With high-quality AZ-500 Guide materials and flexible choices of learning mode, they would bring about the convenience and easiness for you. Every page is carefully arranged by our experts with clear layout and helpful knowledge to remember.

Microsoft Azure Security Technologies Sample Questions (Q341-Q346):

NEW QUESTION # 341
You have an Azure subscription named Sub1 that contains the virtual machines shown in the following table.
You need to ensure that the virtual machines in RG1 have the Remote Desktop port closed until an authorized user requests access.
What should you configure?

- A. an application security group

- B. just in time (JIT) VM access
- C. Azure Active Directory (Azure AD) Privileged Identity Management (PIM)
- D. Azure Active Directory (Azure AD) conditional access

Answer: B

Explanation:
Explanation
Just-in-time (JIT) virtual machine (VM) access can be used to lock down inbound traffic to your Azure VMs, reducing exposure to attacks while providing easy access to connect to VMs when needed.
Note: When just-in-time is enabled, Security Center locks down inbound traffic to your Azure VMs by creating an NSG rule. You select the ports on the VM to which inbound traffic will be locked down. These ports are controlled by the just-in-time solution.
When a user requests access to a VM, Security Center checks that the user has Role-Based Access Control (RBAC) permissions that permit them to successfully request access to a VM. If the request is approved, Security Center automatically configures the Network Security Groups (NSGs) and Azure Firewall to allow inbound traffic to the selected ports and requested source IP addresses or ranges, for the amount of time that was specified. After the time has expired, Security Center restores the NSGs to their previous states. Those connections that are already established are not being interrupted, however.

NEW QUESTION # 342
You have an Azure AD Tenant and an application named App1.
You need to ensure that App1 can use Microsoft Entra Verified ID to verify credentials.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

NEW QUESTION # 343
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
You have a hybrid configuration of Azure Active Directory (AzureAD).
You have an Azure HDInsight cluster on a virtual network.
You plan to allow users to authenticate to the cluster by using their on-premises Active Directory credentials.
You need to configure the environment to support the planned authentication.
Solution: You create a site-to-site VPN between the virtual network and the on-premises network.
Does this meet the goal?

- A. No
- B. Yes

Answer: B

Explanation:
You can connect HDInsight to your on-premises network by using Azure Virtual Networks and a VPN gateway.
Note: To allow HDInsight and resources in the joined network to communicate by name, you must perform the following actions:
* Create Azure Virtual Network.
* Create a custom DNS server in the Azure Virtual Network.
* Configure the virtual network to use the custom DNS server instead of the default Azure Recursive Resolver.

* Configure forwarding between the custom DNS server and your on-premises DNS server.

NEW QUESTION # 344

You have an Azure subscription. The subscription contains Azure virtual machines that run Windows Server 2016.
You need to implement a policy to ensure that each virtual machine has a custom antimalware virtual machine extension installed.
How should you complete the policy? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

NEW QUESTION # 345

You have an Azure subscription that contains the following Azure firewall:
* Name: Fw1
* Azure region: UK West
* Private IP address: 10.1.3.4
* Public IP address: 23.236.62.147
The subscription contains. The virtual networks shown in the following table.
□
The subscription contains the subnets shown in the following table.
□
The subscription contains the routes shown in the following table.
□
For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.
□

Answer:

Explanation:
□

NEW QUESTION # 346

......

To save you from loss of money and time, TestKingFree is offering a product that is specially designed to help you pass the Microsoft Azure Security Technologies (AZ-500) exam on the first try. The Microsoft AZ-500 Exam Dumps is easy to use and very easy to understand, ensuring that it is student-oriented. You can choose from 3 different formats available according to your needs. The 3 formats are desktop AZ-500 Practice Test software, web-based Microsoft Azure Security Technologies (AZ-500) practice exam, and AZ-500 dumps PDF format.
