AZ-700 PDF Questions & Free AZ-700 Brain Dumps

With both AZ-700 exam practice test software you can understand the Designing and Implementing Microsoft Azure Networking Solutions (AZ-700) exam format and polish your exam time management skills. Having experience with AZ-700 exam dumps environment and structure of exam questions greatly help you to perform well in the final AZ-700 Exam. The desktop practice test software is supported by Windows. Our web-based practice exam is compatible with all browsers and operating systems.

Microsoft AZ-700 Exam is an excellent way for individuals to showcase their expertise in Azure networking solutions. By passing the exam, individuals will receive a certification that validates their knowledge and skills in designing and implementing Azure networking solutions. This will help them to build credibility and establish themselves as experts in the field.

Microsoft Designing and Implementing Microsoft Azure Networking Solutions Sample Questions (Q208-Q213):

NEW QUESTION # 208

Your company, named Contoso, Ltd, has an Azure subscription that contains the resources show in the following table.

You plan to deploy Azure Front Door. The solution must meet the following requirement:

- * Requests to a URL of <https://contoso.azurefd.net/uk> must be routed to App1.uk.
- * Requests to a URL of <https://contoso.azurefd.net/us> must be routed to App1.us.
- * Requests to a URL of <https://contoso.azurefd.net/images> must be routed to the storage account closest to the user.

What is the minimum number of backend pools and routing rules you should create? To answer, the appropriate number to the correct component. Each number may be used once, more than once, or not at all.

You may need to drag the split bar between panes scroll to view content:

Note: Each correct selection is worth one point.

NEW QUESTION # 209

You have the on-premises networks shown in the following table.

You have an Azure subscription that contains an Azure virtual WAN named VWAN1 and a virtual network named VNet1. VWAN1 is connected to the on-premises networks and VNet1 in a full mesh topology. The virtual hub routing preference for VWAN1 is AS Path.

You need to route traffic from VNet1 to 10.61.1.5.

Which path will be used?

- A. the ExpressRoute connection to Branch2
- B. the VPN connection to Branch1
- **C. the VPN connection to Branch2**
- D. the ExpressRoute connection to Branch3

Answer: C

NEW QUESTION # 210

Your on-premises network uses an IP address space of 10.0.0.0/20.

You have an Azure subscription that contains the resources shown in the following table.

The on-premises network is connected to HubVnet by using a Site-to-Site (S2S) VPN.

You deploy an Azure firewall named AZFW1 to HubVNet.

You need to ensure that AZFW1 can inspect all the traffic between the on-premises network and SpokeVNet.

What should you do in RT1? To answer, drag the appropriate destination to the correct route. Each resource may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 211

You have two Azure subscriptions named Sub1 and Sub2 that contain the resources shown in the following table.

VNet1 and VNet2 are NOT connected.

You plan to create an Azure Private Link service named Link1 that will be used to connect VNet1 and VNet2.

You need to ensure that Link1 meets the following requirements:

* Ensures that VM1 can connect only to a web app hosted on VM2

* Prevents VM1 from connecting to the other resources that are connected to VNet2 Which additional resources should you create for each virtual network? To answer, drag the appropriate resources to the correct virtual networks. Each resource may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 212

You fail to establish a Site-to-Site VPN connection between your company's main office and an Azure virtual network. You need to troubleshoot what prevents you from establishing the IPsec tunnel. Which diagnostic log should you review?

- A. TunnelDiagnosticLog
- B. GatewayDiagnosticLog
- C. RouteDiagnosticLog
- D. IKEDiagnosticLog

Answer: D

Explanation:
