### NEW QUESTION # 144

A survey is sent to a customer via email.

Who do you configure a solution to ensure the email includes the case ID for the survey?

- A. Call a data transform to copy the case ID from pyWorkPage to the email.

- B. Create a process using the Send email step allowing representatives to quickly add the case ID to the email.
- **C. Use the Insert Property feature of a Send email step to add the case ID when composing the custom message.**
- D. Create a required field for the case ID that must be entered by a user during the case process prior to sending the email.

**Answer: C**

Explanation:

The Insert Property feature in the Send email step allows you to include dynamic data, such as the case ID, directly into the email body. This ensures that the case ID is automatically included in the email without requiring manual entry or additional processes. By configuring the Send email step to use the Insert Property feature, you can ensure that the case ID is included in the survey email sent to the customer.

Reference: Pega Academy - Sending emails from a case: The Send email step allows you to configure and send emails from within a case, with options to include case properties dynamically using the Insert Property feature.
