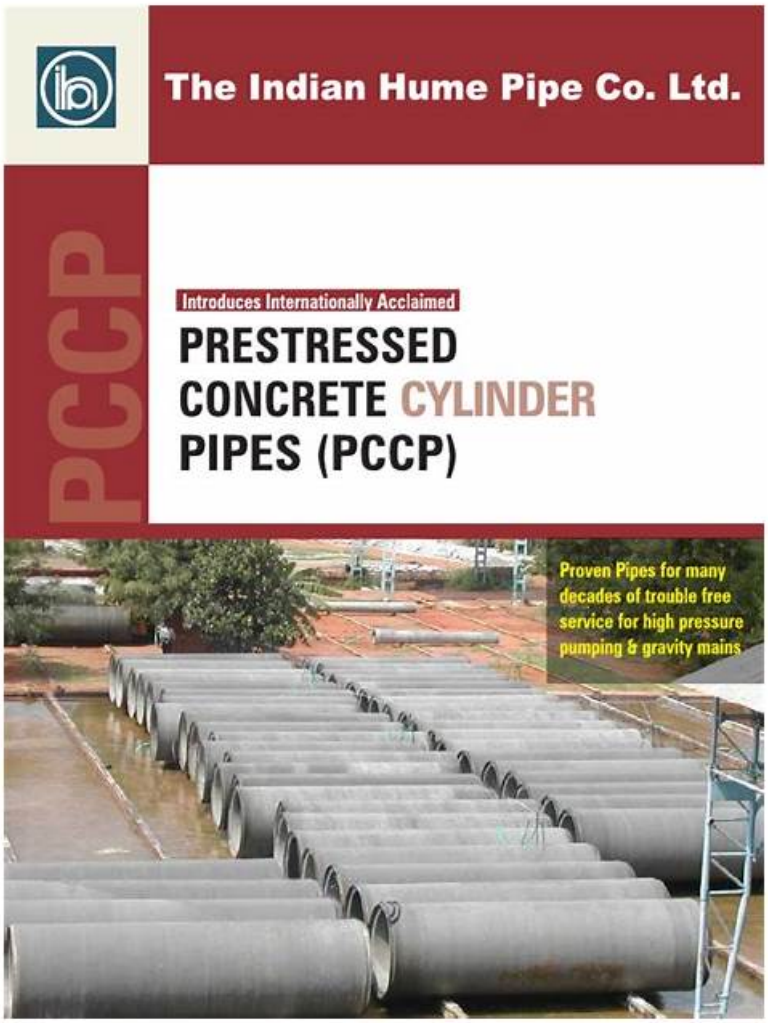
PCCP Pdf Files & PCCP Real Dump



BONUS!!! Download part of ExamTorrent PCCP dumps for free: https://drive.google.com/open?id=1guofW1g3ZVgRU4GpZAeDcFZzAUOmkvTH

If you are on the bus, you can choose the APP version of PCCP training engine. On one hand, after being used for the first time in a network environment, you can use it in any environment. The APP version of PCCP Study Materials can save you traffic. And on the other hand, the APP version of PCCP exam questions can be applied to all kinds of electronic devices, so that you can practice on the IPAD or phone.

All the given practice questions in the desktop software are identical to the Palo Alto Networks Certified Cybersecurity Practitioner (PCCP) actual test. Windows computers support the desktop practice test software. ExamTorrent has a complete support team to fix issues of Palo Alto Networks PCCP PDF QUESTIONS software users. ExamTorrent practice tests (desktop and web-based) produce score report at the end of each attempt. So, that users get awareness of their Palo Alto Networks Certified Cybersecurity Practitioner (PCCP) preparation status and remove their mistakes.

PCCP Real Dump - PCCP Latest Exam Experience

Our PCCP study guide is known as instant download, once you finish your payment, we will send the downloading link and password to you, and you can get PCCP study guide within ten minutes. If you don't receive them, please contact our service stuff, they will solve the problem for you. Furthermore, PCCP Study Guide includes the questions and answers, and you can get enough practice through them.

Palo Alto Networks Certified Cybersecurity Practitioner Sample Questions (Q84-Q89):

NEW QUESTION # 84
Which technique uses file sharing or an instant messenger client such as Meebo running over Hypertext Transfer Protocol (HTTP)?

- A. Tunneling within commonly used services
- B. Use of non-standard ports
- C. Port hopping
- D. Hiding within SSL encryption

Answer: A

Explanation:
Tunneling is a method of transporting data across a network using protocols that are not supported by that network. Tunneling works by encapsulating packets: wrapping packets inside of other packets. Tunneling within commonly used services is a technique that uses file sharing or an instant messenger client such as Meebo running over HTTP to bypass firewalls or other network restrictions. The data packets are encapsulated within HTTP packets and sent as normal web traffic. This way, the data packets can reach their destination without being blocked or detected by the network. References: What is tunneling? | Tunneling in networking | Cloudflare, What Is Network Tunneling & How Is It Used? | Traefik Labs, networking - What is HTTP tunneling? - Stack Overflow

NEW QUESTION # 85
Which type of LAN technology is being displayed in the diagram?

- A. Star Topology
- B. Mesh Topology
- C. Spine Leaf Topology
- D. Bus Topology

Answer: B

Explanation:
The diagram displays a mesh topology, where each device is connected to every other device in the network.
This topology is characterized by the multiple connections each node has, ensuring there is no single point of failure and providing redundant paths for data transmission, enhancing the reliability and resilience of the network. Mesh topology is one of the types of LAN technology that uses ethernet or Wi-Fi to connect devices12. References:

NEW QUESTION # 86
Which two network resources does a directory service database contain? (Choose two.)

- A. Users
- B. Terminal shell types on endpoints
- C. Services
- D. /etc/shadow files

Answer: A,C

Explanation:
A directory service is a database that contains information about users, resources, and services in a network.

NEW QUESTION # 87
What are two advantages of security orchestration, automation, and response (SOAR)? (Choose two.)

- A. Completely isolated system

- B. Long-term retention of logs
- C. Scripting of manual tasks
- D. Consistent incident handling

Answer: C,D

Explanation:
Scripting of manual tasks - SOAR platforms automate repetitive, manual security tasks through playbooks and scripting, improving response time and efficiency.
Consistent incident handling - SOAR ensures that incidents are managed in a standardized and repeatable manner, reducing errors and improving compliance.
Isolated system and log retention are not core advantages of SOAR.

NEW QUESTION # 88
Which security component can detect command-and-control traffic sent from multiple endpoints within a corporate data center?

- A. Next-generation firewall
- B. Personal endpoint firewall
- C. Stateless firewall
- D. Port-based firewall

Answer: A

Explanation:
A next-generation firewall (NGFW) is a security component that can detect command-and-control (C2) traffic sent from multiple endpoints within a corporate data center. A NGFW is a network device that combines traditional firewall capabilities with advanced features such as application awareness, intrusion prevention, threat intelligence, and cloud-based analysis. A NGFW can identify and block C2 traffic by inspecting the application layer protocols, signatures, and behaviors of the network traffic, as well as correlating the traffic with external sources of threat intelligence. A NGFW can also leverage inline cloud analysis to detect and prevent zero-day C2 threats in real-time. A NGFW can provide granular visibility and control over the network traffic, as well as generate alerts and reports on the C2 activity. References:
