NSE5_FSM-6.3 Reliable Exam Cost & NSE5_FSM-6.3 Exam Fee
NSE5_FSM-6.3 exam is a new turning point in the IT industry. Get this examination certification, you will become the IT industry's professional high-end person. With the spread and progress of information technology, you will see hundreds of online resources which provide Fortinet NSE5_FSM-6.3 Questions and answers. While Braindumpsqa ahead. The reason people choose Braindumpsqa Fortinet NSE5_FSM-6.3 exam training materials is that it can really bring benefits to them, and to help you come true your dreams as soon as possible!

Fortinet NSE5_FSM-6.3 (Fortinet NSE 5 - FortiSIEM 6.3) Exam is a certification exam that is designed for professionals who want to validate their skills and knowledge in using the FortiSIEM platform. FortiSIEM is a security information and event management (SIEM) platform that enables organizations to detect and respond to security threats in real-time. The Fortinet NSE5_FSM-6.3 exam tests the candidate's ability to configure and manage the FortiSIEM platform, as well as their understanding of SIEM concepts and best practices.

Fortinet NSE5_FSM-6.3 Certification Exam is a challenging test that requires extensive preparation. Candidates need to have a thorough understanding of the FortiSIEM solution and should have practical experience in working with the software. Fortinet NSE 5 - FortiSIEM 6.3 certification exam also tests the candidates' ability to troubleshoot and solve problems related to the FortiSIEM solution. Passing the certification exam requires dedication and hard work, but it is a valuable credential that can help professionals advance their careers.

Free PDF Fortinet - Fantastic NSE5_FSM-6.3 Reliable Exam Cost

Fortinet NSE5_FSM-6.3 gives practice material that is as per the legitimate Fortinet NSE5_FSM-6.3 exam. A free demo is other than open to test the parts prior to buying the entire thing for the Fortinet NSE5_FSM-6.3. You can pass Fortinet NSE 5 - FortiSIEM 6.3 on the off chance that you use Fortinet NSE5_FSM-6.3 Dumps material. Not withstanding zeroing in on our material, expecting that you went after in the Fortinet NSE5_FSM-6.3 exam, you can guarantee your cash back as per systems.

Fortinet NSE 5 - FortiSIEM 6.3 Sample Questions (Q20-Q25):

NEW QUESTION # 20
To determine SNMP discovery issues, which is the best command from the backend?

- A. snmptest
- B. phSNMPTest
- C. snmpwalk

Answer: C

NEW QUESTION # 21
FortiSIEM is deployed in disaster recovery mode.
When disaster strikes, which two tasks must you perform manually to achieve a successful disaster recovery operation? (Choose two.)

- A. Promote the secondary workers to the primary rotes using the phSecworker2priworker command.
- B. Promote the secondary supervisor to the primary role using the phSecondary2primary command.
- C. Change the DNS configuration to ensure that users, devices, and collectors log in to the secondary FortiSIEM.
- D. Change the configuration for shared storage NFS configured for EventDB to the secondary FortiSIEM.

Answer: A,C

Explanation:
Disaster Recovery Mode: FortiSIEM's disaster recovery (DR) mode ensures that there is a backup system ready to take over in case the primary system fails.
Manual Tasks for DR Operation: In the event of a disaster, certain tasks must be performed manually to ensure a smooth transition to the secondary system.
Promoting the Secondary Supervisor:
* Use the commandphSecondary2primaryto promote the secondary supervisor to the primary role. This command reconfigures the secondary supervisor to take over as the primary supervisor, ensuring continuity in management and coordination.
Changing DNS Configuration:
* Update the DNS configuration to direct all users, devices, and collectors to the secondary FortiSIEM instance. This ensures that all components in the environment cancommunicate with the newly promoted primary supervisor without manual reconfiguration of individual devices.
References: FortiSIEM 6.3 Administration Guide, Disaster Recovery section, provides detailed steps on promoting the secondary supervisor and updating DNS configurations during a disaster recovery operation.

NEW QUESTION # 22
An administrator is in the process of renewing a FortiSIEM license. Which two commands will provide the system ID? (Choose two.)

- A. phgetUUID
- B. ./phLicenseTool - support
- C. phgetHWID
- D. ./phLicenseTool-show

Answer: A,C

Explanation:
* License Renewal Process: When renewing a FortiSIEM license, it is essential to provide the system ID, which uniquely identifies the FortiSIEM instance.
* Commands to Retrieve System ID:
phgetHWID: This command retrieves the hardware ID of the FortiSIEM appliance.
Usage: Run the command phgetHWID in the CLI to obtain the hardware ID.
phgetUUID: This command retrieves the universally unique identifier (UUID) for the FortiSIEM system.
Usage: Run the command phgetUUID in the CLI to obtain the UUID.
* Verification: Both phgetHWID and phgetUUID are valid commands for retrieving the necessary system IDs required for license renewal.
* Reference: FortiSIEM 6.3 Administration Guide, Licensing section details the commands and procedures for obtaining system identification information necessary for license renewal.

NEW QUESTION # 23
Device discovery information is stored in which database?

- A. SVN DB

- B. CMDB
- C. Event DB
- D. Profile DB

Answer: B

Explanation:
* Device Discovery Information: Information about discovered devices, including their configurations and statuses, is stored in a specific database.
* CMDB: The Configuration Management Database (CMDB) is used to store detailed information about the devices discovered by FortiSIEM.
Function: It maintains comprehensive details about device configurations, relationships, and other metadata essential for managing the IT infrastructure.
* Significance: Storing discovery information in the CMDB ensures that the FortiSIEM system has a centralized repository of device information, facilitating efficient management and monitoring.
* Reference: FortiSIEM 6.3 User Guide, Configuration Management Database (CMDB) section, which details the storage and usage of device discovery information.

NEW QUESTION # 24

An administrator wants to search for events received from Linux and Windows agents.
Which attribute should the administrator use in search filters, to view events received from agents only.

- A. External Event Receive Protocol
- B. External Event Receive Agents
- C. Event Received Proto Agents
- D. External Event Receive Raw Logs

Answer: B

Explanation:
Search Filters in FortiSIEM: When searching for specific events, administrators can use various attributes to filter the results.
Attribute for Agent Events: To view events received specifically from Linux and Windows agents, the attributeExternal Event Receive Agentsshould be used.
* Function: This attribute filters events that are received from agents, distinguishing them from events received through other protocols or sources.
Search Efficiency: Using this attribute helps the administrator focus on events collected by FortiSIEM agents, making the search results more relevant and targeted.
References: FortiSIEM 6.3 User Guide, Event Search and Filters section, which describes the available attributes and their usage for filtering search results.

NEW QUESTION # 25

......

With the Fortinet NSE5_FSM-6.3 PDF questions file, you can prepare for the Fortinet NSE5_FSM-6.3 test on the go since the format is portable and works with all smart devices. The Fortinet NSE5_FSM-6.3 probable exam questions in PDF save you time so that you do not have to go through sleepless nights owing to a tight daily routine.
