Salesforce Certified Experience Cloud Consultant Sample Questions (Q52-Q57):

NEW QUESTION # 52

Get Cloudy Consulting wants to leverage Experience Bundle for making updates to its community.

What are the two key features of experienceBundle?

Choose 2 answers

- A. ExperienceBundle allows us to programmatically edit any community but using Experience Builder.
- B. ExperienceBundle provides editable community metadata in a human-readable format.
- C. ExperienceBundle provides editable community metadata in a human-readable format.
- D. ExperienceBundle enables creating experiences across orgs.

Answer: B,D

Explanation:

ExperienceBundle is a feature that allows you to retrieve, deploy, create, update, or delete an Experience Cloud site's metadata definition in a single API call. Some of the key features of ExperienceBundle are:

- * ExperienceBundle enables creating experiences across orgs. You can use ExperienceBundle to move your site's metadata from one org to another, such as from sandbox to production.
- * ExperienceBundle provides editable community metadata in a human-readable format. You can use ExperienceBundle to edit your site's metadata in JSON or XML format, which makes it easier to understand and modify.

NEW QUESTION # 53

DreamHouse Reality (DR) is switching to a franchise-based business model in order to grow its market share.

Franchises as well as properly appraised at DR, will immediate access to a real estate opportunity in their area as soon, as it crosses a threshold.

What should the Experience Cloud consultant recommend for record sharing?

- A. Account Hierarchy
- B. Sharing Rule
- C. Sharing Set
- D. Apex sharing

Answer: B

Explanation:

To share records with partners who will work on low-severity B2C customer issues, DR should use sharing rules. Sharing rules allow you to extend sharing access to users in public groups, roles, or territories. You can use sharing rules to share records owned by internal users with partners based on criteria such as record type, field value, or ownership.

NEW QUESTION # 54

Northern Trail Outfitters wants to add a background image to a record list of products in its digital experience.

How should an administrator accomplish this?

- A. Build a custom Lightning component.
- B. Use an HTML component
- C. Use a Flexible page layout.
- D. Create CMS items.

Answer: A

Explanation:

To add a background image to a record list of products in its digital experience, an administrator should build a custom Lightning component. A Lightning component is a reusable unit of user interface that you can create and customize using code. A custom Lightning component allows you to add your own functionality and design to your Experience Cloud site. To add a background image to a record list of products, an administrator should build a custom Lightning component that uses the SLDS Background Image utility class and the lightning-record-list base component.

NEW QUESTION # 55

The system administrator at Dreamhouse Realty (DR) is giving Experience Builder access to two colleagues who will be responsible for creating and managing new microsites. One contributor needs to create and customize the site, but not publish it. The other colleague is tasked with adding contributors and publishing the final site.

Which Experience Builder roles should the system administrator grant?

- A. Builder and Experience Admin
- B. Viewer and Publisher
- C. Experience Admin and Publisher
- D. Publisher and Builder

Answer: D

Explanation:

To grant Experience Builder access to two colleagues who will be responsible for creating and managing new microsites, the system administrator should grant Publisher and Builder roles. Publisher and Builder are two Experience Builder roles that define what users can do on the site. Publisher is a role that allows users to add contributors, publish changes, and activate or deactivate sites. Builder is a role that allows users to create and customize sites, but not publish them.

NEW QUESTION # 56

Insightopia is planning to create a high-performance site for its partners. The Home page will feature multiple custom component that will provide insights and trends along with near real-time updates. Which template should Insightopia consider for its site?

- A. Customer Account Portal
- B. Build YourOwn (LWR)
- C. Help Center
- D. Partner Central

Answer: B

Explanation:

Build Your Own (LWR) is a template that allows you to create a high-performance site using Lightning Web Components and other web standards. This template is suitable for Insightopia to create a site for its partners that features multiple custom components that provide insights and trends along with near real-time updates.

NEW QUESTION # 57

.....
