우리 Itexamdump에서는 여러분을 위하여 정확하고 우수한 서비스를 제공하였습니다. 여러분의 고민도 덜어드릴 수 있습니다. 빨리 성공하고 빨리Salesforce MCE-Dev-201인증시험을 패스하고 싶으시다면 우리 Itexamdump를 장바구니에 넣으시죠 . Itexamdump는 여러분의 아주 좋은 합습가이드가 될것입니다. Itexamdump로 여러분은 같고 싶은 인

증서를 빠른 시일내에 얻게될것입니다.

최신 Salesforce Developers MCE-Dev-201 무료샘플문제 (Q90-Q95):

질문 # 90

A developer wants a link to be dynamic based on subscriber attributes. Rather than create numerous links, the developer uses AMPscript to set the link's value as a variable. The variable will be used within the <a> tag.

What should the developer do within the <a> tag to ensure clicks are tracked for the variable? Choose 2

- A. Wrap the variable in a v function
- B. Wrap the variable in a RedirectTo function
- C. Ensure the Conversion attribute is 'true'
- D. Include a variable for the Alias attribute

정답: B,D

설명:

To ensure that clicks are tracked for a dynamic link created using AMPscript, the developer should wrap the link variable in a RedirectTo function and include an alias attribute for tracking purposes.

* RedirectTo Function: This function helps ensure that the link click is properly tracked by Salesforce Marketing Cloud (SFMC). The function takes a URL and ensures that tracking parameters are appended correctly.

```
%%[ SET @dynamicLink = "http://example.com/?id=" + AttributeValue("SubscriberID") ]%% <a href="%%  
=RedirectTo(@dynamicLink)=%%">Click Here</a>
```

Salesforce AMPscript Functions - RedirectTo

Alias Attribute: Including an alias attribute provides a way to label the link, which assists in tracking and reporting.

```
<a href="%%=RedirectTo(@dynamicLink)=%%" alias="DynamicLink">Click Here</a> Reference: Salesforce Documentation on  
Link Alias
```

질문 # 91

A company has chosen to use the REST API for triggered sends, but they continue to get the following error during their testing:

"Unable to queue Triggered Send request. There are no valid subscribers." They were informed that the SOAP API provides more information about the error, and found that their payload did not include a required data extension field.

Which element of the SOAP API response provides this level of detail?

- A. ErrorCode
- B. OverallStatus
- C. ErrorDescription

정답: C

설명:

In the SOAP API response, the element that provides detailed information about the error, including missing required data extension fields, is ErrorDescription (A). This element contains a description of the error, helping developers understand and resolve the issue.

SOAP API Error Handling

질문 # 92

NTO puts the word TEST at the beginning of the name for each test email. Which query would return the subs who were sent those emails?

- A. SELECT * FROM _Job J INNER JOIN _Sent S ON J.JobID = S.JobID WHERE J.EmailName LIKE 'TEST%'
- B. SELECT * FROM _Job J INNER JOIN _Sent S on J.EmailName LIKE 'TEST%'
- C. SELECT * FROM _Job INNER JOIN _Sent on JobID = JobID WHERE EmailName LIKE 'TEST%'
- D. SELECT * FROM _Job J INNER JOIN _Sent S on J.JobID = JobID = S.JobID WHERE J.EmailName = 'TEST%'

정답: A

설명:

To retrieve subscribers who were sent emails with names starting with "TEST," we need to join the _Job and _Sent system data views on the JobID field and filter by the EmailName field using a LIKE condition.

* Join Condition: The correct join condition between _Job and _Sent is ON J.JobID = S.JobID. This ensures that we are linking the job and sent data correctly.

* EmailName Filter: We use J.EmailName LIKE 'TEST%' to filter for emails whose names start with "TEST".

```
SELECT * FROM _Job J INNER JOIN _Sent S ON J.JobID = S.JobID WHERE J.EmailName LIKE 'TEST%'
```

Salesforce Marketing Cloud System Data Views

질문 # 93

Northern Trails Outfitters (NTO) developers want to use the Transactional Messaging API to send email receipts to customers. What is the first step required to send using the API?

- A. Request a token using the v1/requestToken endpoint
- B. POST to /messaging/v1 with clientid and client_secret
- C. Request a token using the v2/authorize endpoint
- D. POST to /messaging/v1/email/messages/ with clientid

정답: C

설명:

The first step in using the Transactional Messaging API to send emails is to authenticate and obtain an access token. This is done by making a POST request to the /v2/authorize endpoint with the client credentials.

Salesforce Transactional Messaging API Authentication

질문 # 94

Which of the following statements are correct concerning Contacts and Subscribers? Choose 2.

- A. Each Contact is also a Subscriber.
- B. A Contact is subscribed to a specific channel.
- C. A Contact is subscribed to any channel.
- D. Each Subscriber is also a Contact.

정답: B,D

설명:

Regarding Contacts and Subscribers in Salesforce Marketing Cloud:

* Each Subscriber is also a Contact (C) - In Marketing Cloud, a Subscriber is a type of Contact that is specifically associated with the Email channel.

* A Contact is subscribed to a specific channel (D) - A Contact can be subscribed to one or more channels, such as Email, Mobile, or Web, within Marketing Cloud.
