Salesforce Certified Platform Developer Sample Questions (Q141-Q146):

NEW QUESTION # 141

An org tracks customer orders on an Order object and the items of an Order on the Line Item object. The Line Item object has a MasterDetail relationship to the order object. A developer has a requirement to calculate the order amount on an Order and the line amount on each Line item based on quantity and price.

What is the correct implementation?

- A. Implement the Line amount as a currency field and the order amount as a SUM formula field.
- B. Write a single before trigger on the Line Item that calculates the item amount and updates the order amount on the Order.
- C. Implement the line amount as a numeric formula field and the order amount as a roll-up summary field.
- D. Write a process on the Line item that calculates the item amount and order amount and updates the field on the Line Item and the order.

Answer: C

NEW QUESTION # 144

What can be used to override the Account's standard Edit button for Lightning Experience?

- A. Lightning flow

- B. Lightning component
- C. Lightning action
- D. Lightning page

Answer: B

Explanation:

A Lightning Component can be used to override the Account's standard Edit button for Lightning Experience. This allows the developer to create a custom page with custom fields and custom functionality that can be used instead of the standard Edit page. It also allows for the creation of custom navigation and buttons to make the user experience more intuitive and efficient.
