## Cisco 300-710 Dumps PDF Format

Real4Prep informs you that the Securing Networks with Cisco Firepower (300-710) questions regularly change the content of the Securing Networks with Cisco Firepower real exam. Therefore, you must stay informed as per these changes to save time, money, and mental peace. As was already discussed, Real4Prep satisfies the needs of Cisco 300-710 Exam candidates. The customer will receive updates of Securing Networks with Cisco Firepower (300-710) real dumps for up to 365 days after buying the product.

## Cisco Securing Networks with Cisco Firepower Sample Questions (Q361-Q366):

### NEW QUESTION # 361

Drag and Drop Question

A network engineer is deploying a Cisco Firepower 4100 appliance and must configure a multi- instance environment for high availability. Drag and drop the actions from the left into sequence on the right for this configuration.

Answer Area	
Add a MAC pool prefix and view the MAC addresses for the container instance interfaces	1
Configure interfaces	2
Add a high-availability pair	3
Add a resource profile for container instances	4
Add a Standalone Firepower Threat Defense for Cisco Secure Firewall Management Center	5

Answer:

Explanation:

Answer Area

Add a resource profile for container instances
Add a MAC pool prefix and view the MAC addresses for the container instance interfaces
Configure interfaces
Add a Standalone Firepower Threat Defense for Cisco Secure Firewall Management Center
Add a high-availability pair

### NEW QUESTION # 362

Which CLI command is used to generate firewall debug messages on a Cisco Firepower?

- A. system support dump-table
- B. system support firewall-engine-debug
- C. system support platform
- D. system support ssl-debug

Answer: B

Explanation:

Reference: <https://www.cisco.com/c/en/us/support/docs/security/firepower-ngfw/212330-firepower-management-center-display-acc.html>

### NEW QUESTION # 363

An engineer is configuring a Cisco Secure Firewall Threat Defense device and wants to create a new intrusion rule based on the

detection of a specific pattern in the data payload for a new zero-day exploit. Which keyword type must be used to add a Line that identifies the author of the rule and the date it was created?

- A. reference
- B. gtp\_info
- C. content
- **D. metadata**

**Answer: D**

Explanation:

When creating a new intrusion rule in a Cisco Secure Firewall Threat Defense (FTD) device, the keyword type "metadata" must be used to add a line that identifies the author of the rule and the date it was created. The metadata keyword is used to store additional information about the rule, such as authorship and creation date.

Steps:

- \* In FMC, navigate to Policies > Intrusion > Rules.
- \* Create a new rule or edit an existing one.
- \* Use the "metadata" keyword to add information about the author and date.

Example:

metadata: created\_at 2023-06-15, author "John Doe";

By using the metadata keyword, you ensure that the rule contains relevant information for tracking its creation and authorship, which is essential for maintaining rule documentation and accountability.

#### **NEW QUESTION # 364**

Which two considerations must be made when deleting and re-adding devices while managing them via Cisco FMC (Choose two).

- A. Once a device has been deleted, It must be reconfigured before it is re-added to the Cisco FMC.
- B. An option to re-apply NAT and VPN policies during registration is available, so users do not need to re-apply the policies after registration is completed.
- **C. There is no option to re-apply NAT and VPN policies during registration is available, so users need to re-apply the policies after registration is completed.**
- D. Before re-adding the device In Cisco FMC, the manager must be added back.
- **E. The Cisco FMC web interface prompts users to re-apply access control policies.**

**Answer: C,E**

#### **NEW QUESTION # 365**

While integrating Cisco Umbrella with Cisco Threat Response, a network security engineer wants to automatically push blocking of domains from the Cisco Threat Response interface to Cisco Umbrella. Which API meets this requirement?

- A. REST
- B. investigate
- **C. enforcement**
- D. reporting

**Answer: C**

Explanation:

The Umbrella Enforcement API is a feature that allows for automated addition of new domains to a security enforcement list.

#### **NEW QUESTION # 366**

.....

You may have been learning and trying to get the 300-710 certification hard, and good result is naturally become our evaluation to one of the important indices for one level. You need to use our 300-710 exam questions to testify the knowledge so that you can get the 300-710 Test Prep to obtain the qualification certificate to show your all aspects of the comprehensive abilities, and the 300-710

exam guide can help you in a very short period of time to prove yourself perfectly and efficiently.
