NCP-DB-6.10 exam torrent & NCP-DB-6.10 reliable study vce & NCP-DB-6.10 test dumps

We sincerely suggest you to try these demos of our NCP-DB-6.10 study guide and make a well-content choice. Different demos have different functions and each version has its advantages during the process of learning. Our NCP-DB-6.10 Preparation exam is suitable for various consumer groups in the world we assure that after having a knowledge of those demos, you can purchase the most suitable NCP-DB-6.10 exam materials.

According to the research of the past exams and answers, PrepAwayExam provide you the latest Nutanix NCP-DB-6.10 exercises and answers, which have have a very close similarity with real exam. PrepAwayExam can promise that you can 100% pass your first time to attend Nutanix Certification NCP-DB-6.10 Exam.

NCP-DB-6.10 Clearer Explanation, NCP-DB-6.10 Reliable Dumps Book

Are you satisfied with your present job? Are you satisfied with what you are doing? Do you want to improve yourself? To master some useful skills is helpful to you. Now that you choose to work in the IT industry, you must register IT certification test and get the IT certificate which will help you to upgrade yourself. What's more important, you can prove that you have mastered greater skills.

And then, to take Nutanix NCP-DB-6.10 Exam can help you to express your desire. Don't worry. PrepAwayExam will help you to find what you need in the exam and our dumps must help you to obtain NCP-DB-6.10 certificate.

Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 Sample Questions (Q245-Q250):

NEW QUESTION # 245
An administrator is interested in using profiles to simplify the database provisioning process. The profile needs to include information related to the SQL service startup account, and the NDB worker service account.
Which profile would help the administrator accomplish this task?

- A. Windows Domain
- B. Database Parameter
- C. Software
- D. Network

Answer: A

Explanation:
The correct answer is A because the Windows Domain profile is the profile that includes information related to the SQL service startup account and the NDB worker service account. A Windows Domain profile is a collection of settings that define how NDB manages Windows-based database servers and databases. It contains the following information:
The domain name and credentials to join the database server VMs to the domain The SQL service startup account and password to run the SQL Server service on the database server VMs The NDB worker service account and password to run the NDB Database Agent service on the database server VMs The SQL Server authentication mode to use for the databases By using a Windows Domain profile, the administrator can simplify the database provisioning process by applying the same settings to multiple database server VMs and databases, without having to manually enter them each time. The other options are not correct because they describe different types of profiles that do not include information related to the SQL service startup account and the NDB worker service account.

NEW QUESTION # 246
A database administrator wants to clone an SQL database that has Transparent Data Encryption (TDE) enabled.
Which two steps must be taken on the target server for this clone to be successful? (Choose two.)

- A. Backup the .cer and .pvk files from the source database server VM.
- B. Backup the keystore bundle file from the source database server VM.
- C. Run the pre-clone command script.
- D. Run the post-clone command script.

Answer: B,D

Explanation:
When cloning an SQL database with Transparent Data Encryption (TDE) enabled in NDB, the target server must handle the encryption keys to ensure the cloned database remains functional and secure. TDE uses a keystore (e.g., a bundle file containing the master key and certificate) to encrypt data. Two steps are required: (1) The administrator must back up the keystore bundle file from the source database server VM and transfer it to the target server, ensuring the clone can decrypt the data. (2) After the clone is created, the administrator must run the post-clone command script, which configures the TDE keys on the target server, completes the encryption setup, and activates the cloned database.

NEW QUESTION # 247
How should an administrator create a database clone using the Era IJI?

- A. Select Database Server VMs, select a database server VM and then choose Create Clone.
- B. Select Databases, Sources, select a source database and then choose Create Clone.
- C. Select Time Machines, select e source database end then choose Create Clone.
- D. Select Databases, Clones, Create Clone.

Answer: C

Explanation:
In Nutanix Database Automation (NCP-DB), the Time Machine feature is used for protecting databases and creating database clones. To create a database clone using the Era Interface, an administrator should select Time Machines, select a source database, and then choose Create Clone. This process allows the administrator to create a copy of the source database at a specific point in time.

NEW QUESTION # 248
An administrator has received a request to clone a source production database to an existing development server.
Which two actions must be taken to complete this task?

- A. The development server must be authorized for the database Time Machine.
- B. The development server must be registered by Era and authorized to host clones from the Time Machine.
- C. The development server must be registered by Era in order to receive the clone.
- D. The development server must have the IP and credentials provided during cloning.

Answer: C,D

Explanation:
According to the Nutanix Database Automation (NCP-DB) Learning documents, to clone a source production database to an existing development server, the following actions must be taken:
A). The development server must be registered by Era in order to receive the clone. This is because Nutanix Era is a database management tool that manages the lifecycle of databases and their copies. Registering the development server with Era allows it to manage the database on that server.
D). The development server must have the IP and credentials provided during cloning. This is necessary for Era to access the development server and perform the cloning operation. The IP address and credentials are used to establish a connection to the development server. Without these details, Era would not be able to access the server and perform the cloning operation.

NEW QUESTION # 249
When doing an Era software upgrade for a Multi-Cluster enabled installation, which component is upgraded first?

- A. Era Cluster Agent
- B. Era Date Warehouse
- C. Era Sewer
- D. Database Server Agent

Answer: A

Explanation:
According to the Nutanix Database Automation (NCP-DB) learning documents, when doing an Era software upgrade for a Multi-Cluster enabled installation, the Era Cluster Agent is upgraded first. This is the first component in a Nutanix Environment Upgrade cycle. The Era Cluster Agent is crucial for managing and monitoring the health of the Nutanix clusters. Please refer to the official Nutanix documentation and training materials for more detailed information.

NEW QUESTION # 250
......

The compiler, however, has no way of knowing the difference between an NCP-DB-6.10 initialized and an uninitialized mutex, so it will not give any warnings, Write smarter programs by creating your own programming blocks.

Excellent NCP-DB-6.10 Valid Study Plan bring you Complete NCP-DB-6.10 Clearer Explanation for Nutanix Nutanix Certified Professional - Database Automation (NCP-DB) v6.10

The answer is to study with the guidance of our NCP-DB-6.10 Quiz torrent, In order to provide the most effective study materials which cover all of the new information about NCP-DB-6.10 test torrent for our customers, our first-class experts always pay close attention to the changes in the exam, Online NCP-DB-6.10 Lab Simulation and will compile all of the new key points as well as the latest types of exam questions into the new version of our Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 torrent dumps.

In a word, your satisfaction and demands of the NCP-DB-6.10 exam braindump is our long lasting pursuit, It can guarantee you 100% pass the exam, If you want to prepare for your exam by the computer, you can buy our NCP-DB-6.10 training quiz, because our products can work well by the computer.
