

Oracle 1Z0-1067-25 Fragenpool, 1Z0-1067-25 Exam

Übrigens, Sie können die vollständige Version der It-Pruefung 1Z0-1067-25 Prüfungsfragen aus dem Cloud-Speicher herunterladen: <https://drive.google.com/open?id=1G23zGvkT2NprHZnNb8x7NC7uXu4mlmd>

Wenn Sie die Ziertifizierungsprüfung für Oracle 1Z0-1067-25 einmalig bestehen oder Ihre IT-Fähigkeiten erhöhen wollen, ist It-Pruefung Ihre beste Wahl. Nach langjährigen Bemühungen beträgt die Bestehensrate derOracle 1Z0-1067-25 Prüfung bereits 100%. Unsere Schulungsunterlagen zur Oracle 1Z0-1067-25 Prüfung enthalten vollständige und grenzlose Dumps, mit den Sie ganz einfach die 1Z0-1067-25 Prüfung bestehen können.

Oracle 1Z0-1067-25 Prüfungsplan:

Thema	Einzelheiten
Thema 1	Deploying and Managing Resources: This section of the exam covers the deployment and management of core OCI services. It focuses on manual provisioning, using the OCI Command Line Interface (CLI) for managing resources, and utilizing infrastructure as code to create consistent and repeatable deployments.
Thema 2	Implementing Observability: This section of the exam focuses on monitoring and maintaining cloud infrastructure. It covers implementing Metric Query Language (MQL) for analyzing performance data, setting up alarms and notifications for system events, and performing health checks to ensure the stability of cloud services.
Thema 3	Optimizing Cost and Performance: This section of the exam covers strategies for optimizing cost and performance in OCI. It includes implementing cost-saving measures, improving resource efficiency, and setting budgets and compartment quotas to manage cloud expenditures effectively.
Thema 4	Utilizing Configuration Management Tools: This section of the exam measures the skills of the target audience] and focuses on configuring cloud resources efficiently. It covers the use of configuration management tools for automating resource setup and cloud-init for initializing compute instances, ensuring proper configuration from the start.

Thema 5	Implementing Reliability and Business Continuity: This section of the exam focuses on ensuring system reliability and continuity. It covers implementing scalability and elasticity for handling workload demands, automating failover mechanisms for high availability, and applying data retention strategies for long-term storage and recovery.

1Z0-1067-25 Exam & 1Z0-1067-25 Testantworten

Die Oracle 1Z0-1067-25 Zertifizierungsprüfungen werden normalerweise von den IT-Spezialisten gemäß ihren Berufserfahrungen bearbeitet. So ist es auch bei It-Prüfung. Die IT-Experten bieten Ihnen Oracle 1Z0-1067-25 Prüfungsfragen und Antworten (Oracle Cloud Infrastructure 2025 Cloud Ops Professional), mit deren Hilfe Sie die Prüfung erfolgreich bestehen können. Die Genauigkeit von unseren Prüfungsfragen und Antworten beträgt 100%. Mit It-Prüfung Produkten können Sie ganz leicht die Oracle 1Z0-1067-25 Zertifikate bekommen, was Ihnen eine große Beförderung in der IT-Branche ist.

Oracle Cloud Infrastructure 2025 Cloud Ops Professional 1Z0-1067-25 Prüfungsfragen mit Lösungen (Q87-Q92):

87. Frage

You have a web application running on Oracle Cloud Infrastructure (OCI) that lets users log in with a username and password. You notice that an attacker has tried to use SQL comment to alter the database query, remove the password check and log in as a user. You decide to prevent any future attacks. Which of the following OCI services or features would you choose to safeguard your application? (Choose the best answer.)

- A. Vault
- B. Web Application Framework (WAF)
- C. Network Security Group
- D. Data Safe

Antwort: B

88. Frage

Which two statements are TRUE about Object Storage data security and encryption in Oracle Cloud Infrastructure (OCI)? (Choose two.)

- A. All traffic to and from Object Storage service is encrypted using TLS.
- B. OCI Vault Management is used by default to provide data security.
- C. Data needs to be decrypted on the client side before retrieving it.
- D. Client-side encryption is managed by the customer.
- E. A VPN connection to OCI is required to ensure secure data transfer to an object storage bucket.

Antwort: A,D

89. Frage

SIMULATION

Scenario: 4 (Write Identity and Access Management Policies to Secure a Tenancy) Scenario Description: (Hands-On Performance Exam Certification) Your company has signed up for an OCI tenancy to migrate an e-commerce application, a supply chain management (SCM) system, and a customer relationship management (CRM) system. You have been tasked with setting up the requisite identity and access management (IAM) policies for your team to begin developing on OCI.

You start by setting up the following compartment hierarchy:

Tenancy (root)

Common-Infra

Network

Security

Applications
E-Comm
SCM
CRM

You create the following groups:

Network-Admins
Security-Admins
E-Comm-Admins
SCM-Admins
CRM-Admins

Write the IAM policies for the following use cases:

Assumptions:

Assume that all policies will be attached to the root compartment.

Write one policy per given text box.

Keep policies as simple as possible by using verbs instead of permissions (for example, "inspect orm-stacks" instead of "ORM_STACK_INSPECT") and aggregate resource types instead of individual ones (for example, "file-family" instead of "file-systems" and "mount-targets") Task 1 Write a policy statement to enable Network-Admins to create and destroy network-related resources, such as VCNs, subnets, gateways, and so on in the Network compartment.

Task 2

Write policy statements to enable E-Comm-Admins to provision and destroy compute instances in the E-Comm compartment by using networking resources in the Network compartment.[Write one policy per given text box] Task 3 Write a policy statement to enable SCM-Admins to provision, destroy, and back up block volumes in the SCM compartment-but only in Phoenix and London.

Antwort:

Begründung:

See the solution below with Step by Step Explanation

Explanation:

Task 1

Write a policy statement to enable Network-Admins to create and destroy network-related resources, such as VCNs, subnets, gateways, and so on in the Network compartment.

Solution- Policy Statement:

allow Network-Admins to manage virtual-network-family in compartment Common-Infra:Network Task 2 Write policy statements to enable E-Comm-Admins to provision and destroy compute instances in the E-Comm compartment by using networking resources in the Network compartment.[Write one policy per given text box] Solution- Policy Statement:

allow E-Comm-Admins to manage instance-family in compartment Applications:E-Comm allow E-Comm-Admins to use virtual-network-family in compartment Common-Infra:Network Task 3 Write a policy statement to enable SCM-Admins to provision, destroy, and back up block volumes in the SCM compartment-but only in Phoenix and London.

Solution- Policy Statement:

allow SCM-Admins to manage volume-family in compartment Applications:SCM where
any{request.region='phx',request.region='lhr'}

90. Frage

As a solutions architect of the Oracle Cloud Infrastructure (OCI) tenancy, you have been asked to provide members of the CloudOps group the ability to view and retrieve monitoring metrics, but only for all monitoring-enabled compute instances. Which policy statement would you define to grant this access?

- A. Restricting monitoring access only to compute instances metrics is not possible.
- **B. Allow group CloudOps to read metrics in tenancy where tar-get.metrics.namespace='oci_computeagent'**
- C. Allow group CloudOps to read metrics in tenancy where tar-get.metrics.monitoring='oci_computeagent'
- D. Allow group CloudOps to read compute-metrics in tenancy

Antwort: B

91. Frage

You have been asked to set up connectivity between a client on-premises network and Oracle Cloud Infrastructure (OCI). The requirements are:

* Low latency: The applications are financial and require low latency connectivity into OCI. * Consistency: The application is not

* Encryption: The communications link needs to encrypt any data in transit between the on-premises network and OCI Virtual Cloud Network (VCN). The client wants to implement the above with as low a cost as possible, while meeting all of the requirements. What should you suggest? (Choose the best answer.)

- A. Provision a site-to-site IPsec VPN between your on-premises network and your virtual cloud network (VCN) using VPN Connect.
- B. Provision FastConnect with a single public virtual circuit.
- C. Provision FastConnect with a single private virtual circuit, and run an IPsec VPN tunnel over the top of this virtual circuit.
- D. Provision FastConnect with a single private virtual circuit.
- E. Provision FastConnect with a single public virtual circuit, and run an IPsec VPN tunnel over the top of this virtual circuit.
