

HQT-4160考試備考經驗，HQT-4160證照指南

Exam Type Qualification
Format Proctored, closed book exam
Credential Hitachi Vantara Qualified Professional - VSP 5000 Series Installation
Validity 3 years
Delivery Krylixon Webassessor System
Questions 35
Passing Score 65%
Duration 60 minutes
Cost US \$100 or equivalent in local currency (plus local tax, depending on location)
Supporting Material • 1090PI - Installing and Configuring the Hitachi VSP 5000 Series (5 day-ILT)

This test is designed for Hitachi Vantara employees and partners who install Hitachi Virtual Storage Platform (VSP) 5000 series systems. The test will validate that the successful candidate has knowledge and skills in installing, configuring and supporting VSP 5000 series systems at customer sites. This includes strong knowledge of the systems' hardware and associated program products, thorough understanding of installation and configuration procedures, and associated support activities. This test covers Hitachi Virtual Storage Platform models VSP 5100(H), VSP 5500(H), VSP 5200(H) and VSP 5600(H).

Audience: Hitachi Vantara Employee and Partner Installation Professionals

Hitachi VSP 5000 series installation professionals should have strong knowledge and skills in installing and supporting storage systems deployed as part of VSP 5000 series solutions implementation. They perform pre-installation checks and install, configure and test the systems so they can be handed over in an operational state to customers. They also provide post-installation services, including support, maintenance, updates and upgrades, and have knowledge of problem-determination and incident-resolution procedures, tools and techniques.

Test Objectives	
Section 1	System Architecture
1.1	Describe the different VSP 5000 models and their specifications.
1.2	Describe the VSP 5000 systems architecture, their components and their functions.
1.3	Describe the front-end design and layout of VSP 5000 systems and the supported Channel Boards (CHBs).
1.4	Describe the back-end design and layout of VSP 5000 systems and the supported Disk Adapters (DKAs).
Section 2	System Pre-installation and Installation
2.1	Describe the VSP 5000 storage systems pre-installation procedures and documentation.
2.2	Describe the VSP 5000 disk controllers (DKCs) interconnections.
2.3	Describe the "New Installation" procedure for VSP 5000 storage systems and when it is appropriate to use.
2.4	Describe the VSP 5000 storage systems network settings.
2.5	Describe the VSP 5000 storage microcode upgrade procedures.
Section 3	System Configuration
3.1	Describe the key steps involved in the installation of VSP 5000 storage systems.
3.2	Describe how to create Parity Groups on VSP 5000 storage systems.

* Depending on the location and course delivery format, this closed-book, proctored qualification test may also be offered and administered by the instructor at the conclusion of the supporting course.

我們NewDumps網站在全球範圍內赫赫有名，因為它提供給IT行業的培訓資料適用性特別強，這是我們NewDumps的IT專家經過很長一段時間努力研究出來的成果。他們是利用自己的知識和經驗以及摸索日新月異的IT行業發展狀況而成就的NewDumps Hitachi的HQT-4160考試認證培訓資料，通過眾多考生利用後反映效果特別好，並通過了測試獲得了認證，如果你是IT備考中的一員，你應當當仁不讓的選擇NewDumps Hitachi的HQT-4160考試認證培訓資料，效果當然獨特，不用不知道，用了之後才知道好。

Hitachi HQT-4160 Exam Overview:

Certification Vendor:	Hitachi Vantara
Exam Name:	Hitachi Vantara Qualified Professional - VSP 5000 Series Installation
Exam Number:	HQT-4160
Exam Duration:	60 minutes
Passing Score:	65%
Exam Price:	USD 100
Exam Format:	Multiple Choice, Multiple Response
Related Certifications:	Hitachi Vantara Qualified Professional - VSP 5000 Series Installation
Certificate Validity Period:	2 years
Available Languages:	English, Japanese

Real Exam Qty:	35
Sample Questions:	Hitachi HQT-4160 Sample Questions
Exam Way:	Online (Proctored) or Authorized Testing Centers
Pre Condition:	Recommended training: Hitachi Vantara VSP 5000 Series Installation and Configuration (TCI2624). Prior knowledge of storage systems and Hitachi Vantara products is beneficial.

精準的HQT-4160考試備考經驗，高質量的考試資料幫助妳快速通過HQT-4160考試

NewDumps提供的資料是NewDumps擁有超過10年經驗的Hitachi精英通過研究與實踐而得到的。NewDumps有你們需要的最新最準確的考試資料。NewDumps正是為了你們的成功而存在的，選擇NewDumps就等於選擇成功。如果想順利通過HQT-4160考試，NewDumps是你不二的選擇。

HQT-4160 認證考試是一種供應商中立的認證，旨在幫助 IT 專業人員提高其 Hitachi Vantara 存儲系統的技能 and 知識。認證考試旨在驗證 IT 專業人員的技能 and 知識，包括系統管理員、存儲管理員和網絡管理員。認證考試是 IT 專業人員展示其在 Hitachi Vantara 存儲系統方面的專業知識並在競爭激烈的 IT 工作市場中脫穎而出的絕佳途徑。

最新的 Hitachi Vantara Qualified Professional HQT-4160 免費考試真題 (Q38-Q43):

問題 #38

Which two part replacements in a VSP 5000 system require blocking the controller? (Choose two.)

- A. Cache Flash Module (CFM)
- **B. Controller PCB**
- C. Hitachi Interconnect Edge (HIE)
- **D. Cache DIMM**

答案: **B,D**

解題說明:

Controller PCB

Replacing the Controller PCB requires blocking the controller to ensure system integrity and prevent data loss during the hardware change.

Cache DIMM

Cache DIMMs are part of the controller's critical memory subsystem, so the controller must be blocked before replacing any cache DIMMs to avoid corruption and ensure a safe replacement process.

問題 #39

Which two components are different between VSP 5500 and VSP 5600 systems? (Choose two.)

- **A. DKC Power Supply (DKCPS)**
- B. Interconnect Switch (ISW)
- C. Hitachi Interconnect Edge (HIE)
- **D. Controller Board**

答案: **A,D**

解題說明:

Controller Board

The VSP 5600 controllers use upgraded blades featuring dual 10-core Cascade Lake CPUs and two Compression Accelerator Modules per controller, hardware not present on the VSP 5500 controllers, delivering significantly higher processing and ADR offload capabilities.

DKC Power Supply (DKCPS)

A non-disruptive Data-in-Place upgrade from VSP 5500 to VSP 5600 requires swapping each VSP 5500's DKCPS units for the VSP 5600-specified power supplies, as the newer models use a different PSU design.

問題 #40

You need to perform a microcode upgrade on a VSP 5500H and you first want to backup the configuration. How do you accomplish this task?

- A. Use Copy Config Files under the Initial Setting menu of the SVP GUI.
- B. Connect a USB drive to the SVP and use Copy Config Files.
- C. Use Copy Config Files under the Maintenance Utility.
- D. Connect the maintenance laptop to the SVP port and use Copy Config Files.

答案: A

解題說明:

To back up the configuration before a microcode upgrade on a VSP 5500H, you should use the "Copy Config Files" option available under the Initial Setting menu in the SVP GUI. This ensures a proper backup of system settings and configuration.

問題 #41

What are two ways to identify that a problem occurred on a VSP 5000 system? (Choose two.)

- A. An Alert Information Message (AIM) was generated and communicated by SNMP to notify the customer.
- B. The Master Alarm LED at the top right of the front door is lit.
- C. The Remote Ops SVP Agent called home and a support case was generated.
- D. A SIM was generated and could be displayed using the SVP GUI.

答案: B,D

解題說明:

The Master Alarm LED at the top right of the front door is lit.

A lit Master Alarm LED is a direct hardware indicator that a problem has occurred on the system.

A SIM was generated and could be displayed using the SVP GUI.

A Service Information Message (SIM) indicates an event or error and can be viewed via the SVP GUI, helping identify and diagnose system issues.

問題 #42

Which two statements are correct regarding the "New Installation" procedure on a VSP 5000 system? (Choose two.)

- A. You can perform the "New Installation" procedure if a newly installed system does not power on and the Hitachi Vantara Technical Support instructs you to do so.
- B. Hitachi Vantara recommends not to perform the "New Installation" procedure on second-hand systems.
- C. Customer Engineers (CEs) should always perform the "New Installation" procedure when a new unit arrives at customer site.
- D. A customer can make a request to Hitachi Vantara Technical Support for a "New Installation" procedure, if they want to reinitialize a system entirely so all former data will be erased.

答案: B,D

解題說明:

Hitachi Vantara recommends not to perform the "New Installation" procedure on second-hand systems.

Performing the "New Installation" procedure on used or second-hand systems is not recommended due to potential configuration, licensing, and warranty concerns.

A customer can make a request to Hitachi Vantara Technical Support for a "New Installation" procedure, if they want to reinitialize a system entirely so all former data will be erased.

Customers may request Technical Support to perform a "New Installation" to fully reinitialize the system, which erases all existing data and restores factory settings.
