates and remitted to different tax authorities.

Tax A has a withholding tax rate of 5% with compounding precedence of 1 Tax B has a withholding tax rate of 10% with compounding precedence of 2 What are the withholding tax amounts computed for the two taxes when the withholding taxable amount is 100\$?

- **A. Tax A:5%, Tax B:\$9.5**
- B. Tax A:4.5%, Tax B:\$10
- C. Tax A:5%, Tax B:\$10.5
- D. Tax A:5%, Tax B:\$10

**Answer: A**

### NEW QUESTION # 54

.....

Many candidates test again and again since the 1Z0-1055-25 test cost for is not cheap. Why not choose to pass exam certainly with exam study guide materials? You are under great pressure before passing the real test without Oracle 1Z0-1055-25 Study Guide Pdf. It may have a big impact on your career and life. Why not take a shortcut while facing difficulties? Why not trust latest version of VCE4Plus 1Z0-1055-25 study guide PDF and give you a good chance?
