These Scrum SAFe-Practitioner exam practice tests identify your mistakes and generate your result report on the spot.

### Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q247-Q252):

#### NEW QUESTION # 247

In which backlog are features identified, prioritized, estimated and Maintained?

- A. Solution backlog
- B. Team backlog
- C. Program backlog
- D. Portfolio backlog

**Answer: C**

#### NEW QUESTION # 248

What is one issue when organizing around functional silos?

- A. They do not provide development opportunities for employees
- B. They impede how value flows
- C. Corporate responsibilities are not a focus
- D. Operational activities are not included

**Answer: B**

Explanation:

One issue when organizing around functional silos is that they impede how value flows from concept to delivery. Functional silos create barriers and delays between different teams and departments, which can result in waste, rework, handoffs, and misalignment. To achieve business agility, enterprises need to organize around value streams, which are the primary constructs for understanding, organizing, and delivering value in SAFe. Value streams are long-lived series of steps that deliver value to the customer or end user. By organizing around value streams, enterprises can optimize the flow of value across functional boundaries, reduce lead time, and increase customer satisfaction. #### NEW QUESTION # 249

What best describes the process of the confidence vote?

- A. The teams and the ARTs vote
- B. Business Owners vote
- C. The managers vote
- D. Each person votes

**Answer: D**

Explanation:

The confidence vote is a measure of the teams' and ARTs' belief in their ability to deliver the established PI objectives. It is conducted at the end of the PI planning event, after the teams have presented their plans and identified the risks. Each person votes using their fingers (fist of five) or a digital tool for remote events. The scale is as follows:

- \* 5: I am confident we can meet or exceed our objectives
- \* 4: I am confident we can meet our objectives

- \* 3: I think we can meet our objectives, but I have some concerns
- \* 2: I doubt we can meet our objectives, and I have major concerns
- \* 1: I am sure we cannot meet our objectives

The purpose of the confidence vote is to surface any issues or impediments that might prevent the teams from achieving their goals. It also helps to align the expectations of the stakeholders and the teams. If the average vote is below 3, the teams and the ARTs need to revisit their plans and address the root causes of the low confidence. The confidence vote is repeated until the average vote is 3 or higher, or until the timebox expires. #### NEW QUESTION # 250

Who fosters team adoption of Agile technical practices?

- A. System Architect
- **B. Scrum Master**
- C. Technical Lead
- D. Lead developer

**Answer: B**

#### NEW QUESTION # 251

What are the SAFe Core Values?

- A. Code Quality, Fast Feedback, Alignment, Trust
- B. People and Culture, Transparency, Collaboration, Responding to Change
- C. Commitment, Competency, Collocation, Culture
- **D. Built-in Quality, Program Execution, Alignment, Transparency**

**Answer: D**

Explanation:

= The four core values of SAFe are alignment, built-in quality, transparency, and program execution. They represent the fundamental beliefs that are key to SAFe's effectiveness and guide the behaviors and actions of everyone participating in a SAFe portfolio. Alignment ensures that everyone is working toward a common direction and strategy. Built-in quality ensures that every element of the solution meets the appropriate quality standards. Transparency fosters trust and collaboration among all stakeholders and enables fast and effective decision making. Program execution ensures that the value is delivered to the customers in the shortest sustainable lead time. References: = Core Values - Scaled Agile Framework, Scaled Agile Framework:
