

SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing sure pass guide & C_TS422_2023 pdf study torrent

What's more, part of that VCE4Dumps C_TS422_2023 dumps now are free: <https://drive.google.com/open?id=1m-DxmVO4i0LhogUME3ZlhCgsM9nD8gis>

These latest SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing (C_TS422_2023) Questions were made by VCE4Dumps professionals after working day and night so that users can prepare for the SAP C_TS422_2023 exam successfully. VCE4Dumps even guarantees you that you can pass the SAP C_TS422_2023 Certification test on the first try with your untiring efforts.

In the process of using the SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing study training dumps, once users have any questions about our study materials, the user can directly by E-mail us, our products have a dedicated customer service staff to answer for the user, they are 24 hours service for you, we are very welcome to contact us by E-mail and put forward valuable opinion for us. Our C_TS422_2023 latest questions already have many different kinds of learning materials, users may be confused about the choice, what is the most suitable C_TS422_2023 Test Guide? Believe that users will get the most satisfactory answer after consultation. Our online service staff is professionally trained, and users' needs about C_TS422_2023 test guide can be clearly understood by them. The most complete online service of our company will be answered by you, whether it is before the product purchase or the product installation process, or after using the C_TS422_2023 latest questions, no matter what problem the user has encountered.

Free PDF Quiz SAP - C_TS422_2023 Pass-Sure Latest Braindumps

The VCE4Dumps is currently in use by a lot of students and they have rated it as one of the best study materials for the preparation of SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing (C_TS422_2023) test. The customers are satisfied because the VCE4Dumps comes with free demos and up to 1 year of free updates. We have a 24/7 support team which means the user can get help anytime if they face any problem. Our support team will always help the customers whenever they face issues. Customers can start using the SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing

(C_TS422_2023) instantly after purchasing it from us. Buy It Now and Take The First Step Towards Success!

SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing Sample Questions (Q40-Q45):

NEW QUESTION # 40

What are the key features of using a low-level code? Note: There are 2 correct answers to this question.

- A. To determine how costs are rolled up by product costing
- B. To determine the sequence in which materials are planned in MRP
- C. To determine the priority of alternative components inside ATP
- D. To determine the use of sub-items inside material BOM (bill of material)

Answer: A,B

Explanation:

The low-level code in SAP S/4HANA (visible in MD04 or calculated during MRP) indicates the deepest level at which a material appears in any BOM across all products, starting from 000 (finished goods) downward. Its key features are:

* To determine how costs are rolled up by product costing (B): In Product Costing (CO-PC), the low-level code ensures costs are calculated bottom-up, starting with the lowest-level components (e.g., raw materials) and rolling up through assemblies to the finished product (transaction CK11N). This guarantees accurate cost aggregation.

* To determine the sequence in which materials are planned in MRP (C): During MRP (MD01/MD02), the system plans materials in ascending order of low-level codes (lowest first), ensuring dependent requirements for lower-level components are calculated before higher-level assemblies, avoiding planning gaps.

Priority of alternative components in ATP (A) is managed by BOM alternative item strategies (e.g., 100% check), not low-level codes. Use of sub-items in BOM (D) is defined by item categories (e.g., "R"), not influenced by low-level codes. This is per SAP's planning and costing logic.

NEW QUESTION # 41

Which of the following automation options can you use for production orders? Note: There are 2 correct answers to this question?

- A. You can use the production scheduling profile to automatically set orders to technically complete
- B. You can use mass processing to read PP master data for production orders
- C. You can use trigger points to automatically create rework orders via confirmation.
- D. You can use mass processing to set production orders to technically complete

Answer: C,D

Explanation:

You can use mass processing to set production orders to technically complete. Mass processing allows you to perform the same action for multiple production orders at once, such as changing the status, printing, or confirming. You can use the Set to Technically Complete action to close the production orders that are finished and do not require any further processing. This action updates the order status to TECO and prevents any further changes to the order.

You can use trigger points to automatically create rework orders via confirmation. Trigger points are predefined events that occur during the execution of a production order, such as reaching a certain operation or quantity. You can assign actions to trigger points, such as creating a notification, a rework order, or a quality inspection. For example, you can use a trigger point to automatically create a rework order for defective goods when you confirm an operation. The rework order is linked to the original order and inherits the relevant data from it.

NEW QUESTION # 42

What is the purpose of a reporting point confirmation in repetitive manufacturing?

Note: There are 2 correct answers to this question?

- A. To reduce the total production lead time for a long production line
- B. To determine the work in progress along the production line
- C. To provide timely updates of inventory management for the staged components
- D. To stage different components for a production line simultaneously

Answer: B,C

Explanation:

A reporting point confirmation is a function that allows you to backflush the material components and activities that have been consumed and performed at a specific operation in a repetitive manufacturing process. It also reduces the dependent requirements for the planned orders. You can use reporting point confirmation for the following purposes:

To determine the work in progress (WIP) along the production line, by posting the quantity that is on the production line at each reporting point. This helps you to calculate the volume and value of unfinished products.

To provide timely updates of inventory management for the staged components, by recording the withdrawal of components at a time that is close to the time of the operation in which they are used. This helps you to avoid discrepancies between the actual and planned consumption of materials. Reference: Reporting Point Confirmation, Repetitive Manufacturing Confirmation

NEW QUESTION # 43

What data can you maintain in the subitems of a bill of material (BOM)?

Note: There are 2 correct answers to this question.

- A. Quantity
- B. Installation point
- C. Scrap percentage
- D. Status

Answer: A,B

NEW QUESTION # 44

How can you set up the supply source for the Kanban process in SAP S/4HANA Cloud Private Edition? Note: There are 3 correct answers to this question.

- A. Use run schedule quantities for inhouse production.
- B. Use stock transfer reservations for stock transfer.
- C. Use purchasing costs for automated source prioritization.
- D. Use quotations for internal external procurement.
- E. Use purchase orders for external procurement.

Answer: A,B,E

NEW QUESTION # 45

.....

This will help them polish their skills and clear all their doubts. Also, you must note down your SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing (C_TS422_2023) practice test score every time you try the SAP Exam Questions. It will help you keep a record of your study and how well you are doing in them. VCE4Dumps hires the top industry experts to draft the SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing (C_TS422_2023) exam dumps and help the candidates to clear their SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing (C_TS422_2023) exam easily. VCE4Dumps plays a vital role in their journey to get the C_TS422_2023 certification.

Certification C_TS422_2023 Test Answers: https://www.vce4dumps.com/C_TS422_2023-valid-torrent.html

Questions and answers are available to download immediately after you purchased our C_TS422_2023 dumps pdf. Any questions or concerns can be directed to the VCE4Dumps Certification C_TS422_2023 Test Answers support team, who are available 24/7. The experts make efforts day and night to update the C_TS422_2023 latest training material with the first-hand information and latest news, you do not worry about the authority and accuracy of our SAP Certified Application Specialist C_TS422_2023 latest study torrent. Question: I tried several time on live chat but I VCE4Dumps Certification C_TS422_2023 Test Answers did not picked my call, why?

So you must act from now, On the left side of the Settings screen, select the Cellular Data option, Questions and answers are available to download immediately after you purchased our C_TS422_2023 Dumps PDF.

SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing actual questions - C_TS422_2023 torrent pdf - SAP S/4HANA Cloud Private Edition - Production Planning and Manufacturing training vce

Any questions or concerns can be directed to the VCE4Dumps support team, who are available 24/7. The experts make efforts day and night to update the C_TS422_2023 latest training material with the first-hand information and latest news, you do not worry about the authority and accuracy of our SAP Certified Application Specialist C_TS422_2023 latest study torrent.

Question: I tried several time on live chat but I VCE4Dumps C_TS422_2023 did not picked my call, why, There are a lot of experts and professors in or company in the field.
