IBM C1000-173 Clear Exam, Authorized C1000-173 Certification

In traditional views, C1000-173 practice materials need you to spare a large amount of time on them to accumulate the useful knowledge may appearing in the real exam. However, our C1000-173 learning questions are not doing that way. According to data

from former exam candidates, the passing rate has up to 98 to 100 percent. There are adequate content to help you pass the C1000-173 Exam with least time and money.

IBM Cloud Pak for Data v4.7 Architect Sample Questions (Q80-Q85):

NEW QUESTION # 80

Which Watson Pipeline component puts a value in columns so it can be consumed by DataStage?

- A. Initialize User Values
- B. Prepare User Parameters
- C. Instantiate User Columns
- **D. Set User Variables**

Answer: D

Explanation:

In Watson Pipelines, the component that enables users to define and assign values that can be referenced later in the pipeline—including by downstream components like DataStage—is Set User Variables. This component allows the user to create name-value pairs and store them as environment variables, which are accessible to DataStage and other execution blocks. This ensures dynamic parameter passing and enhances pipeline reusability. The other options listed do not correspond to valid Watson Pipeline components as defined in the official Cloud Pak for Data 4.7 release.

NEW QUESTION # 81

If a Cloud Pak for Data cluster is air-gapped, it is unable to reach the internet, and a private registry must be configured for installations and upgrades. Beyond container images, what other components need to be addressed?

- A. Data movement between nodes must be blocked via firewall rules.
- B. Platform monitoring messages are sent via an internet messaging hub.
- C. License validation requires periodic updates via internet proxy.
- **D. Utilities, like pip, still require a connection to the internet by default.**

Answer: D

Explanation:

In air-gapped (offline) environments, it's not just the container images that require preparation.

Package managers like pip (for Python) and other utilities commonly attempt to pull dependencies from public internet repositories. These must be redirected to internal mirrors or handled via offline bundles. If left unaddressed, certain operations within components like Jupyter notebooks, Watson Studio, or pipelines may fail. License validation and monitoring do not inherently require internet access, and data movement between nodes is part of normal cluster function--not something to be blocked.

NEW QUESTION # 82

In the context of IBM Cloud Pak for Data, which statement best describes the purpose of using OpenShift Operators?

- **A. To manage the lifecycle of Cloud Pak services**
- B. To automate the deployment of Kafka clusters
- C. To enable automatic scaling of deployed services
- D. To provide logging and monitoring capabilities

Answer: A

NEW QUESTION # 83

Which Cloud Pak for Data predefined role has permission to create service instances?

- A. Data Scientist
- B. Data Steward
- C. Reporting Administrator
- **D. Data Engineer**

Answer: D

NEW QUESTION # 84

An architect is working with a team to configure Dynamic Workload Management for a single DataStage instance on Cloud Pak for Data. Auto-scaling has been disabled and the maximum concurrent jobs has been set to 5. What will happen if a sixth concurrent job is executed?

- A. The sixth job will start if resources are available and will automatic.
- **B. The sixth job will queue until one of the other concurrent jobs completes.**
- C. The sixth job will fail and will need to be restarted.

Answer: B

Explanation:

Queueing mechanism is in place. Since the maximum concurrent jobs are limited to 5, the sixth job will not start immediately. Instead, it will queue and wait for one of the currently running jobs to complete, making room for the sixth job to execute.

NEW QUESTION # 85

.....

If you purchase our IBM Cloud Pak for Data v4.7 Architect guide torrent, we can make sure that you just need to spend twenty to thirty hours on preparing for your exam before you take the exam, it will be very easy for you to save your time and energy. So do not hesitate and buy our C1000-173 study torrent, we believe it will give you a surprise, and it will not be a dream for you to pass your IBM Cloud Pak for Data v4.7 Architect exam and get your certification in the shortest time.
