NEW QUESTION # 11
How can you create a custom task for an onboarding program?
Note: There are 2 correct answers to this question.

- A. Create email notifications for the custom task
- B. Define a business rule for the custom task
- C. Create a custom MDF object
- D. Create a UI using the UI Template Editor

Answer: B,C

Explanation:
Creating a custom task for an Onboarding program in SAP SuccessFactors involves defining the task's structure and behavior. This is typically done by creating a custom MDF object to store task-related data and defining a business rule to control the task's logic or assignment.
According to the SAP SuccessFactors Onboarding Implementation Guide:
* Create a custom MDF object(Option B): A custom MDF object is created inConfigure Object Definitionsto define the fields and structure of the task. This object is then linked to the Onboarding program to enable the task.
* Define a business rule for the custom task(Option C): Business rules are configured inConfigure Business Rulesto assign the task to specific users (e.g., hiring manager or HR) or to define conditions for task completion.
Option A (Create email notifications) is incorrect because email notifications are configured separately and are not part of creating the task itself. Option D (Create a UI using the UI Template Editor) is incorrect because the UI Template Editor is used for document templates, not for defining custom tasks.
