Real4Prep can provide the leading Salesforce training techniques to help you pass Salesforce Certification ED-Con-101 Exam.

## Salesforce Certified Education Cloud Consultant Sample Questions (Q190-Q195):

### NEW QUESTION # 190

A university's IT department uses a version control-based process for its system development and enhancement. The department wants to test the new features the consultant has configured in a dedicated, short term Salesforce environment. What should the consultant use to meet the requirement?

- A. Developer Edition org
- **B. Scratch org**
- C. Partial Copy sandbox
- D. Full sandbox

### Answer: B

#### Explanation:

A scratch org is a dedicated, short term Salesforce environment that the consultant can use to test the new features they have configured in a version control-based process. A scratch org is a source-driven and disposable deployment of Salesforce code and metadata. A scratch org is fully configurable, allowing the consultant to emulate different Salesforce editions and features. A

Developer Edition org, a full sandbox, and a partial copy sandbox are not dedicated, short term Salesforce environments that can be used in a version control-based process. Reference:

[https://developer.salesforce.com/docs/atlas.en-us.sfdx\\_dev.meta/sfdx\\_dev/sfdx\\_dev\\_scratch\\_orgs.htm](https://developer.salesforce.com/docs/atlas.en-us.sfdx_dev.meta/sfdx_dev/sfdx_dev_scratch_orgs.htm)

<https://trailhead.salesforce.com/en/content/learn/modules/scratch-orgs>

### NEW QUESTION # 191

The Undergraduate Advising department plans to implement Student Success Hub and Pathways in a new org. The system admin wants to use the recommended setup for external users.

Which security setting should the consultant configure?

- A. Create an Account sharing rule to provide Read access based on record type.
- B. Change the default Program Plan sharing setting to Private.
- C. **Create a Program Plan sharing rule to provide Read access based on record type.**

**Answer: C**

Explanation:

The consultant should configure a security setting to create a Program Plan sharing rule to provide Read access based on record type for the system admin who wants to use the recommended setup for external users when implementing Student Success Hub and Pathways in a new org for the Undergraduate Advising department. A sharing rule is a security setting that allows users to extend sharing access to users in public groups, roles, or territories. A Program Plan sharing rule can help the system admin provide Read access to external users based on record type by granting access to specific Program Plan records that are relevant or appropriate for external users, such as students or advisors. Creating an Account sharing rule to provide Read access based on record type, changing the default Program Plan sharing setting to Private, or creating a custom Permission Set for external users are not security settings that the consultant should configure for the system admin who wants to use the recommended setup for external users when implementing Student Success Hub and Pathways in a new org for the Undergraduate Advising department. ### NEW QUESTION # 192

A university completed its first implementation of Salesforce. The university wants to deliver additional functionality in smaller units through an iterative process. New functions will be enhanced and refined based on feedback.

Which approach should the consultant recommend?

- A. **Agile**
- B. Waterfall
- C. Work Breakdown Structure

**Answer: A**

Explanation:

The consultant should recommend Agile as an approach to deliver additional functionality in smaller units through an iterative process for the university that completed its first implementation of Salesforce. Agile is a project management methodology that focuses on delivering value to customers in short and frequent iterations, incorporating feedback and changes along the way. Agile can help the university deliver additional functionality in smaller units through an iterative process by using features such as user stories, sprints, or scrum meetings. Work Breakdown Structure and Waterfall are not approaches that can deliver additional functionality in smaller units through an iterative process for the university that completed its first implementation of Salesforce. ### NEW QUESTION # 193

The Advancement office wants to replace its legacy system with Salesforce and has hired a consultant to help build a CRM strategy. Which recommendation should the consultant make to meet this requirement?

- A. Implement Nonprofit Success Pack (NPSP).
- B. Start solution design during a discovery session.
- C. **Prioritize the organization's initiatives.**

**Answer: C**

Explanation:

A CRM strategy is a plan that outlines how an organization will use Salesforce to achieve its goals and objectives. A consultant should recommend prioritizing the organization's initiatives as part of the CRM strategy, as this will help align the Salesforce solution with the most important and urgent needs of the Advancement office, such as fundraising, donor engagement, alumni relations, etc. Prioritizing the initiatives will also help define the scope, timeline, and budget of the project, as well as the key stakeholders, success metrics, and risks involved<sup>2</sup>. Implementing Nonprofit Success Pack (NPSP) is a possible solution option, but not a recommendation for the CRM strategy. Starting solution design during a discovery session is a project management best practice, but not a recommendation for the CRM strategy.

**NEW QUESTION # 194**

A university plans to expand its Salesforce Education Data Architecture (EDA) environment to support student services for all of its schools. The university want Contact's family information.

Which action should the consultant take?

- A. Set the Default Account Model to Administrative.
- B. Populate the Account field with the Household record.
- C. Set the Default Account Model to Household.

**Answer: C**

Explanation:

Setting the Default Account Model to Household will allow the university to capture Contact's family information using Household Accounts, which are automatically created when new Contacts are added. Setting the Default Account Model to Administrative will create Administrative Accounts, which are used to group Contacts by their affiliation to an educational institution or organization, not by their family relationship. Populating the Account field with the Household record is not a valid action because the Account field is read-only and automatically populated based on the Default Account Model. Reference:
