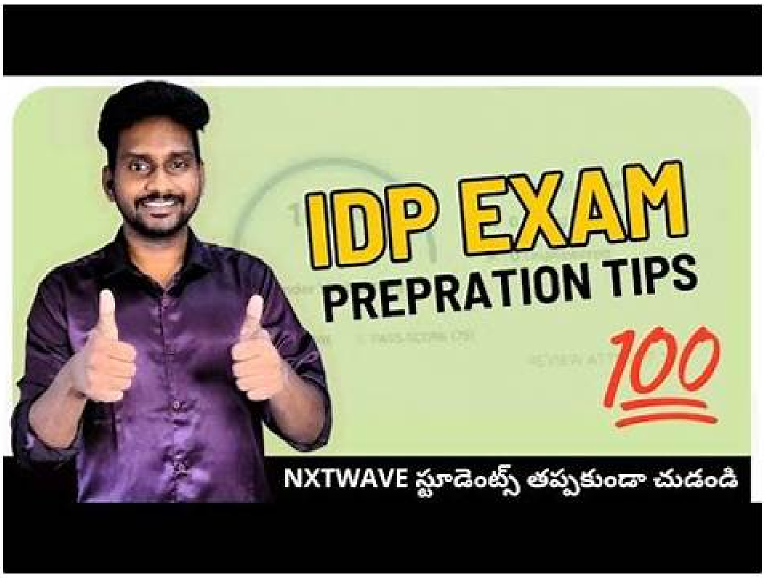
IDP Examinations Actual Questions - IDP Authorized Certification



Our IDP exam torrent is compiled by experts and approved by experienced professionals and updated according to the development situation in the theory and the practice. Our CrowdStrike Certified Identity Specialist(CCIS) Exam guide torrent can simulate the exam and boosts the timing function. The language is easy to be understood and makes the learners have no learning obstacles. So our IDP Exam Torrent can help you pass the exam with high possibility.

CrowdStrike IDP Exam Syllabus Topics:

Topic	Details
Topic 1	• Multifactor Authentication (MFA) and Identity-as-a-service (IDaaS) Configuration Basics: Focuses on accessing and configuring MFA and IDaaS connectors, configuration fields, and enabling third-party MFA integration.
Topic 2	• Falcon Fusion SOAR for Identity Protection: Explores SOAR workflow automation including triggers, conditions, actions, creating custom • templated • scheduled workflows, branching logic, and loops.
Topic 3	• GraphQL API: Covers Identity API documentation, creating API keys, permission levels, pivoting from Threat Hunter to GraphQL, and building queries.
Topic 4	• Domain Security Assessment: Focuses on domain risk scores, trends, matrices, severity • likelihood • consequence factors, risk prioritization, score reduction, and configuring security goals and scopes.
Topic 5	• Identity Protection Tenets: Examines Falcon Identity Protection's architecture, domain traffic inspection, EDR complementation, human vulnerability protection, log-free detections, and identity-based attack mitigation.
Topic 6	• Threat Hunting and Investigation: Focuses on identity-based detections and incidents, investigation pivots, incident trees, detection evolution, filtering, managing exclusions and exceptions, and risk types.
Topic 7	• Risk Assessment: Covers entity risk categorization, risk and event analysis dashboards, filtering, user risk reduction, custom insights versus reports, and export scheduling.

IDP Authorized Certification | Latest IDP Exam Cost

In this social-cultural environment, the IDP certificates mean a lot especially for exam candidates like you. To some extent, these certificates may determine your future. With respect to your worries about the IDP practice exam, we recommend our IDP preparation materials which have a strong bearing on the outcomes dramatically. Our IDP Preparation materials are products full of advantages. And our IDP exam simulation has quick acquisition. What is more, our IDP study guide offers free updates for one year and owns increasing supporters.

CrowdStrike Certified Identity Specialist(CCIS) Exam Sample Questions (Q12-Q17):

NEW QUESTION # 12
How does CrowdStrike Falcon Identity Protection help customers identify different types of accounts in their domain?

- A. Analyzes authentication traffic and automatically classifies programmatic and human accounts
- B. Conducts regular vulnerability assessments on programmatic accounts
- C. Implements advanced encryption algorithms for account metadata
- D. Assigns a human authorizer to each programmatic account for approval

Answer: A

Explanation:
Falcon Identity Protection automatically differentiateshuman and programmatic accountsby analyzing authentication traffic patterns. According to the CCIS curriculum, the platform uses behavioral analytics to observe how accounts authenticate, including frequency, protocol usage, timing, and access patterns.
Human users typically authenticate interactively and exhibit variable behavior, while programmatic or service accounts authenticate predictably and non-interactively. Falcon leverages these differences to automatically classify account types without requiring manual tagging or administrative input.
This classification is critical for accurate risk scoring, privilege analysis, and detection logic. Programmatic accounts often carry elevated privileges and long-lived credentials, making them attractive targets for attackers. Automatically identifying them allows Falcon to apply appropriate risk models and detections.
Because Falcon usesauthentication traffic analysisto classify account types,Option Cis the correct and verified answer.

NEW QUESTION # 13
Falcon Identity Protection can continuously assess identity events and associate them with potential threats WITHOUTwhich of the following?

- A. Ingesting logs
- B. API-based connectors
- C. Machine-learning-powered detection rules
- D. The need for string-based queries

Answer: D

Explanation:
Falcon Identity Protection is architected as alog-free identity security platform, a core tenet emphasized throughout the CCIS curriculum. Unlike traditional SIEM- or log-based solutions, Falcon Identity Protection doesnot require string-based queriesto continuously assess identity events or associate them with threats.
Instead, the platform relies onmachine-learning-powered detection rules,real-time authentication traffic inspection, andAPI-based connectorsto collect and analyze identity telemetry directly from domain controllers and identity providers. This approach eliminates the operational complexity of building, tuning, and maintaining query logic.
String-based queries are commonly associated with legacy log aggregation tools and SIEM platforms, where analysts must manually search logs to identify suspicious behavior. Falcon Identity Protection replaces this model withbehavioral baselining and automated correlation, enabling continuous identity risk assessment without human-driven query execution.
Because Falcon does not require string-based queries to operate,Option Dis the correct and verified answer.

NEW QUESTION # 14

Which of the following IDaaS connectors will allow Identity to ingest cloud activity along with applying SSO Policy?

- A. SAML
- B. Okta SSO
- C. ADFS
- D. Azure NPS

Answer: B

Explanation:
Falcon Identity Protection integrates withIdentity-as-a-Service (IDaaS)providers to ingest cloud authentication activity and enforce identity-based policies. According to the CCIS curriculum,Okta SSOis a supported IDaaS connector that enables Falcon to ingestcloud authentication eventswhile also applying Single Sign-On (SSO) policies.
Okta SSO provides rich identity telemetry, including login attempts, device context, and authentication outcomes. This data allows Falcon Identity Protection to correlate on-premises and cloud-based identity activity, extending identity risk analysis beyond Active Directory.
The other options are incorrect:
* ADFSis an on-premises federation service, not a cloud IDaaS.
* Azure NPSis used for RADIUS-based MFA, not SSO ingestion.
* SAMLis a protocol, not an IDaaS connector.
Because Okta SSO provides both cloud activity ingestion and SSO enforcement,Option Bis the correct and verified answer.

NEW QUESTION # 15

In the Predefined ReportsSubjectdropdown, which category is associated with endpoints?

- A. Insights
- B. Incidents
- C. Accounts
- D. Events

Answer: D

Explanation:
Within Falcon Identity Protection,Predefined Reportsallow administrators to generate standardized reports based on specific data subjects. TheSubject dropdowndetermines the type of data the report will be built from, such as identity risks, authentication activity, or endpoint-related telemetry.
The category associated withendpointsin the Subject dropdown isEvents. Endpoint-related data-such as authentication attempts, logons, protocol usage, and domain controller-observed activity-is captured and represented aseventswithin Falcon. These events form the foundational telemetry used for identity detections, investigations, and reporting.
By contrast:
* Insightsrepresent aggregated analytical findings derived from events.
* Incidentsgroup multiple detections into a single investigative narrative.
* Accountsfocus on identity entities such as users and service accounts.
Endpoint visibility in reporting is therefore tied directly toEvents, as events reflect the raw and enriched activity observed on endpoints and domain controllers. This structure aligns with Falcon's identity-first security model, where endpoint-observed authentication behavior feeds identity risk scoring and Zero Trust decisions.
The CCIS curriculum explicitly associatesendpoint-related reportingwith theEventssubject, makingOption Bthe correct and verified answer.

NEW QUESTION # 16

Which of the following areNOTincluded within the three-dot menu on Identity-based Detections?

Which of the following are not included within the three-dot menu on Identity-based Detections?

- A. Edit status
- B. Add to Watchlist
- C. Add comment
- D. Add exclusion

Answer: B

Explanation:
In Falcon Identity Protection, thethree-dot (#) action menuon anidentity-based detectionprovides analysts with a limited set of actions that applydirectly to the detection itself. According to the CCIS curriculum, these actions are designed to support investigation workflow, tuning, and documentation.
The supported actions in the detection-level three-dot menu include:
* Edit status, which allows analysts to update the detection state (for example, New, In Progress, or Closed).
* Add comment, which enables collaboration and documentation directly on the detection.
* Add exclusion, where supported, to suppress future detections that match known benign behavior.
Add to Watchlistisnot includedin this menu because watchlists are applied toentities(such as users, service accounts, or endpoints), not to detections. Watchlists are managed from entity views or investigation workflows and are used to increase visibility and monitoring priority for specific identities-not to act on individual detections.
This distinction is emphasized in CCIS training to reinforce the separation betweenentity-centric actionsand detection-centric actions. Because watchlists operate at the entity level,Option Bis the correct and verified answer.

NEW QUESTION # 17
......

The language which is easy to be understood and simple, IDP exam questions are suitable for any learners no matter he or she is a student or the person who have worked for many years with profound experiences. So it is convenient for the learners to master the IDP Guide Torrent and pass the exam in a short time. The amount of the examinee is large. For the office workers, they are both busy in their job and their family life; for the students, they possibly have to learn or do other things.
