

# 100% Pass 2026 Oracle Reliable Test 1z0-071 Testking

What's more, part of that Lead2PassExam 1z0-071 dumps now are free: [https://drive.google.com/open?id=1ibnQhy0fGkhi-fN\\_Q3VM1umX1EqEzaeV](https://drive.google.com/open?id=1ibnQhy0fGkhi-fN_Q3VM1umX1EqEzaeV)

With our 1z0-071 exam questions, you can pass the exam with 100% success guaranteed. More importantly, if you purchase our 1z0-071 practice materials, we believe that your life will get better and better. So why still hesitate? Act now, join us, and buy our study materials. You will feel very happy that you will be about to change well because of our 1z0-071 Study Guide. Now you can go to free download the demos to check the content and function. It is easy and convenient.

## Format of ORACLE 1z0-071 Certification Exam

The ORACLE 1z0-071 exam will include the following sections:

- Section 1: Basic Concepts and Principles
- Section 2: Oracle Database SQL Language and Data Structures
- Section 3: Oracle Database Administration and Management
- Section 4: Data Integrity, Security, and Backup Methods.

ORACLE 1z0-071 exams questions will be in the form of Multiple choice, and the passing score for winning the certification is 63%. If you will not be able to score the required percentage, you will not be entertained with the certification. Don't worry, **Oracle 1z0-071 Dumps** will help you to get a score in the exam.

Oracle 1z1-071 certification exam is a computer-based exam that consists of 73 multiple-choice questions. You will have 105 minutes to complete the exam, and you need to score at least 63% to pass. 1z0-071 exam is available in several languages, including English, Japanese, Chinese, and Korean. To prepare for the exam, Oracle offers training courses, study guides, and practice exams. Passing 1z0-071 exam will not only validate your skills and knowledge in SQL database administration but also open up new career opportunities in the IT industry.

## Free PDF 2026 1z0-071 - Test Oracle Database SQL Testking

Actually we eliminate the barriers blocking you from our 1z0-071 practice materials. All types of our 1z0-071 exam questions are priced favorably on your wishes. Obtaining our 1z0-071 study guide in the palm of your hand, you can achieve a higher rate of success. Besides, there are free demos for your careful consideration to satisfy individual needs on our 1z0-071 learning prep. You can free download them to check if it is the exact one that you want.

To be eligible to take the Oracle 1z0-071 Exam, candidates must have a fundamental understanding of SQL and relational database concepts. They should also have a basic understanding of Oracle database architecture and be familiar with SQL developer tools.

Candidates should also have practical experience in writing SQL statements and working with Oracle databases.

## Oracle Database SQL Sample Questions (Q79-Q84):

### NEW QUESTION # 79

Which statement falls to execute successfully?

- A. `SELECT *  
FROM employees e  
JOIN departments d  
ON e.department_id=d.department_id  
WHERE d.department_id=90;`
- B. `SELECT *  
FROM employees e  
JOIN departments d  
ON e.department_id=d.department_id  
AND d.department_id=90;`
- C. `SELECT *  
FROM employees e  
JOIN department d  
WHERE e.department_id=d.department_id  
AND d.department_id=90;`
- D. `SELECT *  
FROM employees e  
JOIN departments d  
ON d.departments_id=90  
WHERE e.department_id=d.department_id;`

**Answer: C**

Explanation:

A: `SELECT * FROM employees e JOIN department d WHERE e.department_id=d.department_id AND d.department_id=90;`

This statement will fail because it incorrectly uses the JOIN syntax without an ON clause, which is necessary to specify the condition on which the tables are joined. This statement mistakenly places the join condition in the WHERE clause without using ON.

Correct options (executes successfully):

B: Correctly formulated JOIN with ON and an additional condition in the WHERE clause.

C: Incorporates the filtering directly in the ON clause, which is a valid method to restrict the rows returned by the JOIN based on conditions related to both tables.

D: Although it appears awkward due to the order of conditions in the ON clause, it is syntactically correct.

These answers reflect typical use and constraints in SQL queries and are aligned with Oracle Database 12c standards for SQL syntax and operations.

Explanation:

Given the statements, the failure to execute would be due to improper SQL syntax or logical structuring of the JOIN clause:

### NEW QUESTION # 80

Examine the description of the CUSTOMERStable:

Name	Null?	Type
CUST_ID	NOT NULL	VARCHAR2 (6)
FIRST_NAME		VARCHAR2 (50)
LAST_NAME	NOT NULL	VARCHAR2 (50)
ADDRESS		VARCHAR2 (50)
CITY		VARCHAR2 (25)

You want to display details of all customers who reside in cities starting with the letter D followed by at least two characters.

Which query can be used?

`SELECT * FROM customers WHERE city = 'D_%';`

- A.
- B. `SELECT * FROM customers WHERE city LIKE 'D_';`

- C. `SELECT * FROM customers WHERE city = '%D_';`
- D. `SELECT * FROM customers WHERE city LIKE 'D_%';`

Answer: C

### NEW QUESTION # 81

View the exhibit and examine the structure of the STORES table.

Name	Null	Type
STORE_ID		NUMBER
NAME		VARCHAR2 (100)
ADDRESS		VARCHAR2 (200)
CITY		VARCHAR2 (100)
COUNTRY		VARCHAR2 (100)
START_DATE		DATE
END_DATE		DATE
PROPERTY_PRICE		NUMBER

You must display the NAME of stores along with the ADDRESS, START\_DATE, PROPERTY\_PRICE, and the projected property price, which is 115% of property price.

The stores displayed must have START\_DATE in the range of 36 months starting from 01-Jan-2000 and above.

Which SQL statement would get the desired output?

- A. `SELECT name, concat(address||', '||city||', ', country) AS full_address, start_date, property_price, property_price*115/100 FROM stores WHERE MONTHS_BETWEEN(start_date, TO_DATE('01-JAN-2000', 'DD-MON-RRRR')) <=36;`
- B. `SELECT name, concat(address||', '||city||', ', country) AS full_address, start_date, property_price, property_price*115/100 FROM stores WHERE TO_NUMBER(start_date - TO_DATE('01-JAN-2000', 'DD-MON-RRRR')) <=36;`
- C. `SELECT name, address||', '||city||', '||country AS full_address, start_date, property_price, property_price*115/100 FROM stores WHERE MONTHS_BETWEEN(start_date, TO_DATE('01-JAN-2000', 'DD-MON-RRRR')) <=36;`
- D. `SELECT name, concat(address||', '||city||', ', country) AS full_address, start_date, property_price, property_price*115/100 FROM stores WHERE MONTHS_BETWEEN(start_date, '01-JAN-2000') <=36;`

Answer: A

### NEW QUESTION # 82

Examine the structure of the members table:

Name	Null?	Type
MEMBER_ID		NUMBER
FIRST_NAME	NOT NULL	VARCHAR2 (6)
LAST_NAME	NOT NULL	VARCHAR2 (50)
ADDRESS		VARCHAR2 (50)

You execute the SQL statement:

```
SQL> SELECT member_id, ' ', first_name, ' ', last_name "ID FIRSTNAME LASTNAME " FROM members;
```

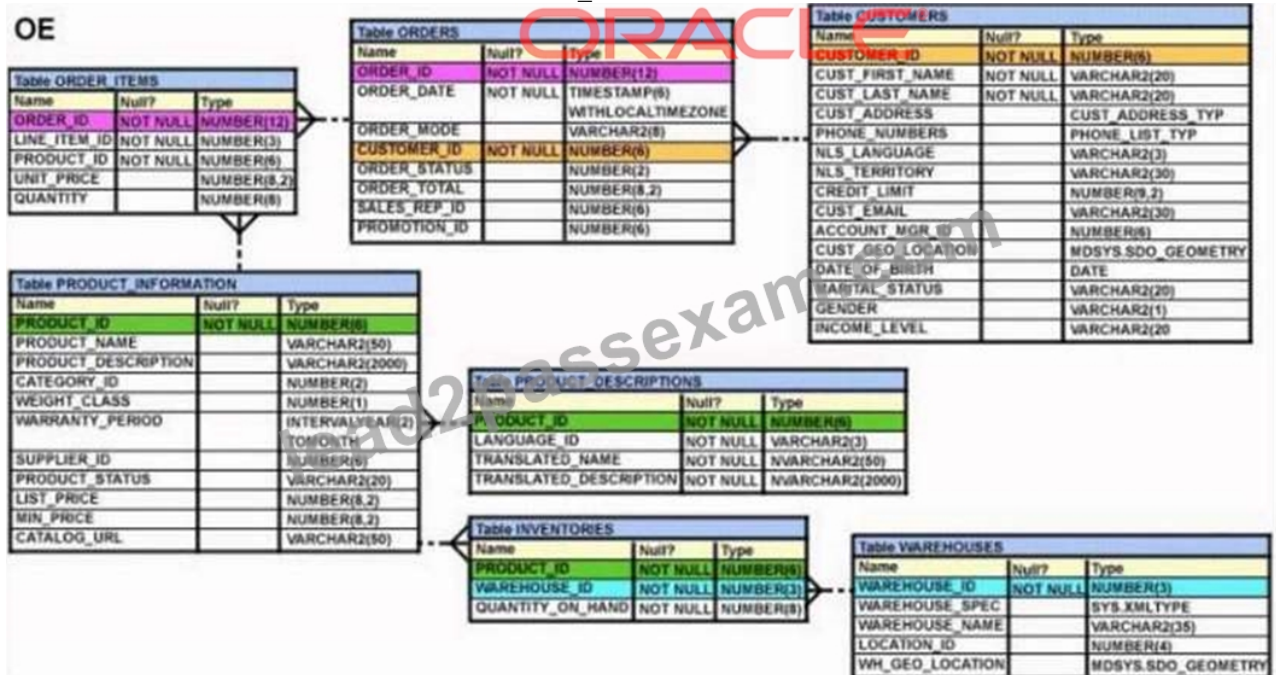

What is the outcome?

- A. It executes successfully and displays the column details in a single column with only the alias column heading.
- B. It fails because the alias name specified after the column names is invalid.
- C. It fails because the space specified in single quotation marks after the first two column names is invalid.
- D. It executes successfully and displays the column details in three separate columns and replaces only the last column heading with the alias.

Answer: D

**NEW QUESTION # 83**

View the Exhibit and examine the details of the PRODUCT\_INFORMATION table.

Evaluate this SQL statement:

```
SELECT TO_CHAR(list_price, '$9,999')
```

From product\_information;

Which two statements are true regarding the output? (Choose two.)

- A. A row whose LIST\_PRICE column contains value 1123.90 would be displayed as \$1,124.
- B. A row whose LIST\_PRICE column contains value 1123.90 would be displayed as \$1,123.
- C. A row whose LIST\_PRICE column contains value 11235.90 would be displayed as \$1,123.
- D. A row whose LIST\_PRICE column contains value 11235.90 would be displayed as #####.

**Answer: A,D**
