

C_SEC_2405최신시험, C_SEC_2405최신시험대비공부자료

요즘 같은 인재가 많아지는 사회에도 많은 업계에서는 아직도 관련인재가 부족하다고 합니다.it업계에서도 이러한 상황입니다.SAP C_SEC_2405시험은 it인증을 받을 수 있는 좋은 시험입니다. 그리고Fast2test는SAP C_SEC_2405덤프를 제공하는 사이트입니다.

SAP C_SEC_2405 시험요강:

주제	소개
주제 1	Public Cloud User and Role Management: This section of the exam measures the skills of SAP IT cloud Professionals and covers managing users and roles in public cloud environments for SAP applications.
주제 2	Infrastructure Security and Authentication: This section of the exam measures the skills of SAP IT Professionals and covers infrastructure security measures and authentication methods used in SAP environments. It emphasizes protecting systems from unauthorized access and ensuring secure user authentication.
주제 3	User Administration: This section of the exam measures the skills of SAP Administrators and covers user administration tasks within SAP systems. It includes managing user accounts, roles, and profiles efficiently. A critical skill evaluated is maintaining accurate user records to support security and compliance efforts.
주제 4	Governance, Compliance, and Cybersecurity: This section of the exam measures the skills of compliance officers and covers the principles of governance, compliance, and cybersecurity of SAP systems. It includes understanding regulatory requirements and best practices for maintaining security. A critical skill evaluated is ensuring organizational compliance with relevant laws and policies.

주제 5	• SAP Fiori Authorizations and SAP S • 4HANA: This section of the exam measures the skills of SAP Developers and covers authorization management specific to SAP Fiori applications within SAP S • 4HANA. It emphasizes configuring authorizations for Fiori apps to ensure appropriate access levels. A key skill assessed is understanding Fiori authorization concepts to enhance user experience.

SAP C_SEC_2405최신 시험대비 공부자료 & C_SEC_2405합격보장 가능 덤프

Fast2test에서 출시한 SAP인증 C_SEC_2405덤프는SAP인증 C_SEC_2405시험에 대비하여 IT전문가들이 제작한 최신버전 공부자료로서 시험패스율이 100%입니다.Fast2test는 고품질 SAP인증 C_SEC_2405덤프를 가장 친근한 가격으로 미래의 IT전문가들께 제공해드립니다. Fast2test의 소원대로 멋진 IT전문가도 거듭나세요.

최신 SAP Certified Associate C_SEC_2405 무료샘플문제 (Q16-Q21):

질문 # 16

Which entities share data with Business Partners in the S/4HANA Business User Concept? Note: There are 2 correct answers to this question.

- A. Employer
- B. Administrator
- C. User
- D. Employee

정답: C,D

설명:

In the SAP S/4HANA Business User Concept, the entities that share data with Business Partners are User and Employee. The User entity represents the technical user account in the system, defined in user master records, and is linked to Business Partners to associate system access with business roles and authorizations. The Employee entity represents the human resource data of an individual, such as their organizational assignment or job role, and is synchronized with Business Partners to ensure that user access aligns with their employment details. This integration ensures that Business Partners, which serve as a central entity for managing business relationships, have consistent data for access control and business processes. The Employer entity is not directly linked to Business Partners, as it represents the organization, not an individual.

Similarly, Administrator is a role or user type, not an entity sharing data with Business Partners. This data- sharing mechanism supports seamless identity and access management, enhancing security and operational alignment in SAP S/4HANA systems.

질문 # 17

Which object type is assigned to activated OData services in transaction SU24?

- A. IWSG
- B. IWSV
- C. G4BA
- D. HTTP

정답: B

설명:

In SAP systems, activated OData services are assigned the object type IWSV (SAP Gateway Business Suite Enablement-Service) in transaction SU24. SU24 is used to maintain authorization defaults for transactions and services, and for OData services, which power SAP Fiori apps, the IWSV object type represents the service definitions required for front-end and back-end communication. When an OData service is activated, its authorization requirements, such as the S_SERVICE authorization object with the SRV_NAME field, are linked to the IWSV type in SU24, ensuring that these are proposed when the service is added to a PFCG role.

The HTTP object type is not used for OData services, G4BA relates to OData V4 services, and IWSG represents service group metadata, not activated services. By associating OData services with IWSV in SU24, SAP ensures that authorization maintenance is streamlined, enabling secure and efficient access to Fiori apps while aligning with the system's authorization framework.

질문 # 18

Which user types can log on to the SAP S/4HANA system in interactive mode? Note: There are 2 correct answers to this question.

- A. Communication User
- B. System User
- C. Service User
- D. Dialog User

정답: C,D

설명:

In SAP S/4HANA, the user types that can log on in interactive mode are Dialog User and Service User.

Dialog Users are designed for human interaction, allowing individuals to log on via the SAP GUI or Fiori launchpad to perform tasks like data entry or reporting. They support full interactive access, including personalized sessions and user-specific settings. Service Users, while primarily used for web-based or anonymous access (e.g., via Fiori apps or web services), can also support limited interactive logon in specific scenarios, such as testing or administrative tasks, depending on system configuration. System Users are intended for background processes, like batch jobs, and do not support interactive logon. Communication Users are used for machine-to-machine interactions, such as API calls, and are not configured for interactive access. These distinctions ensure that interactive access is restricted to appropriate user types, enhancing security by limiting human logon capabilities to Dialog and Service Users while aligning with SAP's user management framework.

질문 # 19

When planning an authorization concept for your SAP S/4HANA Cloud Public Edition implementation, what rules must you consider? Note: There are 2 correct answers to this question.

- A. Business catalogs can be assigned directly to a business user.
- B. Business catalogs can be assigned directly to a business role.
- C. Business roles can be assigned directly to a business user.
- D. SAP Fiori apps, dashboards, and displays can be assigned directly to a business role.

정답: B,C

설명:

* Context: SAP S/4HANA Cloud Public Edition requires careful planning of the authorization concept to ensure proper access control.

* Solution Explanation:

* C: Business roles serve as containers for catalogs and can be assigned directly to users.

* D: Business catalogs are assigned to business roles, defining the scope of access.

질문 # 20

Which cryptographic libraries are provided by SAP? Note: There are 2 correct answers to this question.

- A. SAPCRYPTOLIB
- B. CommonCryptoLib
- C. Cryptlib
- D. SecLib

정답: A,D

설명:

SAP provides cryptographic libraries to ensure secure communication and data protection in its systems:

- [illegible]
