問題 #211

Which of the following candlestick formations is a continuation pattern?

- A. Hammer
- B. Doji
- C. Tweezers
- **D. Windows**

答案：D

解題說明：

Detailed Explanation:

A Window (the Japanese term for a Gap) is the major continuation pattern in candlestick analysis. The market is expected to "Go with the Window."

問題 #212

According to Russell, the major bull market ends when the yields for major Dow Jones Industrials reach:
166

- A. <2.0170
- **B. 3.5167**
- C. 5.0168
- D. 7.5169

答案：B

解題說明：

Detailed Explanation:

Richard Russell (writer of Dow Theory Letters) observed historical valuation metrics. He noted that major bull markets often top out when stock valuations become extreme, which corresponds to dividend yields falling to very low levels, historically around 3.5% (or roughly 3%). Note: In modern times yields are lower, but this refers to the historical Russell rule.

問題 #213

Manuel Luscher, CMT, is meeting with a potential client. Luscher tells the potential client that "My biggest client, Tom Cardazo, is a good friend of yours and has been very happy with his compound annual return of over 10%." Luscher also tells the potential client that "I will make sure that your transactions are completed before trading for my family's accounts." With respect to the MTA Code of Ethics, Luscher's actions are:

- A. Not in violation of the Code
- **B. In violation of the Code with respect to disclosing client information, but not with respect to the priority of transactions**
- C. In violation of the Code with respect to both disclosing client information and the priority of transactions
- D. In violation of the Code with respect to the priority of transactions, but not with respect to disclosing client information

答案：B

解題說明：

Detailed Explanation:

* Client Info: Luscher violated confidentiality by revealing the name of a client (Tom Cardazo) and his returns without permission.

* Priority: Stating that client transactions come before family accounts is actually consistent with the Code (Priority of Transactions).

Clients come first. Therefore, he is only in violation regarding the client information disclosure9999.

問題 #214

Which of the following is most likely to be considered a "material" piece of information regarding a company?

- A. A former board member predicting a long-term decline in the company's stock
- B. A competitor CEO's speculation of a pending management change at the company
- C. The loss of a customer representing a negligible portion of a company's gross sales
- **D. The loss of a customer representing a significant portion of a company's gross sales**

答案： D

解題說明：

Detailed Explanation:

Information is material if its disclosure would likely affect the price of the security or if a reasonable investor would want to know it before making an investment decision. The loss of a customer representing a significant portion of sales would clearly impact earnings and the stock price.

問題 #215

Venus saw the chart of Xeta technologies. The stock was between 25 and 32 for a period of six months. She drew two horizontal lines at these two levels. Today, the stock is trading at 35. The horizontal line at 32 represents _____ for the stock.

- A. Resistance
- B. Either resistance or support
- **C. Support**
- D. It cannot be correctly decided unless the further move of the stock is watched

答案： C

解題說明：

Detailed Explanation:

This illustrates the principle of Polarity. The level at 32 was previously Resistance (the top of the range).

Since the price has broken out above it (trading at 35), that old resistance level now converts into a Support level for any future pullbacks.
