NEW QUESTION # 211

You have an Azure Virtual Desktop host pool in the East US region.

You need to implement a disaster recovery solution that meets the following requirements:

- If users cannot connect to the Azure Virtual Desktop resources in the East US region, the users must be able to connect to the equivalent resources in the West US region.
- Users must connect to the Azure Virtual Desktop resources in either the East US or the West US region by selecting a single icon in the Remote Desktop client
- In the event of a disaster, failover between the Azure regions must be initiated manually by an administrator.
- Failover times must be minimized.

What should you do? (Choose two)

- A. Create new session hosts in the West US region and add the session hosts to an existing host pool
- **B. Enable Azure Site Recovery replication of the virtual machines to the West US region**
- C. Enable Azure Backup to a Recovery Services vault in the West US region
- **D. Create an additional host pool in the West US region**
- E. Configure a shared image gallery that has replicas in the East US and West US regions
