

Prepare for ZDTA with Zscaler's Realistic Exam Questions and Get Accurate Answers

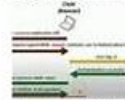

Zscaler EDU 200 - Essentials - ZDTA Study Guide set Exam

What is used to detect if a SAML assertion was modified after being issued?

Options:

- XML
- Digital Signatures
- Attributes
- Tokens

Digital Signatures

How is a SAML assertion delivered to Zscaler?

Options:

- The IdP sends it via an HTTP post directly to the SP via a backend API
- The SP sends it via an HTTP post directly to the IdP via a backend API
- The IdP sends it via the user's browser to the SP
- The SP sends it via a trusted authority to the IdP

The IdP sends it via the user's browser to the SP

(Uses a form POST submitted via JavaScript)

Zscaler Digital Transformation Administrator (ZDTA) PDF dumps are the third and most convenient format of the Zscaler ZDTA PDF questions prep material. This format is perfect for busy test takers who prefer to study for the Zscaler Digital Transformation Administrator (ZDTA) exam on the go. Questions bank in the DumpsKing Zscaler ZDTA Pdf Dumps is accessible via all smart devices. We also update Zscaler Digital Transformation Administrator (ZDTA) PDF questions regularly to ensure they match with the new content of the ZDTA exam.

Zscaler ZDTA Exam Syllabus Topics:

Topic	Details
Topic 1	• Cyberthreat Protection Services: This domain targets Cybersecurity Analysts and covers broad cybersecurity fundamentals and advanced threat protection capabilities. Candidates must know about malware protection, intrusion prevention systems, command and control channel detection, deception technologies, identity threat detection and response, browser isolation, and incident detection and response. • Data Protection Services

Topic 2	• Zscaler Zero Trust Automation: This part measures Automation Engineers on their ability to utilize Zscaler APIs, including the One API framework, for automating zero trust security functions and integrating with broader enterprise security and orchestration tools.
Topic 3	• Zscaler Digital Experience: This section evaluates Network Performance Analysts on their knowledge of Zscaler Digital Experience (ZDX), including understanding the ZDX score, architectural overview, features, functionalities, and practical use cases to optimize digital user experiences.
Topic 4	• This section assesses Data Protection Officers on techniques to secure data across motion, SaaS, cloud, and endpoints using Zscaler's AI-driven data discovery and data protection technologies. It involves securing BYOD environments and understanding risk management to protect sensitive information.
Topic 5	• Platform Services: This section measures skills of Cloud Infrastructure Engineers and focuses on the suite of Zscaler platform services. Key topics include advanced device posture assessments, TLS inspection mechanics, and the application of policy frameworks governing internet, private access, and digital experience services.
Topic 6	• Access Control Services: This area assesses Security Operations Specialists on implementing access control mechanisms including cloud app control, URL filtering, file type controls, bandwidth controls, and segmentation. It also covers Microsoft 365 policies, private application access strategies, and firewall configurations to protect enterprise resources.
Topic 7	• Risk Management: This domain measures skills of Risk Managers and Security Architects in using Zscaler's comprehensive risk management suite. Candidates are expected to understand risk capabilities, dashboards, asset and financial risk insights, vulnerability management, deception tactics, identity protection, and breach prediction analytics.

Perfect ZDTA Latest Exam Preparation & Leading Provider in Qualification Exams & Unparalleled ZDTA Valid Test Review

Our ZDTA exam materials are the product of this era, which conforms to the development trend of the whole era. It seems that we have been in a state of study and examination since we can remember, and we have experienced countless tests. In the process of job hunting, we are always asked what are the achievements and what certificates have we obtained? Therefore, we get the test ZDTA Certification and obtain the qualification certificate to become a quantitative standard, and our ZDTA learning guide can help you to prove yourself the fastest in a very short period of time.

Zscaler Digital Transformation Administrator Sample Questions (Q66-Q71):

NEW QUESTION # 66

Which types of Botnet Protection are supplied by Advanced Threat Protection?

- A. Malicious file downloads, Command traffic (sending / receiving), Data exfiltration
- B. Connections to known C&C servers, Command traffic (sending / receiving), Unknown C&C using AI /ML
- C. Vulnerabilities in web server applications, Unknown C&C using AI/ML, Vulnerable ActiveX controls
- D. Connections to known C&C servers, Detection of phishing sites, Access to spam sites

Answer: B

Explanation:

Advanced Threat Protection provides botnet protection by monitoring connections to known Command and Control (C&C) servers, inspecting command traffic (sending and receiving), and detecting unknown C&C servers using AI/ML techniques. This comprehensive approach helps in identifying and blocking botnet activities effectively.

The study guide details these mechanisms as key elements of the botnet protection feature set in ATP.

NEW QUESTION # 67

What does Advanced Threat Protection defend users from?

- A. Vulnerable JavaScripts
- B. Command injection attacks
- C. Large iFrames
- D. Malicious active content

Answer: D

Explanation:

Advanced Threat Protection (ATP) defends users from malicious active content, which includes malware, exploit kits, malicious scripts, and other forms of active content designed to compromise user systems. ATP employs multiple techniques such as sandboxing, malware scanning, and threat intelligence to detect and block these threats before they reach the user.

NEW QUESTION # 68

What is the purpose of a Microtunnel (M-Tunnel) in Zscaler?

- A. To create an end-to-end communication channel to Azure AD for authentication
- B. To provide an end-to-end communication channel to Microsoft Applications such as M365
- C. To provide an end-to-end communication channel between ZCC clients
- D. To create an end-to-end communication channel to internal applications

Answer: D

Explanation:

The Microtunnel (M-Tunnel) in Zscaler is designed to create an end-to-end communication channel to internal applications. This tunnel facilitates secure and direct access from the client device to internal corporate applications without exposing the network or requiring traditional VPN infrastructure. The M-Tunnel is part of ZPA's mechanism to ensure secure, zero-trust access to private resources.

NEW QUESTION # 69

Is SCIM required for ZIA?

- A. Yes
- B. Depends
- C. No
- D. Maybe

Answer: C

Explanation:

SCIM is optional for ZIA user provisioning - you can onboard users via manual CSV import, SAML attributes, or other identity integrations without implementing SCIM.

NEW QUESTION # 70

For a deployment using both ZIA and ZPA set of services, what is the best authentication solution?

- A. Configure Authentication using SAML on both ZIA and ZPA
- B. Use forms Authentication in ZIA and SAML in ZPA
- C. Use forms Authentication for both ZIA and ZPA
- D. Use forms Authentication in ZPA and SAML in ZIA

Answer: A

Explanation:

For a unified, seamless experience - and because ZPA only supports SAML while ZIA's recommended authentication is also SAML - you should configure SAML-based SSO on both ZIA and ZPA. This ensures one consistent identity flow and eliminates
