Microsoft Power Platform Functional Consultant Sample Questions (Q173-Q178):

NEW QUESTION # 173

A company plans to create a Power Virtual Agents chatbot.

The bot has the following requirements:

- * Prompt for a location of the customer and the call must be routed to a support agent for the location.
- * Transfer support calls at each location to a support bot that uses the Bot Framework.

You need to configure the bot.

Which components should you use? To answer, drag the appropriate components to the correct requirements. Each component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct select is worth one point.

Answer:

Explanation:

NEW QUESTION # 174

You are creating a canvas app.

A user will click a button on each screen of a Power Apps app to proceed to the next screen.

You need to implement an action that selects the next screen that the user sees.

Which event should you handle?

- A. OnSelect
- B. OnLoad
- C. OnCheck
- D. ScreenTransition

Answer: A

Explanation:

Add navigation

1. With the Source screen selected, open the Insert tab, select Icons, and then select Next arrow.
2. With the arrow still selected, select the Action tab, and then select Navigate.
3. The OnSelect property for the arrow is automatically set to a Navigate function.

4. When a user selects the arrow, the Target screen fades in.
5. On the Target screen, add a Back arrow, and set its OnSelect property to this formula:
6. Navigate(Source, ScreenTransition.Fade)
7. While holding down the Alt key, toggle between screens by selecting the arrow on each screen.

NEW QUESTION # 175

A company is developing several Power Virtual Agents chatbots. The company manufactures more than 1,000 different products.

The chatbots must prompt users to enter or select a product.

You need to store the model information so that it can be reused across all chatbots.

Where should you store the model data?

- A. Topics
- **B. Custom entities**
- C. Global variables
- D. Multiple choice options

Answer: B

Explanation:

Global Variables or Bot Variables can only work across topics, not across chatbots.

<https://docs.microsoft.com/en-us/power-virtual-agents/authoring-variables-bot>

NEW QUESTION # 176

You need to design the guest check-in solution.

Which technologies should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Requirement	Technology
Develop the base check-in solution.	Xamarin app Power Apps portal Model-driven app Canvas app
Access the check-in solution on the check-in devices.	Traditional desktop application Web browser Power Apps mobile app Dynamics 365 for phones and tablets
Access the check-in solution on the check-in devices.	

Answer:

Explanation:

Requirement	Technology
Develop the base check-in solution.	Xamarin app Power Apps portal Model-driven app Canvas app
Access the check-in solution on the check-in devices.	Traditional desktop application Web browser Power Apps mobile app Dynamics 365 for phones and tablets
Access the check-in solution on the check-in devices.	

Explanation

Canvas app,

Power Apps mobile app

NEW QUESTION # 177

A company is implementing Power Apps and Power Automate.

Several components are created within Power Apps, Microsoft Dataverse, and Power Automate. These components must be promoted from the development environment to the user acceptance test environment in a single solution package.

You need to create the solution package for promotion.

Where should you create the package?

- A. Office 365 admin center
- B. Power Apps designer
- C. Microsoft Power Platform admin center
- **D. Azure portal**
- E. Azure DevOps

Answer: D

Explanation:

A solution package is a bundle of components, such as Power Apps, Power Automate, and Microsoft Dataverse, that can be promoted from one environment to another. To create the solution package for promotion in a company that is implementing Power Apps and Power Automate, the package should be created in the Microsoft Power Platform admin center.

In the Power Platform admin center, you can create a solution package that includes the necessary components and export it as a .zip file. This file can then be imported into the desired environment, such as the user acceptance test environment, to promote the components.
