New CCFA-200b Real Test - CCFA-200b Reliable Test Price

It is apparent that a majority of people who are preparing for the CCFA-200b exam would unavoidably feel nervous as the exam approaching, If you are still worried about the coming exam, since you have clicked into this website, you can just take it easy now, I can assure you that our company will present the antidote for you--our CCFA-200b Learning Materials. As the most popular study materials in the market, our CCFA-200b practice guide can give you 100% pass guarantee. You will feel grateful if you choose our CCFA-200b training questions.

CrowdStrike Falcon Administrator Sample Questions (Q159-Q164):

NEW QUESTION # 159
When a Linux host is in Reduced Functionality Mode (RFM) what telemetry and protection is still offered?

- A. The sensor provides no protection, and only collects Sensor Heart Beat events
- B. The sensor would function as normal
- C. The sensor would provide protection as normal, without event telemetry
- D. The sensor would provide minimal protection

Answer: D

Explanation:

When a Linux host is in Reduced Functionality Mode (RFM), the sensor would provide minimal protection. RFM is a mode that limits the sensor's functionality due to license expiration, network connectivity loss, or certificate validation failure. When a Linux sensor is in RFM, it will only provide basic prevention capabilities, such as blocking known malware hashes and preventing script execution from the /tmp directory. The sensor will not send any telemetry or detection events to the Falcon platform, and will not receive any policy or update changes from the Falcon cloud.

NEW QUESTION # 160

Even though you are a Falcon Administrator, you discover you are unable to use the "Connect to Host" feature to gather additional information which is only available on the host. Which role do you need added to your user account to have this capability?

- A. Endpoint Manager
- B. Real Time Responder
- C. Falcon Investigator
- D. Remediation Manager

Answer: B

Explanation:

The Real Time Responder role allows users to use the "Connect to Host" feature to gather additional information from the host, such as running processes, registry keys, files, etc. The other roles do not have this capability.

NEW QUESTION # 161

When a host belongs to more than one host group, how is sensor update precedence determined?

- A. Groups have no impact on sensor update policies
- B. All of the host's groups are examined in aggregate and the policy with highest precedence is applied to the host
- C. The highest precedence policy from the most important group is applied to the host
- D. Sensors of hosts that belong to more than one group must be manually updated

Answer: B

Explanation:

The option that describes how sensor update precedence is determined when a host belongs to more than one host group is that all of the host's groups are examined in aggregate and the policy with highest precedence is applied to the host. A Sensor Update policy is a policy that controls how and when the Falcon sensor is updated on a host. You can create and assign custom Sensor Update policies to different hosts or groups in your environment. Each Sensor Update policy has a precedence value, which determines its priority over other policies. The higher the precedence value, the higher the priority. If a host belongs to more than one host group, each with a different Sensor Update policy assigned, then all of the host's groups are examined in aggregate and the policy with highest precedence among them is applied to the host.

NEW QUESTION # 162

Which command would tell you if a Falcon Sensor was running on a Windows host?

- A. sc.exe query falcon
- B. sc.exe query csagent
- C. cswindiag.exe -status
- D. netstat.exe -f

Answer: B

Explanation:

The command that would tell you if a Falcon Sensor was running on a Windows host is sc.exe query csagent. This command will show the status of the csagent service, which is responsible for running the sensor on Windows systems. The output of this command will indicate if the service is running, stopped, or paused. If the service is running, the sensor is also running.

NEW QUESTION # 163

Your leadership wants controls in place for immediate action on any Overwatch detections.

What should you do to ensure the host is contained quickly and notifies the appropriate staff?

- A. Create a Fusion SOAR workflow to contain the host and email the Overwatch team
- B. Create a Fusion SOAR workflow to trigger on an Overwatch detection and set it to block the detection
- C. Create a Fusion SOAR workflow to create a detection for Overwatch and email the SOC team
- D. Create a Fusion SOAR workflow using the Overwatch playbook to contain the host and email the SOC team

Answer: D

NEW QUESTION # 164

......

Only 20-30 hours on our CCFA-200b learning guide are needed for the client to prepare for the test and it saves our client's time and energy. Most people may wish to use the shortest time to prepare for the test and then pass the test with our CCFA-200b study materials successfully because they have to spend their most time and energy on their jobs, learning, family lives and other important things. Our CCFA-200b Study Materials can satisfy their wishes and they only spare little time to prepare for exam.
