CompTIA 220-1101 Test Quiz - Related 220-1101 Certifications

We try our best to renovate and update our CompTIA 220-1101 study materials in order to help you fill the knowledge gap during your learning process, thus increasing your confidence and success rate. At the same time, CompTIA 220-1101 Preparation baidumps can keep pace with the digitized world by providing timely application. You will never fell disappointed with our 220-1101 exam quiz.

CompTIA A+ Certification Exam: Core 1 Sample Questions (Q764-Q769):

NEW QUESTION # 764

A company wants to use client-side visualization for application testing. Which of the following configurations would BEST support this goal?

A)

B)

C)

D)

- A. Option C
- B. Option D
- C. Option B
- **D. Option A**

Answer: D

NEW QUESTION # 765

A technician builds a custom computer for a customer, installing a high-end video card that draws 550W at maximum load. After a day of using the computer, the customer notices video loss and a burning smell.

Which of the following should the technician troubleshoot first?

- A. Chassis fan-speed settings
- B. RAM overclock configuration in the BIOS
- **C. ATX 3.0 16-pin connector**
- D. Video card seating in the PCIe slot

Answer: C

Explanation:

The ATX 3.0 16-pin connector provides power to high-end graphics cards, and a poor connection could lead to power issues and burning smells.

NEW QUESTION # 766

A technician goes to a classroom to troubleshoot a projector that occasionally powers off. The technician recreates the issue and notices the projector will not power back on until approximately 15 minutes have passed. After 15 minutes of being powered on, the projector shuts off again. Which of the following should the technician perform NEXT to resolve the issue?

- A. Replace the bulb.
- **B. Clean the filter.**
- C. Adjust the standby timeout.
- D. Check the power cable connection.

Answer: B

Explanation:

Explanation

Based on the given information, it seems that the projector is experiencing issues with overheating or a faulty power supply. The fact that it shuts off and cannot be turned back on until it has cooled down for 15 minutes suggests that the projector is overheating or there is a problem with the power supply. Therefore, the next logical step would be to clean the filter to ensure proper ventilation and airflow, as a dirty filter can cause overheating.

NEW QUESTION # 767

Which of the following would MOST likely be used to connect one or more devices to the internet in a SOHO?

- A. Wireless access point
- **B. Router**
- C. Ethernet gateway

- D. Hub

Answer: B

Explanation:

A router is a device that connects one or more networks, such as a home or small office network, to the internet. It allows multiple devices to share a single internet connection and provides network address translation (NAT) to enable communication between the devices on the local network and the internet. A hub, Ethernet gateway, or wireless access point does not provide this functionality. A router is the most likely device to be used to connect one or more devices to the internet in a SOHO. A router can provide network address translation (NAT), firewall protection, and other features that are important for securing and managing a network. NEW QUESTION # 768

A technician identified an issue on a workstation, obtained details from the user, and made a backup of the system. Which of the following should the technician do NEXT?

- A. Document the findings, actions, and outcomes.
- B. Design a plan of action to resolve the issue and implement the solution.
- C. Establish a theory of probable cause, researching internally or externally as needed.
- **D. Determine the next steps to resolve the issue and document it.**

Answer: D

NEW QUESTION # 769
