

High Pass-Rate PSE-Strata-Pro-24 Reliable Exam Answers & Leader in Qualification Exams & Realistic Palo Alto Networks Palo Alto Networks Systems Engineer Professional - Hardware Firewall

2026 Latest ITExamReview PSE-Strata-Pro-24 PDF Dumps and PSE-Strata-Pro-24 Exam Engine Free Share: https://drive.google.com/open?id=1dWYZ1X38mnykHbW3OhWwbtcb13_Ma3NHu

The main benefit of Palo Alto Networks PSE-Strata-Pro-24 exam dumps in hand experience in technical subjects is that you shall know its core points. You don't have to just note the points and try remembering each. You shall know the step-wise process of how you can execute a procedure and not skip any PSE-Strata-Pro-24 point. Experience gives you a clear insight into everything you study for your Palo Alto Networks certification exam. So, when you get the Palo Alto Networks Systems Engineer Professional - Hardware Firewall PSE-Strata-Pro-24 exam dumps for the exam, make sure that you get in hand experience with all the technical concepts.

With PSE-Strata-Pro-24 study tool, you are not like the students who use other materials. As long as the syllabus has changed, they need to repurchase learning materials. This not only wastes a lot of money, but also wastes a lot of time. Our industry experts are constantly adding new content to PSE-Strata-Pro-24 exam torrent based on constantly changing syllabus and industry development breakthroughs. We also hire dedicated staff to continuously update our question bank daily, so no matter when you buy PSE-Strata-Pro-24 Guide Torrent, what you learn is the most advanced. Even if you fail to pass the exam, as long as you are willing to continue to use our PSE-Strata-Pro-24 study tool, we will still provide you with the benefits of free updates within a year.

>> PSE-Strata-Pro-24 Reliable Exam Answers <<

Exam Palo Alto Networks PSE-Strata-Pro-24 Score | New PSE-Strata-Pro-24 Exam Question

The best news is that during the whole year after purchasing, you will get the latest version of our PSE-Strata-Pro-24 exam prep study materials for free, since as soon as we have compiled a new version of the study materials, our company will send the latest one of our study materials to your email immediately. The experts in our company are always keeping a close eye on even the slightest change in the field. Therefore, we can assure that you will miss nothing needed for the PSE-Strata-Pro-24 Exam. What's more, the latest version of our study materials will be a good way for you to broaden your horizons as well as improve your skills.

Palo Alto Networks Systems Engineer Professional - Hardware Firewall Sample Questions (Q54-Q59):

NEW QUESTION # 54

Which two tools should a systems engineer use to showcase the benefit of an evaluation that a customer has just concluded?

- A. Golden Images
- B. Firewall Sizing Guide
- C. Best Practice Assessment (BPA)
- D. Security Lifecycle Review (SLR)

Answer: C,D

Explanation:

After a customer has concluded an evaluation of Palo Alto Networks solutions, it is critical to provide a detailed analysis of the results and benefits gained during the evaluation. The following two tools are most appropriate:

- * Why "Best Practice Assessment (BPA)" (Correct Answer A)?The BPA evaluates the customer's firewall configuration against Palo Alto Networks' recommended best practices. It highlights areas where the configuration could be improved to strengthen security posture. This is an excellent tool to showcase how adopting Palo Alto Networks' best practices aligns with industry standards and improves security performance.
- * Why "Security Lifecycle Review (SLR)" (Correct Answer B)?The SLR provides insights into the customer's security environment based on data collected during the evaluation. It identifies vulnerabilities, risks, and malicious activities observed in the network and demonstrates how Palo Alto Networks' solutions can address these issues. SLR reports use clear visuals and metrics, making it easier to showcase the benefits of the evaluation.
- * Why not "Firewall Sizing Guide" (Option C)?The Firewall Sizing Guide is a pre-sales tool used to recommend the appropriate firewall model based on the customer's network size, performance requirements, and other criteria. It is not relevant for showcasing the benefits of an evaluation.
- * Why not "Golden Images" (Option D)?Golden Images refer to pre-configured templates for deploying firewalls in specific use cases. While useful for operational efficiency, they are not tools for demonstrating the outcomes or benefits of a customer evaluation.

NEW QUESTION # 55

A customer sees unusually high DNS traffic to an unfamiliar IP address. Which Palo Alto Networks Cloud-Delivered Security Services (CDSS) subscription should be enabled to further inspect this traffic?

- A. Advanced WildFire
- B. Advanced URL Filtering
- C. Advanced Threat Prevention
- D. Advanced DNS Security

Answer: D

Explanation:

The appropriate CDSS subscription to inspect and mitigate suspicious DNS traffic is Advanced DNS Security

. Here's why:

- * Advanced DNS Security protects against DNS-based threats, including domain generation algorithms (DGA), DNS tunneling (often used for data exfiltration), and malicious domains used in attacks. It leverages machine learning to detect and block DNS traffic associated with command-and-control servers or other malicious activities. In this case, unusually high DNS traffic to an unfamiliar IP address is likely indicative of a DNS-based attack or malware activity, making this the most suitable service.
- * Option A: Advanced Threat Prevention (ATP) focuses on identifying and blocking sophisticated threats in network traffic, such as exploits and evasive malware. While it complements DNS Security, it does not specialize in analyzing DNS-specific traffic patterns.
- * Option B: Advanced WildFire focuses on detecting and preventing file-based threats, such as malware delivered via email attachments or web downloads. It does not provide specific protection for DNS-related anomalies.
- * Option C: Advanced URL Filtering is designed to prevent access to malicious or inappropriate websites based on their URLs. While DNS may be indirectly involved in resolving malicious websites, this service does not directly inspect DNS traffic patterns for threats.
- * Option D (Correct): Advanced DNS Security specifically addresses DNS-based threats. By enabling this service, the customer can detect and block DNS queries to malicious domains and investigate anomalous DNS behavior like the high traffic observed in this scenario.

How to Enable Advanced DNS Security:

- * Ensure the firewall has a valid Advanced DNS Security license.
- * Navigate to Objects > Security Profiles > Anti-Spyware.
- * Enable DNS Security under the "DNS Signatures" section.
- * Apply the Anti-Spyware profile to the relevant Security Policy to enforce DNS Security.

NEW QUESTION # 56

What are three valid Panorama deployment options? (Choose three.)

- A. With a cloud service provider (AWS, Azure, GCP)
- B. As a virtual machine (ESXi, Hyper-V, KVM)
- C. As a container (Docker, Kubernetes, OpenShift)
- D. On a Raspberry Pi (Model 4, Model 400, Model 5)
- E. As a dedicated hardware appliance (M-100, M-200, M-500, M-600)

Answer: A,B,E

Explanation:

Panorama is Palo Alto Networks' centralized management solution for managing multiple firewalls. It supports multiple deployment options to suit different infrastructure needs. The valid deployment options are as follows:

* Why "As a virtual machine (ESXi, Hyper-V, KVM)" (Correct Answer A)? Panorama can be deployed as a virtual machine on hypervisors like VMware ESXi, Microsoft Hyper-V, and KVM. This is a common option for organizations that already utilize virtualized infrastructure.

* Why "With a cloud service provider (AWS, Azure, GCP)" (Correct Answer B)? Panorama is available for deployment in the public cloud on platforms like AWS, Microsoft Azure, and Google Cloud Platform. This allows organizations to centrally manage firewalls deployed in cloud environments.

* Why "As a dedicated hardware appliance (M-100, M-200, M-500, M-600)" (Correct Answer E)?

Panorama is available as a dedicated hardware appliance with different models (M-100, M-200, M-500, M-600) to cater to various performance and scalability requirements. This is ideal for organizations that prefer physical appliances.

* Why not "As a container (Docker, Kubernetes, OpenShift)" (Option C)? Panorama is not currently supported as a containerized deployment. Containers are more commonly used for lightweight and ephemeral services, whereas Panorama requires a robust and persistent deployment model.

* Why not "On a Raspberry Pi (Model 4, Model 400, Model 5)" (Option D)? Panorama cannot be deployed on low-powered hardware like Raspberry Pi. The system requirements for Panorama far exceed the capabilities of Raspberry Pi hardware.

Reference: Palo Alto Networks Panorama Admin Guide outlines the supported deployment options, which include virtual machines, cloud platforms, and hardware appliances.

NEW QUESTION # 57

While a quote is being finalized for a customer that is purchasing multiple PA-5400 series firewalls, the customer specifies the need for protection against zero-day malware attacks.

Which Cloud-Delivered Security Services (CDSS) subscription add-on license should be included in the quote?

- A. App-ID
- B. Advanced WildFire
- C. Advanced Threat Prevention
- D. AI Access Security

Answer: B

Explanation:

Zero-day malware attacks are sophisticated threats that exploit previously unknown vulnerabilities or malware signatures. To provide protection against such attacks, the appropriate Cloud-Delivered Security Service subscription must be included.

* Why "Advanced WildFire" (Correct Answer C)? Advanced WildFire is Palo Alto Networks' sandboxing solution that identifies and prevents zero-day malware. It uses machine learning, dynamic analysis, and static analysis to detect unknown malware in real time.

* Files and executables are analyzed in the cloud-based sandbox, and protections are shared globally within minutes.

* Advanced WildFire specifically addresses zero-day threats by dynamically analyzing suspicious files and generating new signatures.

* Why not "AI Access Security" (Option A)? AI Access Security is designed to secure SaaS applications by monitoring and enforcing data protection and compliance. While useful for SaaS security, it does not focus on detecting or preventing zero-day malware.

* Why not "Advanced Threat Prevention" (Option B)? Advanced Threat Prevention (ATP) focuses on detecting zero-day exploits (e.g., SQL injection, buffer overflows) using inline deep learning but is not specifically designed to analyze and prevent zero-day malware. ATP complements Advanced WildFire, but WildFire is the primary solution for malware detection.

* Why not "App-ID" (Option D)? App-ID identifies and controls applications on the network. While it improves visibility and

security posture, it does not address zero-day malware detection or prevention.

NEW QUESTION # 58

A company has multiple business units, each of which manages its own user directories and identity providers (IdPs) with different domain names. The company's network security team wants to deploy a shared GlobalProtect remote access service for all business units to authenticate users to each business unit's IdP.

Which configuration will enable the network security team to authenticate GlobalProtect users to multiple SAML IdPs?

- A. Multiple Cloud Identity Engine tenants for each business unit
- B. Multiple authentication mode Cloud Identity Engine authentication profile for use on the GlobalProtect portals and gateways
- C. GlobalProtect with multiple authentication profiles for each SAML IdP
- D. Authentication sequence that has multiple authentication profiles using different authentication methods

Answer: C

Explanation:

To configure GlobalProtect to authenticate users from multiple SAML identity providers (IdPs), the correct approach involves creating multiple authentication profiles, one for each IdP. Here's the analysis of each option:

* Option A: GlobalProtect with multiple authentication profiles for each SAML IdP

* GlobalProtect allows configuring multiple SAML authentication profiles, each corresponding to a specific IdP.

* These profiles are associated with the GlobalProtect portal or gateway. When users attempt to authenticate, they can be directed to the appropriate IdP based on their domain or other attributes.

* This is the correct approach to enable authentication for users from multiple IdPs.

* Option B: Multiple authentication mode Cloud Identity Engine authentication profile for use on the GlobalProtect portals and gateways

* The Cloud Identity Engine (CIE) can synchronize identities from multiple directories, but it does not directly support multiple SAML IdPs for a shared GlobalProtect setup.

* This option is not applicable.

* Option C: Authentication sequence that has multiple authentication profiles using different authentication methods

* Authentication sequences allow multiple authentication methods (e.g., LDAP, RADIUS, SAML) to be tried in sequence for the same user, but they are not designed for handling multiple SAML IdPs.

* This option is not appropriate for the scenario.

* Option D: Multiple Cloud Identity Engine tenants for each business unit

* Deploying multiple CIE tenants for each business unit adds unnecessary complexity and is not required for configuring GlobalProtect to authenticate users to multiple SAML IdPs.

* This option is not appropriate.

NEW QUESTION # 59

.....

In order to meet the needs of all customers that pass their exam and get related certification, the experts of our company have designed the updating system for all customers. Our PSE-Strata-Pro-24 exam question will be constantly updated every day. Maybe most of people prefer to use the computer when they are study, but we have to admit that many people want to learn buy the paper, because they think that studying on the computer too much does harm to their eyes. PSE-Strata-Pro-24 Test Questions have the function of supporting printing in order to meet the need of customers.

Exam PSE-Strata-Pro-24 Score: <https://www.itexamreview.com/PSE-Strata-Pro-24-exam-dumps.html>

Obtaining our PSE-Strata-Pro-24 study guide in the palm of your hand, you can achieve a higher rate of success, It does not overlap with the content of the PSE-Strata-Pro-24 question banks on the market, and avoids the fatigue caused by repeated exercises, By choosing PSE-Strata-Pro-24 exam preparation materials, you can not only gain more ability certificates but also improve your learning ability, which is really important in your career prospect, You can find features of this Palo Alto Networks PSE-Strata-Pro-24 prep material below.

Risk Impact Evaluation Criteria, Apps Versus Mobile-Friendly Websites, Obtaining our PSE-Strata-Pro-24 study guide in the palm of your hand, you can achieve a higher rate of success.
