We consider the actual situation of the test-takers and provide them with high-quality AP-202 learning materials at a reasonable price. Choose the AP-202 test guide absolutely excellent quality and reasonable price, because the more times the user buys the AP-202 test guide, the more discounts he gets. In order to make the user's whole experience smoother, we also provide a thoughtful package of services. Once users have any problems related to the AP-202 learning questions, our staff will help solve them as soon as possible.

## **Salesforce B2B Commerce for Developers Accredited Professional Sample Questions (Q72-Q77):**

### NEW QUESTION # 72

Which three considerations should a developer keep in mind when creating a tax provider?

- A. How to handle errors
- B. Success criteria
- C. Whether an AppExchange package already exists
- D. Whether to use JSON or XML
- E. What events to fire in the Lightning Web Component

**Answer: A,B,D**

Explanation:

When creating a tax provider in Salesforce B2B Commerce, developers should consider the data format (JSON or XML) for interoperability with the tax service, define clear success criteria to ensure accurate tax calculations, and implement robust error handling to manage exceptions and failures gracefully. Salesforce B2B Commerce documentation emphasizes the importance of these considerations for integrating external services, ensuring reliability and consistency in tax calculations across different jurisdictions and scenarios.

### NEW QUESTION # 73

Which event should be triggered when user facing info, warning or error messages need to be displayed on a Visualforce page?

- A. displayPageMessage
- B. displayMessage
- C. showMessage
- D. pageMessage

**Answer: D**

Explanation:

The event that should be triggered when user facing info, warning or error messages need to be displayed on a Visualforce page is pageMessage. This event is triggered by the displayPageMessage method of the CCRZ.util class, which is a utility class that provides various helper methods for common tasks. The event can be used to display a message on the page with a specified type, title, and text. For example, CCRZ.util.displayPageMessage('error', 'Oops!', 'Something went wrong.') will trigger the pageMessage event and display an error message on the page. Salesforce B2B Commerce and D2C Commerce Developer Guide, Events, Util Class

### NEW QUESTION # 74

How is a price group dynamically set?

- A. By extending the ccApiPriceList API
- B. By using contract pricing
- C. By extending the cc\_hk\_pricing hook
- D. By overriding the ccLogicProductPrice class

**Answer: C**

Explanation:

A price group can be dynamically set by extending the cc\_hk\_pricing hook. This hook allows modifying the price group based on various factors, such as the user, cart, product, or storefront. For example, the hook can apply a different price group for a specific product category or for a specific user segment.

### NEW QUESTION # 75

What are two advantages of using Lightning Data Service?

- A. Combines and de-duplicates server calls
- B. Communicates with other components
- C. Loads record data progressively
- D. Converts between different data formats

**Answer: A,C**

Explanation:

Two advantages of using Lightning Data Service are that it combines and de-duplicates server calls and that it loads record data progressively. Lightning Data Service is a service that provides access to Salesforce data and metadata in Lightning web components. It optimizes performance and minimizes server round trips by caching data on the client side and sharing data across components. It also combines and de-duplicates server calls by batching requests for the same record or object and returning a single response. It also loads record data progressively by returning available cached data first and then fetching updated data from the server asynchronously. Communicating with other components and converting between different data formats are not advantages of using Lightning Data Service, as they are not related to its functionality or features. Salesforce Lightning Web Components Developer Guide: Lightning Data Service, Lightning Web Components Developer Guide: Work with Salesforce Data

#### **NEW QUESTION # 76**

Which of these is a key pattern leveraged when building Lightning Web Components? 39m 36s

- A. Normalization
- B. Juggling
- **C. Composition**
- D. Inventory

**Answer: C**

Explanation:

Composition is a key pattern in building Lightning Web Components (LWCs). This approach involves creating small, reusable components that can be assembled to form more complex interfaces. This pattern promotes modularity, reusability, and maintainability in the development of web components, aligning with web standards and best practices.

#### **NEW QUESTION # 77**

.....

Since it is obvious that different people have different preferences, we have prepared three kinds of different versions of our AP-202 practice test, PDF, Online App and software version. Last but not least, our customers can accumulate AP-202 exam experience as well as improving their exam skills in the mock exam. What's more, our software version of AP-202 practice materials can best simulate the real exam, but it can only be operated under the Windows operation system. I strongly believe that you can find the version you want in multiple choices of our AP-202 practice test.
