Are you very eager to pass the C-CPI-2506 exam? Then you must want to see this amazing learning product right away! After you decide to purchase our C-CPI-2506 guide questions, please pay immediately. If your page shows that the payment was successful, you will receive a link of our C-CPI-2506 Exam Materials we sent to you within five to ten minutes. And the pass rate of C-CPI-2506 study braindumps is high as 98% to 100%.

SAP C-CPI-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">SAP Event Mesh: This section of the exam measures the skills of Solution Architects and centers on using SAP Event Mesh to support event-driven integration. It highlights the importance of asynchronous communication, event publishing, and subscription models, allowing organizations to build scalable and decoupled systems.

Topic 2	<ul style="list-style-type: none"> • Managing APIs: This section of the exam measures the skills of Solution Architects and focuses on managing APIs within the SAP ecosystem. It covers topics such as API provisioning, lifecycle management, security policies, and monitoring, ensuring candidates can handle APIs effectively for enterprise integration needs.
Topic 3	<ul style="list-style-type: none"> • Implementing Cloud Integration: This section of the exam measures the skills of Integration Consultants and examines how cloud integration flows are designed and deployed. It emphasizes creating integration scenarios, handling connectivity, and applying best practices to build efficient, secure, and reliable integration processes in SAP's cloud environment.
Topic 4	<ul style="list-style-type: none"> • SAP Integration Suite Overview: This section of the exam measures the skills of Integration Consultants and covers the foundational concepts of the SAP Integration Suite. It provides an understanding of the suite's capabilities, its role in connecting applications, and its relevance in modern cloud-based integration scenarios.

C-CPI-2506 Exam Objectives Pdf - C-CPI-2506 Latest Exam Duration

Our website offer you the latest C-CPI-2506 dumps torrent in pdf version and test engine version, which selected according to your study habit. You can print our C-CPI-2506 practice questions out and share the materials with your classmates and friends. The test engine version is a way of exam simulation that helps you get used to the atmosphere of C-CPI-2506 Real Exam and solve the problems with great confidence.

SAP Certified Associate - Integration Developer Sample Questions (Q37-Q42):

NEW QUESTION # 37

You use an APIKey for authentication in an HTTPS API call. In which part of the Content Modifier is the APIKey included?

- A. Attachment
- **B. Message header**
- C. Message body
- D. Exchange property

Answer: B

Explanation:

When using API Key authentication for HTTP(S) calls in SAP Integration Suite:

The API Key is typically included in the HTTP header (e.g., APIKey: <value> or x-api-key: <value>).

Message headers are configured in the Content Modifier for outbound requests.

Other options:

Attachment # Used for file handling, not authentication.

Message body # Contains payload, not credentials.

Exchange property # Used internally within the flow, not sent externally.

Thus, the API Key must be placed in the Message header.

NEW QUESTION # 38

In the Cloud Integration capability within SAP Integration Suite, which internal message format is used?

- A. JSON
- B. XSLT
- **C. XML**

Answer: C

Explanation:

In the Cloud Integration capability within SAP Integration Suite, XML is the internal message format that is used. XML stands for Extensible Markup Language and is a standard format for representing structured data. All messages that are processed by the Cloud Integration capability are converted to XML internally and then transformed to the desired format at the outbound channel. NEW QUESTION # 39

You want to implement a synchronous call to a remote HTTP API as an integration flow component. Which adapter can you use?

- A. Mail
- **B. OData**
- C. AMQP
- D. SFTP

Answer: B

Explanation:

You can use an OData adapter to implement a synchronous call to a remote HTTP API as an integration flow component. An OData adapter allows you to send and receive messages using the OData protocol. OData stands for Open Data Protocol and is a standard for exposing and consuming data over HTTP or HTTPS. You can use an OData adapter to communicate with OData services that support CRUD (Create, Read, Update, Delete) operations on resources. NEW QUESTION # 40

Where can you configure a static payload? Note: There are 2 correct answers to this question.

- **A. In a Data Store Operation component**
- B. In a Content Modifier component of the Message Header tab
- **C. In a Content Modifier component of the Message Body tab**
- D. In a Groovy script

Answer: A,C

Explanation:

You can configure a static payload in a Data Store Operation component or in a Content Modifier component of the Message Body tab. A Data Store Operation component allows you to store or retrieve messages in a data store. You can use the Write operation to store a static payload in a data store entry with a specified key. A Content Modifier component allows you to modify the message content, headers, and properties. You can use the Message Body tab to define a static payload for the message. NEW QUESTION # 41

What kind of editor can you use to manipulate integration flows?

- A. Command-line editor
- **B. Graphical editor**
- C. Code editor

Answer: B

Explanation:

To manipulate integration flows, you can use a graphical editor that is provided by SAP Integration Suite. The graphical editor allows you to visualize and edit your integration flows using a drag-and-drop interface. It also provides a palette of icons that represent different integration components and actions, such as senders, receivers, routers, mappers, transformers, and so on. You can use the graphical editor to design and configure complex integration scenarios in a user-friendly way.
