SAP Certified Application Associate - SAP S/4HANA Project Systems Sample Questions (Q74-Q79):

NEW QUESTION # 74

You are using budgeting and active availability control. How can availability control be activated? Note: There are 2 correct answers to this question

- A. Background activation (CJBV - Activate Availability Control) 1
- B. Automatic activation with assignment to an investment program
- C. Automatic activation with budget assignment
- D. Automatic activation with the first actual posting

Answer: C,D

Explanation:

Availability control is a function that monitors whether the budget for a project is sufficient for planned and actual costs. Availability control can be activated in different ways depending on the settings in the availability control profile and the tolerance limits. Some of these ways are:

Automatic activation with budget assignment: Availability control is activated when you assign budget to a WBS element or a network activity.

Automatic activation with the first actual posting: Availability control is activated when you post the first actual cost to a WBS element or a network activity. Reference: https://help.sap.com/docs/SAP_S4HANA_ON-PREMISE/4dd8cb7b1c484b4b93af84d00f60fdb8/79ceb65334

NEW QUESTION # 75

You used reductions to reduce the scheduled duration of all internally-processed activities in your project. However, the duration did not change after overall network scheduling. What do you check? Note: There are 2 correct answers to this question

- A. If the reduction strategy is set in the network header
- **B. If the appropriate reduction type is set in the parameters for network scheduling**
- C. If the reduction strategy is set in each activity
- **D. If the maximum reduction level is less than 100**

Answer: B,D

NEW QUESTION # 76

How can you confirm the working hours of different work centers for a single activity?

- A. Assign multiple work centers to the activity
- **B. Create multiple confirmations for the activity and use the appropriate work center for each confirmation**
- C. Enter direct activity allocation assigning multiple work centers
- D. Enter multiple work centers within a single confirmation

Answer: B

Explanation:

To confirm the working hours of different work centers for a single activity, you can create multiple confirmations for the activity and use the appropriate work center for each confirmation. A confirmation is a function that allows you to record actual data for activities and activity elements, such as actual dates, actual durations, actual work, and so on. A work center is a parameter that defines where an activity is performed or who performs it. A work center can have various attributes, such as capacity, cost center, formulas, and so on. To confirm the working hours of different work centers for a single activity, you can create multiple confirmations for the activity and use the appropriate work center for each confirmation. This allows you to capture the actual work done by each work center separately and update their capacity requirements and costs accordingly.
