## Free PDF Marvelous Microsoft - AZ-204 - New Developing Solutions for Microsoft Azure Exam Name

Our AZ-204 exam questions are valuable and useful and if you buy our product will provide first-rate service to you to make you satisfied. We provide not only the free download and try out of the AZ-204 study guide but also the immediate refund if you fail in the test. To see whether our AZ-204 Study Materials are worthy to buy you can have a look at the introduction of our product on the website and free download the demos to check the questions and answers.

## Microsoft Developing Solutions for Microsoft Azure Sample Questions (Q455-Q460):

### NEW QUESTION # 455

You plan to create a Docker image that runs an ASP.NET Core application named ContosoApp. You have a setup script named setupScript.ps1 and a series of application files including ContosoApp.dll.

You need to create a Dockerfile document that meets the following requirements:

- \* Call setupScripts.ps1 when the container is built.
- \* Run ContosoApp.dll when the container starts.

The Dockerfile document must be created in the same folder where ContosoApp.dll and setupScript.ps1 are stored.

Which five commands should you use to develop the solution? To answer, move the appropriate commands from the list of commands to the answer area and arrange them in the correct order.

## Commands

```
FROM microsoft/aspnetcore:latest
WORKDIR /apps/ContosoApp
CMD ["dotnet", "ContosoApp.dll"]
COPY ./ .
RUN powershell ./setupScript.ps1
```

## Answer Area

Answer:

Explanation:

## Commands

```
FROM microsoft/aspnetcore:latest
WORKDIR /apps/ContosoApp
CMD ["dotnet", "ContosoApp.dll"]
COPY ./ .
RUN powershell ./setupScript.ps1
```

## Answer Area

```
CMD ["dotnet", "ContosoApp.dll"]
FROM microsoft/aspnetcore:latest
WORKDIR /apps/ContosoApp
COPY ./ .
RUN powershell ./setupScript.ps1
```

Explanation

```
CMD ["dotnet", "ContosoApp.dll"]
FROM microsoft/aspnetcore:latest
WORKDIR /apps/ContosoApp
COPY ./ .
RUN powershell ./setupScript.ps1
```

Box 1: CMD [..]

Cmd starts a new instance of the command interpreter, Cmd.exe.

Syntax: CMD <string>

Specifies the command you want to carry out.

Box 2: FROM microsoft/aspnetcore-build:latest

Box 3: WORKDIR /apps/ContosoApp

Box 4: COPY ./ .

Box 5: RUN powershell ./setupScript.ps1

## NEW QUESTION # 456

You develop a containerized application. You plan to deploy the application to a new Azure Container instance by using a third-party continuous integration and continuous delivery (CI/CD) utility.

The deployment must be unattended and include all application assets. The third-party utility must only be able to push and pull images from the registry. The authentication must be managed by Azure Active Directory (Azure AD). The solution must use the principle of least privilege.

You need to ensure that the third-party utility can access the registry.

Which authentication options should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Authentication	Option
Registry authentication method	<div style="border: 1px solid #ccc; padding: 2px;"> <div style="text-align: right; font-size: 0.8em;">▼</div> <div style="padding: 2px;">Service principal</div> <div style="padding: 2px;">Individual identity</div> <div style="padding: 2px;">Repository-scoped access token</div> <div style="padding: 2px;">Managed identity for Azure resources</div> </div>
RBAC role	<div style="border: 1px solid #ccc; padding: 2px;"> <div style="text-align: right; font-size: 0.8em;">▼</div> <div style="padding: 2px;">AcrPull</div> <div style="padding: 2px;">Owner</div> <div style="padding: 2px;">AcrPush</div> <div style="padding: 2px;">Contributor</div> </div>

**Answer:**

Explanation:

Authentication	Option
Registry authentication method	<div style="border: 1px solid #ccc; padding: 2px;"> <div style="text-align: right; font-size: 0.8em;">▼</div> <div style="padding: 2px;">Service principal</div> <div style="padding: 2px;">Individual identity</div> <div style="padding: 2px;">Repository-scoped access token</div> <div style="padding: 2px;">Managed identity for Azure resources</div> </div>
RBAC role	<div style="border: 1px solid #ccc; padding: 2px;"> <div style="text-align: right; font-size: 0.8em;">▼</div> <div style="padding: 2px;">AcrPull</div> <div style="padding: 2px;">Owner</div> <div style="padding: 2px;">AcrPush</div> <div style="padding: 2px;">Contributor</div> </div>

Explanation:

Authentication	Option
Registry authentication method	<div style="border: 1px solid #ccc; padding: 2px;"> <div style="text-align: right; font-size: 0.8em;">▼</div> <div style="padding: 2px; background-color: #f0f0f0;">Service principal</div> <div style="padding: 2px;">Individual identity</div> <div style="padding: 2px;">Repository-scoped access token</div> <div style="padding: 2px;">Managed identity for Azure resources</div> </div>
RBAC role	<div style="border: 1px solid #ccc; padding: 2px;"> <div style="text-align: right; font-size: 0.8em;">▼</div> <div style="padding: 2px;">AcrPull</div> <div style="padding: 2px;">Owner</div> <div style="padding: 2px; background-color: #f0f0f0;">AcrPush</div> <div style="padding: 2px;">Contributor</div> </div>

Box 1: Service principal

Applications and container orchestrators can perform unattended, or "headless," authentication by using an Azure Active Directory (Azure AD) service principal.

Box 2: AcrPush

AcrPush provides pull/push permissions only and meets the principle of least privilege.

**NEW QUESTION # 457**

Fourth Coffee has an ASP.NET Core web app that runs in Docker. The app is mapped to the [www.fourthcoffee.com](http://www.fourthcoffee.com) domain. Fourth Coffee is migrating this application to Azure.

You need to provision an App Service Web App to host this docker image and map the custom domain to the App Service web app.

A resource group named `FourthCoffeePublicWebResourceGroup` has been created in the WestUS region that contains an App Service Plan named `AppServiceLinuxDockerPlan`.

Which order should the CLI commands be used to develop the solution? To answer, move all of the Azure CLI command from the list of commands to the answer area and arrange them in the correct order.

Azure CLI commandsAnswer area

```
az webapp config hostname add
--webapp-name $appName
--resource-group fourthCoffeePublicWebResourceGroup
--hostname $fqdn

#/bin/bash
appName="FourthCoffeePublicWeb$random".
location "WestUS"
dockerHubContainerPath="FourthCoffee/publicweb:v1"
fqdn=http://www.fourthcoffee.com>www.fourthcoffee.com

az webapp create
--name $appName
--plan AppServiceLinuxDockerPlan
--resource-group fourthCoffeePublicWebResourceGroup

az webapp config container set
--docker-custom-image-name $dockerHibContainerPath
--name $appName
--resource-group fourthCoffeePublicWebResourceGroup
```

MicrosoftAnswer area

#### NEW QUESTION # 459

A company has multiple warehouse. Each warehouse contains IoT temperature devices which deliver temperature data to an Azure Service Bus queue.

You need to send email alerts to facility supervisors immediately if the temperature at a warehouse goes above or below specified threshold temperatures.

Which five actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

### Actions

Add a logic app trigger that fires when one or more messages arrive in the queue.

Add a Recurrence trigger that schedules the app to run every 15 minutes.

Add an action that sends an email to specified personnel if the temperature is outside of those thresholds.

Add a trigger that reads IoT temperature data from a Service Bus queue.

Add a logic app action that fires when one or more messages arrive in the queue.

Add a condition that compares the temperature against the upper and lower thresholds.

Create a blank Logic app.

Add an action that reads IoT temperature data from the Service Bus queue.

### Answer Area

### Answer:

Explanation:

### Actions

Add a logic app trigger that fires when one or more messages arrive in the queue.

Add a Recurrence trigger that schedules the app to run every 15 minutes.

Add an action that sends an email to specified personnel if the temperature is outside of those thresholds.

Add a trigger that reads IoT temperature data from a Service Bus queue.

Add a logic app action that fires when one or more messages arrive in the queue.

Add a condition that compares the temperature against the upper and lower thresholds.

Create a blank Logic app.

Add an action that reads IoT temperature data from the Service Bus queue.

### Answer Area

Create a blank Logic app.

Add a logic app action that fires when one or more messages arrive in the queue.

Add a trigger that reads IoT temperature data from a Service Bus queue.

Add a condition that compares the temperature against the upper and lower thresholds.

Add an action that sends an email to specified personnel if the temperature is outside of those thresholds.

### NEW QUESTION # 460

.....

Getting a Microsoft AZ-204 trusted certification is a way to prove your expertise and show you that you are ready all the time to take the additional responsibilities. The ValidBraindumps AZ-204 certification exam assists you to climb the corporate ladder easily and helps you to achieve your professional career objectives. With the ValidBraindumps AZ-204 Certification Exam you can get industry prestige and a significant competitive advantage.

**Valid Test AZ-204 Tips:** <https://www.validbraindumps.com/AZ-204-exam-prep.html>

And we have made scientific arrangements for the content of the AZ-204 actual exam, Forget taking time consuming and wallet crunching Microsoft Valid Test AZ-204 Tips classes or spending days searching for Microsoft Valid Test AZ-204 Tips dumps,

instead take advantage of our virtual Microsoft Valid Test AZ-204 Tips ebook in PDF format that will allow you to train when you have time, Based on our years of experience, taking the Microsoft AZ-204 exam without proper preparation is such a suicidal move.

Microsoft offers role-based certifications in several areas AZ-204 of Azure, and the most advanced certification for IT administrators is the Azure Solutions Architect Expert.

Flexible Versus Rigid Aggregations, And we have made scientific arrangements for the content of the AZ-204 Actual Exam, Forget taking time consuming and wallet crunching Microsoft classes or spending days searching for Microsoft dumps, Exam AZ-204 Syllabus instead take advantage of our virtual Microsoft ebook in PDF format that will allow you to train when you have time.

## AZ-204 - High-quality New Developing Solutions for Microsoft Azure Exam Name

Based on our years of experience, taking the Microsoft AZ-204 exam without proper preparation is such a suicidal move, People from different parts of the world New AZ-204 Exam Name praise our superior-quality and exceptional product from the core of their heart.

With our AZ-204 exam materials, you only need 20-30 hours' practices before taking part in the real test.
