

TOP OGEA-101 Valid Study Questions 100% Pass | Latest TOGAF Enterprise Architecture Part 1 Exam Valid Brindumps Sheet Pass for sure

DOWNLOAD the newest Itcertkey OGEA-101 PDF dumps from Cloud Storage for free: https://drive.google.com/open?id=1MaytZ5NA7AGqkr7rBHgkhKi_3VMKArFd

Our company enjoys good reputation in the field of providing certificate exam materials. We are dedicated to providing good and efficient OGEA-101 study guide for candidates. You can pass the exam by using the OGEA-101 questions and answers of us, therefore we are pass guarantee. If you fail to pass the exam, we will money back guarantee, and the money will return to your payment account. We are confident with our OGEA-101 Study Guide, you can trust us.

Our company has been putting emphasis on the development and improvement of OGEA-101 test prep over ten year without archaic content at all. So we are bravely breaking the stereotype of similar content materials of the exam, but add what the exam truly tests into our OGEA-101 Exam Guide. So we have adamant attitude to offer help rather than perfunctory attitude. We esteem your variant choices so all these versions of OGEA-101 study materials are made for your individual preference and inclination.

OGEA-101 Valid Brindumps Sheet & OGEA-101 Free Dumps

Many candidates failed exam before. They have no confidence for next exam and they also hesitate if they have to purchase valid OGEA-101 brain dumps materials or if dumps are actually valid. Now I advise you download our free demo before you are determined to buy. Our free demo is a little of the real test, you can see several questions answers and explanations. You will know the validity of The Open Group OGEA-101 Brain Dumps materials.

The Open Group OGEA-101 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Introduction to the Architecture Development Method (ADM): The ADM is central to TOGAF, outlining a structured approach to developing and managing enterprise architecture. This section assesses comprehension of TOGAF practitioners about the ADM phases and their application, ensuring they grasp the method's iterative nature, which is vital for the OGEA-101 exam.
Topic 2	<ul style="list-style-type: none"> Information Systems Architecture: Focusing on data and application architectures, this topic of the OGEA-101 exam assesses ability of TOGAF practitioners to define and manage information systems. It measures their skills in identifying data entities and application components.

Topic 3	<ul style="list-style-type: none"> • ADM Phase Requirements: This topic of the TOGAF Enterprise Architecture Part 1 exam focuses on the specific requirements for each ADM phase, including stakeholder identification and architecture scope definition. It measures the ability of aspiring TOGAF Practitioner to apply these requirements in real-world scenarios.
Topic 4	<ul style="list-style-type: none"> • Architecture Vision: Aspiring TOGAF practitioners learn to develop an architecture vision that aligns with business goals and drivers. This topic evaluates the skills in articulating a clear and compelling vision, a necessary competency for successfully navigating the OGEA-101 Exam and implementing enterprise architecture.
Topic 5	<ul style="list-style-type: none"> • Business Architecture: This topic of The Open Group OGEA-101 exam emphasizes the development of business architecture, including baseline and target architectures. It measures the understanding of TOGAF practitioners about business capabilities and processes.
Topic 6	<ul style="list-style-type: none"> • Architecture Governance: This topic of The Open Group OGEA-101 exam covers the governance framework and responsibilities of architecture boards. It evaluates the skills of TOGAF practitioners in establishing governance structures.

The Open Group TOGAF Enterprise Architecture Part 1 Exam Sample Questions (Q62-Q67):

NEW QUESTION # 62

Complete the sentence Business Transformation Readiness Assessment is _____.

- A. a way to put building blocks into context thereby supporting re-usable solutions
- B. to ensure the active support of powerful stakeholders
- C. widely used to validate an architecture that is being developed
- D. a joint effort between corporate staff lines of business and IT planners

Answer: D

Explanation:

Business Transformation Readiness Assessment is a joint effort between corporate staff lines of business and IT planners to evaluate the readiness of the organization to undergo change. It involves assessing factors such as vision, commitment, capacity, capability, culture, and motivation that may influence the success of a business transformation initiative. Reference: The TOGAF Standard | The Open Group Website, Section 3.3.2 Business Transformation Readiness Assessment.

NEW QUESTION # 63

Which of the following best summarizes the purpose of Enterprise Architecture?

- A. Controlling the bigger changes.
- B. Taking major improvement decisions.
- C. Governing the Stakeholders.
- D. Guiding effective change.

Answer: D

Explanation:

EA applies architecture principles and practices to analyze, design, plan, and implement enterprise analysis that supports digital transformation, IT growth, and the modernization of IT². EA also helps organizations improve the efficiency, timeliness, and reliability of business information, as well as the alignment, agility, and adaptability of the architecture to the changing needs and requirements³. Therefore, the best summary of the purpose of EA is to guide effective change.

NEW QUESTION # 64

Which of the following is a responsibility of an Architecture Board?

- A. Conducting assessments of the maturity level of architecture discipline within the organization
- B. Allocating resources for architecture projects
- C. Creating the Statement of Architecture Work
- **D. Establishing targets for re-use of components**

Answer: D

Explanation:

An Architecture Board is an executive-level group responsible for the review and maintenance of the strategic architecture and all of its sub-architectures¹. It is a key element in a successful Architecture Governance strategy².

An Architecture Board is typically made responsible, and accountable, for achieving some or all of the following goals²:

Providing the basis for all decision-making with regard to the architectures
Consistency between sub-architectures
Establishing targets for re-use of components
Flexibility of the Enterprise Architecture: To meet changing business needs
To leverage new technologies
Enforcement of Architecture Compliance
Improving the maturity level of architecture discipline within the organization
Ensuring that the discipline of architecture-based development is adopted
Supporting a visible escalation capability for out-of-bounds decisions
Therefore, the correct answer is option D, which captures one of the goals of an Architecture Board as stated in the TOGAF Standard, Version 9.22.

Option A is incorrect, because conducting assessments of the maturity level of architecture discipline within the organization is not a direct responsibility of an Architecture Board, but rather a part of the Architecture Capability Framework³.

Option B is incorrect, because allocating resources for architecture projects is not a direct responsibility of an Architecture Board, but rather a part of the Architecture Governance Framework⁴.

Option C is incorrect, because creating the Statement of Architecture Work is not a direct responsibility of an Architecture Board, but rather a part of the Architecture Development Method⁵. Reference:

1: Architecture Board - The Open Group³

2: TOGAF Standard, Version 9.2 - Part VI: Architecture Governance Framework - Architecture Board

3: TOGAF Standard, Version 9.2 - Part VI: Architecture Governance Framework - Architecture Capability Framework

4: TOGAF Standard, Version 9.2 - Part VI: Architecture Governance Framework - Architecture Governance Framework

5: TOGAF Standard, Version 9.2 - Part II: Architecture Development Method - Phase A: Architecture Vision

NEW QUESTION # 65

What can architects present to stakeholders to extract hidden agendas, principles, and requirements that could impact the final Target Architecture?

- A. Business Scenarios and Business Models
- B. Solutions and Applications
- **C. Architecture Views and Architecture Viewpoints**
- D. Alternatives and Trade-offs

Answer: C

Explanation:

* According to the TOGAF Standard, Version 9.2, an architecture view is a representation of a system from the perspective of a related set of concerns¹. It consists of one or more architecture models that demonstrate how the system addresses the stakeholder concerns¹.

* An architecture viewpoint is a specification of the conventions for constructing and using an architecture view to address specific stakeholder concerns¹. It defines the perspective, scope, notation, and techniques for creating an architecture view of a system¹.

* Architects can present architecture views and viewpoints to stakeholders to extract hidden agendas, principles, and requirements that could impact the final Target Architecture, because²³:

* Architecture views and viewpoints help to communicate and visualize the architecture in a way that is meaningful and relevant to different stakeholders, addressing their specific interests and needs.

* Architecture views and viewpoints help to elicit and validate the stakeholder concerns and requirements, ensuring that they are aligned with the business goals and objectives, and that they are consistent and feasible within the architecture context.

* Architecture views and viewpoints help to identify and resolve any conflicts, gaps, or trade-offs among the stakeholder concerns and requirements, ensuring that they are balanced and prioritized in the architecture design and decision-making.

* Architecture views and viewpoints help to demonstrate and verify the value and benefits of the architecture to the stakeholders, ensuring that they are satisfied and committed to the architecture outcome and governance.

NEW QUESTION # 66

Which of the following best describes the TOGAF Architecture Development Method?

- A. A technique to assess readiness for change.
- **B. A repeatable process for developing architectures.**
- C. A process for managing architecture requirements.
- D. A classification mechanism for architectures and solutions.

Answer: B

Explanation:

The TOGAF Architecture Development Method (ADM) is best described as a repeatable process for developing architectures. It provides the step-by-step method used to create, evolve, govern, and manage enterprise architectures in a consistent and structured way. The ADM is the core of TOGAF and defines how architecture work progresses from preparation and vision through business, data, application, and technology architecture, then into opportunities, migration planning, implementation governance, and change management.

Option A is incorrect because a classification mechanism is not the purpose of the ADM. Option B is too narrow, since requirements management is only one supporting aspect of the ADM, not its full definition.

Option C is also incorrect because readiness assessment may be used as a technique within architecture practice, but it is not what the ADM itself is.

The strength of the ADM is that it is iterative, adaptable, and repeatable. It can be tailored for different enterprises and change scenarios while still preserving a consistent method. This makes it suitable for both large transformation efforts and more focused architecture initiatives. Therefore, the best description is option D, a repeatable process for developing architectures.

NEW QUESTION # 67

.....

In the 21st century, with the development of science and technology, the Internet is not only an entertainment platform, but also a world-class electronic library. On Itcertkey site you can find IT information knowledge treasure that belongs to you. Choosing Itcertkey's OGEA-101 Exam Training materials is to choose to embrace the bright future. When you buy our OGEA-101 exam training materials, we will ensure that you pass OGEA-101 test.
