

# 2026 The Best 100% Free 1z0-1104-25–100% Free Latest Exam Fee | 1z0-1104-25 Certification Dump

DOWNLOAD the newest TopExamCollection 1z0-1104-25 PDF dumps from Cloud Storage for free:  
<https://drive.google.com/open?id=1wmDZGQXBxaXDSBTBIsQOV75KfGYj28O5>

Preparing for the exam may be not an easy thing for some candidates, if you choose us, we will do the things for you, what you need to do is practicing. We offer you free demo for 1z0-1104-25 training materials, you can have a try before buying. And you will receive the downloading link and password within ten minutes after purchasing the 1z0-1104-25 Exam Dumps. In addition, we have after-service stuff to resolve the confusions you have. If you fail to pass the exam, we are money back guaranteed, or if you have other exam to attend, we can also replace other 2 valid exam dumps for you.

## Oracle 1z0-1104-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• <b>Implementing Identity and Access Management (IAM):</b> This section of the exam measures skills of OCI Administrators and focuses on identity and access controls. It covers IAM domains, users, groups, and compartments, as well as the use of IAM policies to manage access to resources. Candidates are also tested on configuring dynamic groups, network sources, and tag-based access control, along with managing MFA, sign-on policies, and activity monitoring.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• <b>Protecting Infrastructure - Network and Applications:</b> This section of the exam measures the skills of Cloud Security Professionals and covers methods for securing networks and applications on OCI. Topics include network security groups, firewalls, and security lists, while also focusing on the use of load balancers for availability. The section further addresses the configuration of OCI certificates and web application firewalls to strengthen infrastructure security.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• <b>Protecting Data:</b> This section of the exam measures the skills of Cloud Security Professionals and highlights data security practices in OCI. It tests knowledge of using the Key Management Service for encryption keys, managing secrets in the OCI Vault, and applying features of OCI Data Safe to ensure sensitive data remains protected.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• <b>Implementing OS and Workload Protection:</b> This section of the exam measures the skills of OCI Administrators and looks at securing workloads and operating systems. It includes the use of OCI Bastion for time-limited access, vulnerability scanning of hosts and containers, and the use of OS management for automated updates. The goal is to ensure that workloads remain resilient and well-protected.</li></ul>

**1z0-1104-25 Certification Dump & Pass 1z0-1104-25 Test Guide**

TopExamCollection helps you reach your objective by offering Oracle Cloud Infrastructure 2025 Security Professional updated test questions. These Oracle 1z0-1104-25 Dumps questions are enough to get knowledge necessary to crack the examination on the first attempt. Our Oracle Cloud Infrastructure 2025 Security Professional practice material is designed by considering the content published by Oracle. Relevancy of valid questions with the actual exam's syllabus helps you understand the pattern of the exam. TopExamCollection offers its Oracle Cloud Infrastructure 2025 Security Professional product in three forms, 1z0-1104-25 PDF, desktop practice exam software, and Oracle Cloud Infrastructure 2025 Security Professional web-based practice test.

## Oracle Cloud Infrastructure 2025 Security Professional Sample Questions (Q32-Q37):

### NEW QUESTION # 32

#### Challenge 2 - Task 1

In deploying a new application, a cloud customer needs to reflect different security postures. If a security zone is enabled with the Maximum Security Zone recipe, the customer will be unable to create or update a resource in the security zone if the action violates the attached Maximum Security Zone policy.

As an application requirement, the customer requires a compute instance in the public subnet. You therefore, need to configure Custom Security Zones that allow the creation of compute instances in the public subnet.

Review the architecture diagram, which outlines the resources you'll need to address the requirement:

Preconfigured

To complete this requirement, you are provided with the following:

Access to an OCI tenancy, an assigned compartment, and OCI credentials

Required IAM policies

Task 2: Create a Security Zone

Create a security Zone named IAD\_SAP-PBT-CSZ-01 in your assigned compartment and associate it with the Custom Security Zone Recipe (IAD-SAP-PBT-CSP-01) created in the previous task.

Enter the OCID of the created Security zone in the box below.

Security Zone name: IAD-SP-PBT-CSZ-01  
Associated Recipe: IAD-SP-PBT-CSP-01  
Compartment: 98915992-C01  
Purpose: Allow compute in Public Subnet

**Answer:**

Explanation:

See the solution below in Explanation.

Explanation:

To create a Security Zone named IAD\_SAP-PBT-CSZ-01 in your assigned compartment and associate it with the Custom Security Zone Recipe IAD-SP-PBT-CSP-01 created in the previous task, follow these steps based on the Oracle Cloud Infrastructure (OCI) Security Zones documentation.

Step-by-Step Solution for Task 2: Create a Security Zone

\* Log in to the OCI Console:

\* Use your OCI credentials to log in to the OCI Console (<https://console.us-ashburn-1.oraclecloud.com>).

\* Ensure you have access to the assigned compartment.

\* Navigate to Security Zones:

\* From the OCI Console, click the navigation menu (hamburger icon) on the top left.

\* Under Governance and Administration, select Security Zones.

\* Create a New Security Zone:

\* In the Security Zones dashboard, click the Create Security Zone button.

\* Configure the Security Zone Details:

\* Name: Enter IAD\_SAP-PBT-CSZ-01.

\* Compartment: Select the assigned compartment provided.

\* Description: (Optional) Add a description, e.g., "Security Zone for public subnet compute instances."

\* Associate the Custom Security Zone Recipe:

\* In the Recipes section, select the custom recipe IAD-SP-PBT-CSP-01 created in Task 1 from the dropdown list.

\* Ensure the recipe is correctly associated to enforce the policy allowing compute instances in the public subnet.

\* Define the Security Zone Scope:

\* Under Resources to Protect, select the compartment or specific resources (e.g., the VCN with CIDR 10.0.0.0/16 and public subnet 10.0.10.0/24) to apply the security zone.

\* Check the box to include all resources in the selected compartment if applicable.

\* Create the Security Zone:

\* Click Create to finalize the security zone creation.

\* Once created, note the OCID of the security zone from the security zone details page. The OCID will be a unique identifier starting with ocid1.securityzone.

\* Verify the Security Zone:

\* Go to the Security Zones tab and locate IAD\_SAP-PBT-CSZ-01.

\* Confirm the associated recipe (IAD-SP-PBT-CSP-01) and the applied policies.

OCID of the Created Security Zone

\* The exact OCID will be generated upon creation (e.g., ocid1.securityzone.oc1..<unique\_string>).

Please enter the OCID displayed in the OCI Console after completing Step 7.

**NEW QUESTION # 33**

"Your company is in the process of migrating its sensitive data to Oracle Cloud Infrastructure (OCI) and is prioritizing the strongest possible security measures. Encryption is a key part of this strategy, but you are particularly concerned about the physical security of the hardware where your encryption keys will be stored.

Which characteristic of OCI Key Management Service (KMS) helps ensure the physical security of your encryption keys?

- A. Seamless integration with other OCI services for streamlined workflows
- **B. Utilization of FIPS 140-2 validated Hardware Security Modules (HSMs)**
- C. Centralized key management for simplified administration
- D. Granular customer control over key access permissions

**Answer: B**

**NEW QUESTION # 34**

An OCI administrator notices that a compute instance running in the production compartment is unable to create Object Storage buckets using the OCI CLI command:

`oci os bucket create --name mybucket --compartment-id <compartment_OCID> --auth instance_principal` The error message returned states:

"NotAuthorizedOrNotFound: You are not authorized to perform this action." The administrator verifies that the instance has Internet access and can reach OCI endpoints.

What then could be causing the issue?

- A. The instance is using the wrong OCI CLI authentication method.
- B. The policy is written at the root compartment instead of the production compartment.
- C. The bucket name is already in use, causing a conflict.
- **D. The instance is not part of any Dynamic Group or the matching rule is incorrect.**

**Answer: D**

### NEW QUESTION # 35

"A business has a hybrid cloud infrastructure with Oracle Linux instances running in OCI and on-premises. They want to reduce the amount of bandwidth used when patching systems.

Which component of OS Management Hub can help to reduce the bandwidth usage for patching?

- A. Management agents
- B. Management stations
- C. Dynamic groups
- **D. Profiles"**

**Answer: D**

### NEW QUESTION # 36

A company is securing its compute instances (VMs and Bare Metal Machines) in Oracle Cloud infrastructure (OCI) using a network firewall. As shown in the diagram, traffic flows from the internet Gateway (IGW) to the firewall in the Public DMZ Subnet, and then to the compute instances in the Public Subnet.

When configuring security lists and network security groups (NSGs) in this setup, what should they consider?

- A. If the policy used with the firewall has no rules specified, the firewall allows all traffic.
- **B. Ensure that any security list or NSG rules allow the traffic to enter the firewall for appropriate evaluation.**
- C. Security list and NSG rules associated with the firewall subnet and VNICs are evaluated after the firewall.
- D. Add stateful rules to the security list attached to the firewall subnet or include the firewall in an NSG containing stateful rules for better performance.

**Answer: B**

### NEW QUESTION # 37

.....

As we all know, respect and power is gained through knowledge or skill. The society will never welcome lazy people. Do not satisfy what you have owned. Challenge some fresh and meaningful things, and when you complete 1z0-1104-25 Exam, you will find you have reached a broader place where you have never reach. For instance, our 1z0-1104-25 practice torrent is the most suitable learning product for you to complete your targets.
