Exam DCA Simulator Free | DCA Test Certification Cost

If you are determined to purchase our Docker Certified Associate (DCA) Exam DCA valid exam collection materials for your companies, if you pursue long-term cooperation with site, we will have some relate policy. Firstly we provide one-year service warranty for every buyer who purchased Docker DCA valid exam collection materials.

Docker Certified Associate (DCA) Exam Sample Questions (Q171-Q176):

NEW QUESTION # 171

Will a DTR security scan detect this?

Solution. image configuration poor practices, such as exposed ports or inclusion of compilers in production images

- A. No
- B. Yes

Answer: A

Explanation:

Explanation

A DTR security scan does not detect image configuration poor practices, such as exposed ports or inclusion of compilers in production images. A DTR security scan is a feature that scans images for known vulnerabilities in the software packages or dependencies that are installed in the image. A DTR security scan does not check for image configuration poor practices, such as exposing unnecessary ports or including unnecessary tools in production images. To avoid image configuration poor practices, you

should follow the Dockerfile best practices and use multi-stage builds to optimize your images. References:
<https://docs.docker.com/ee/dtr/user/manage-images/scan-images-for-vulnerabilities/>,
https://docs.docker.com/develop/develop-images/dockerfile_best-practices/,
<https://docs.docker.com/develop/develop-images/multistage-build/>

NEW QUESTION # 172

You are troubleshooting a Kubernetes deployment called api, and want to see the events table for this object. Does this command display it?

Solution: `kubectl events deployment api`

- A. No
- B. Yes

Answer: A

NEW QUESTION # 173

Is this a supported user authentication method for Universal Control Plane?

Solution: LDAP

- A. Yes
- B. No

Answer: A

Explanation:

= LDAP is a supported user authentication method for Universal Control Plane (UCP). UCP has its own built-in authentication mechanism and integrates with LDAP and Active Directory. It also supports Role Based Access Control (RBAC) and Docker Content Trust. UCP allows you to configure LDAP as an authentication method and connect it to your LDAP server. You need to provide the LDAP URL, the base DN, the bind DN and password, and the user and group search settings¹². References:

* SAML | Docker Docs

* Universal Control Plane overview | dockerlabs

NEW QUESTION # 174

Is this a Linux kernel namespace that is disabled by default and must be enabled at Docker engine runtime to be used?

Solution: pid

- A. No
- B. Yes

Answer: A

Explanation:

Explanation

= The pid namespace is not a Linux kernel namespace that is disabled by default and must be enabled at Docker engine runtime to be used. The pid namespace is one of the six namespaces that are enabled by default when you run a container with Docker¹. The pid namespace isolates the process ID number space, meaning that processes in different pid namespaces can have the same PID². This allows containers to have their own init process with PID 1 and to limit the visibility and interaction of processes between containers and the host³. To disable the pid namespace, you need to use the `--pid` option with the docker run command and specify the host or another container as the pid mode. References:

* Docker run reference | Docker Docs

* pid namespaces(7) - Linux manual page - man7.org

* Building containers by hand: The PID namespace - Enable Sysadmin

* [Share host and container processes with --pid | Docker Docs]

NEW QUESTION # 175

Will this Linux kernel facility limit a Docker container's access to host resources, such as CPU or memory?

Solution: cgroups

- A. Yes
- B. No

Answer: A

Explanation:

= (Please check the official Docker site for the comprehensive explanation) References: (Some possible references from the web search results are)
