Hitachi Vantara Qualified Professional - VSP 5000 Series Installation Sample Questions (Q56-Q61):

NEW QUESTION # 56
Which tool is used for part replacement in a VSP 5000 system?

- A. Maintenance Utility
- B. Hi-Track
- C. Storage Navigator
- D. Web Console

Answer: A

Explanation:
The Maintenance Utility is the designated tool for performing part replacement operations in a VSP 5000 system. It provides the necessary procedures to safely block, replace, and unblock hardware components.

NEW QUESTION # 57
Which two manuals should be used when troubleshooting on a VSP 5000 system? (Choose two.)

- A. Troubleshooting manual
- B. Maintenance manual
- C. Service Guide
- D. Installation manual

Answer: A,B

Explanation:
Troubleshooting manual
This manual provides detailed procedures and steps for diagnosing and resolving issues on the VSP 5000 system.
Maintenance manual
The Maintenance manual contains instructions and information needed for maintenance activities, including troubleshooting steps and part replacement guidance.

NEW QUESTION # 58
In a VSP 5100 a drive in a RAID5 Parity Group has failed and has been blocked by the microcode. As a result, which process gets automatically started?

- A. Copy Back
- B. Dynamic Sparing
- C. Sparing Copy
- D. Correction Copy

Answer: D

Explanation:
When a drive in a RAID5 Parity Group fails and is blocked by the microcode in a VSP 5100, the Correction Copy process is automatically started to rebuild the data onto a spare drive.

NEW QUESTION # 59
How does the management software improve the operation of VSP 5000 systems?

- A. By simplifying user access controls
- B. By increasing the energy consumption
- C. By automating routine tasks
- D. By reducing physical maintenance needs

Answer: C

Explanation:
The Hitachi VSP 5000 management software provides a centralized interface to monitor, configure, and manage the storage system.
One of its key benefits is automation of routine operational tasks, such as:
Creating and provisioning storage volumes
Assigning storage to hosts
Monitoring system health and generating alerts
Performing replication or backup scheduling
Rebuilding or rebalancing RAID groups automatically
Automation reduces manual intervention, minimizes errors, and improves operational efficiency.

NEW QUESTION # 60
A customer wants to upgrade a VSP 5500 to a VSP 5600. Which two actions are required for this upgrade? (Choose two.)

- A. Replace all the controller boards.
- B. Replace all the Power Supplies with more powerful ones.
- C. Replace the CPUs on all the controller boards.
- D. Replace all the memory DIMMs.

Answer: A,B

Explanation:
Replace all the controller boards.
Upgrading from VSP 5500 to VSP 5600 requires installing new controller boards, as the 5600 uses a different and more advanced controller architecture.
Replace all the Power Supplies with more powerful ones.
The upgrade also requires replacing the power supplies with models that are compatible with and can support the power requirements of the VSP 5600 controllers.

NEW QUESTION # 61
