Salesforce Sharing-and-Visibility-Architect certification is considered one of the most challenging and prestigious certifications in the Salesforce ecosystem. It requires a deep understanding of the Salesforce platform, as well as the ability to design and implement complex sharing and visibility scenarios. Salesforce Certified Sharing and Visibility Architect certification is highly valued by organizations that use Salesforce and is often a requirement for senior-level roles in Salesforce administration or development.

Salesforce Sharing-and-Visibility-Architect certification is considered one of the most challenging Salesforce certifications to obtain. Candidates must have a thorough understanding of Salesforce's sharing and visibility model, as well as experience designing and implementing complex sharing and visibility solutions. Sharing-and-Visibility-Architect exam is designed to test a candidate's ability to analyze complex sharing and visibility scenarios, design appropriate solutions, and communicate those solutions effectively. Candidates who pass the exam earn the prestigious Salesforce Certified Sharing and Visibility Architect certification, which is recognized in the industry as a mark of excellence.

Salesforce Sharing-and-Visibility-Architect Certification is a valuable asset for any Salesforce professional who wants to demonstrate expertise in sharing and visibility. It validates your skills and knowledge in designing, implementing, and maintaining complex sharing solutions, and is recognized globally as a mark of excellence in sharing and visibility expertise. If you're a Salesforce professional looking to take your career to the next level, earning this certification is an excellent way to do so.

So stop idling away your precious time and begin your review with the help of our

Sharing-and-Visibility-Architect learning quiz as soon as possible, and you will pass the exam in the least time.

Salesforce Certified Sharing and Visibility Architect Sample Questions (Q71-Q76):

NEW QUESTION # 71

User A at Universal Containers is in the default account team for User B. User B owns the ACME account and changed User A's team member access to the account. What is the impact of this change?

- A. Changes affect the default Opportunity team
- B. Changes affect only the ACME Account
- C. Changes affect all child ACME Accounts.
- D. Changes affect the default Account team.

Answer: B

Explanation:

Explanation

Changes affect only the ACME Account. Changing the team member access to the account does not affect the default account team, the default opportunity team, or the child accounts. The team member access is specific to the individual account record.

NEW QUESTION # 72

A sales rep at Universal Containers (UC) has manually shared an Opportunity record with internal Pre-Sales users. After some time, the sales rep moved to another position and all opportunities records that were owned were transferred to a new sales rep. What happened to the internal Pre-Sales users' access to the opportunity?

- A. They still have access to the record due to implicit sharing.
- B. They will no longer have access to the record.
- C. They still have access to the record due to inherited sharing.
- D. They still have access to the record due to team access.

Answer: B

Explanation:

Explanation

The internal Pre-Sales users will no longer have access to the opportunity after the ownership transfer, since manual sharing is removed when a record owner changes. Option A is incorrect, since inherited sharing does not apply to manual sharing. Option B is incorrect, since implicit sharing does not apply to internal users.

Option D is incorrect, since team access does not apply to manual sharing.

NEW QUESTION # 73

Universal Health is planning to store patient notes in Salesforce. Patient notes consist of long text notes taken by a user to document phone calls with a patient.

A data audit has identified that these notes can contain Personally Identifiable Information (PII) and Personal Health Information (PHI). The regulatory requirements state that this data must be encrypted at rest as well as in transit.

What should the Architect do in order to make sure Universal Health stays compliant?

- A. Create a new Custom Field of type "Text (Encrypted)" and move the patient notes data into the new field.
- B. Enable Salesforce Shield Platform Data Encryption and mark the patient notes field as encrypted.
- C. No action is required; all Salesforce data is encrypted at rest as part of Salesforce's standard trust measures.
- D. Use an Apex trigger and the Apex Crypto class to encrypt patient notes as soon as they are saved to Salesforce.

Answer: B

Explanation:

Explanation

The best option for the architect to make sure Universal Health stays compliant is B. Enabling Salesforce Shield Platform Data Encryption and marking the patient notes field as encrypted will ensure that the data is encrypted at rest as well as in transit, using a tenant secret that only Universal Health can access. This will also allow them to use standard Salesforce features and functionality.

with the encrypted data. The other options are either incorrect or not optimal.

NEW QUESTION # 74

Sales Operations at Universal Containers (UC) has created Public Report and Dashboard folders for sales managers that report to the VP of sales. Sales Operations currently spends a few hours each month updating users that should have access to edit items in these folders. In which two ways can UC grant access to sales managers to automate access to these Reports and Dashboards folders?

Choose 2 answers

- A. Share the folders with a "Sales Managers" Public Group.
- B. Share the folders lowest roles in the role hierarchy, Superiors will get access automatically.
- C. Share the folders with the "Sales Managers" Queue.
- D. Share the folders with the "VP of Sales" Role and Subordinates.

Answer: A,D

Explanation:

Explanation

Sharing the folders with the "VP of Sales" Role and Subordinates and sharing the folders with a "Sales Managers" Public Group are two ways that UC can grant access to sales managers to automate access to these Reports and Dashboards folders. Folder sharing allows users to share reports and dashboards with other users based on roles, subordinates, public groups, or individual users.

Option A is incorrect, since sharing the folders with lowest roles in the role hierarchy would not give access to superiors automatically, but only to subordinates. Option C is incorrect, since sharing the folders with a queue is not possible.

NEW QUESTION # 75

Which three areas should the Architect review in order to increase performance of "Record Access" and "Sharing" calculations?

Choose 3 answers.

- A. Opportunity data, to ensure that no Account has more than 10,000 Opportunity records that are related to it.
- B. Custom Object data, to ensure that no Account has more than 10,000 Custom Objects that look up to it.
- C. Record ownership, to ensure that no user owns more than 10,000 Object records in the system
- D. Apex Managed Sharing triggers, to ensure that no trigger is querying more than 10,000 Object records.

Answer: A,B,C

NEW QUESTION # 76

.....

There are three formats of the Sharing-and-Visibility-Architect practice training material for your preparation. You can choose as your needs. The first one is the pdf files: Sharing-and-Visibility-Architect pdf dumps can be printed into papers which is very suitable for making notes.
