

Latest DP-300 Test Cram | Latest DP-300 Exam Guide

What's more, part of that Real4test DP-300 dumps now are free: https://drive.google.com/open?id=1ZnZZkoz00AP29rLy_Xh-vbMcPxcdj0ji

Nowadays, having knowledge of the DP-300 study braindumps become widespread, if you grasp solid technological knowledge, you are sure to get a well-paid job and be promoted in a short time. According to our survey, those who have passed the exam with our DP-300 test guide convincingly demonstrate their abilities of high quality, raise their professional profile, expand their network and impress prospective employers. Most of them give us feedback that they have learned a lot from our DP-300 Exam Guide and think it has a lifelong benefit. They have more competitiveness among fellow workers and are easier to be appreciated by their boss.

Query Performance Optimization

- Reviewing index design and database table
 - Identifying issues on data quality and data duplication
 - Database tables
 - Assessing index design
 - Validating data types
 - Recommending table and index storage including file groups
 - Evaluation of table partitioning strategy
 - Compression for indexes and tables
- Reviewing query plans
 - Determining the ideal execution plan
 - Identification of problem sections in execution plans
 - Extraction of query plans from the Query Store
- Evaluation of Performance improvements
 - Determining the ideal Dynamic Management Views (DMVs) to collect information relating query performance
 - Using DMVs to identify performance issues
 - Implementation and identification of index changes for queries
 - Assessing the importance of hints in query performance
 - Defining query construct modifications

Microsoft DP-300: Administering Relational Databases on Microsoft Azure exam is a challenging yet rewarding certification for IT professionals looking to enhance their skills and advance their career in database administration. With the right training and

preparation, candidates can successfully pass the exam and demonstrate their expertise in managing databases on the Azure platform.

Latest DP-300 Exam Guide - DP-300 Exam Questions And Answers

The test software used in our products is a perfect match for Windows' DP-300 learning material, which enables you to enjoy the best learning style on your computer. Our DP-300 study materials also use the latest science and technology to meet the new requirements of authoritative research material network learning. Unlike the traditional way of learning, the great benefit of our DP-300 Study Materials are that when the user finishes the exercise, he can get feedback in the fastest time.

Another benefit of earning the DP-300 Certification is the increased job opportunities and higher salaries that come with it. According to Microsoft, individuals who hold this certification can expect to earn an average salary of \$116,591 per year.

Microsoft Administering Relational Databases on Microsoft Azure Sample Questions (Q92-Q97):

NEW QUESTION # 92

You have an Azure SQL database named DB1 that contains two tables named Table1 and Table2. Both tables contain a column named a Column1. Column1 is used for joins by an application named App1.

You need to protect the contents of Column1 at rest, in transit, and in use.

How should you protect the contents of Column1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Reference:

<https://docs.microsoft.com/en-us/sql/relational-databases/security/encryption/always-encrypted-database-engine>

NEW QUESTION # 93

You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains a user named user1@contoso.com and an Azure SQL managed instance named SQLMI1.

You need to ensure that user1@contoso.com can create logins in SQLMI1 that map to Azure AD service principals.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

1 - Grant SQLMI1 read access to Azure AD.

2 - Run CREATE LOGIN user1@.....

3 - Run ALTER SERVER ROLE securityadmin ADD MEMBER user1@contoso.com

Reference:

<https://docs.microsoft.com/en-us/azure/azure-sql/managed-instance/aad-security-configure-tutorial>

NEW QUESTION # 94

Drag and Drop Question

You create a new Azure SQL managed instance named SQL1 and enable Database Mail extended stored procedures.

You need to ensure that SQL Server Agent jobs running on SQL1 can notify administrators when a failure occurs.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation:

The database mail configuration wizard would start the profile creation first, however, need to complete the account creation first before the profile creation can be completed.

NEW QUESTION # 95

You have an Azure SQL Database managed instance named sqldbmi1 that contains a database name Sales.

You need to initiate a backup of Sales.

How should you complete the Transact-SQL statement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: TO URL = 'https://storage1.blob.core.windows.net/blob1/Sales.bak' Native database backup in Azure SQL Managed Instance.

You can backup any database using standard BACKUP T-SQL command:

BACKUP DATABASE tpcc2501

TO URL = 'https://myacc.blob.core.windows.net/testcontainer/tpcc2501.bak' WITH COPY_ONLY Box 2: WITH COPY_ONLY Reference:

<https://techcommunity.microsoft.com/t5/azure-sql-database/native-database-backup-in-azure-sql-managed-instance/ba-p/386154>

NEW QUESTION # 96

You have an Azure SQL database named DB1 that contains two tables named Table1 and Table2. Both tables contain a column named a Column1. Column1 is used for joins by an application named App1.

You need to protect the contents of Column1 at rest, in transit, and in use.

How should you protect the contents of Column1? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Column encryption Key

Always Encrypted uses two types of keys: column encryption keys and column master keys. A column encryption key is used to encrypt data in an encrypted column. A column master key is a key-protecting key that encrypts one or more column encryption keys.
