Pass-Sure Vce ADM-201 Download – Pass ADM-201 First Attempt

Comparing to other training institution, our valid ADM-201 vce dumps are affordable, latest and cost-effective, which can overcome the difficulty of valid ADM-201 Actual Test and ensure you pass the exam. It can not only save your time and money, but also help you clear Salesforce practice exam with high rate.

Salesforce Certified Administrator Sample Questions (Q89-Q94):

NEW QUESTION # 89

When creating a custom report type all objects display in the Primary Object drop-down list, including those you do not have permission to view. For example, even if you don't have permission to view leads, leads are available in the Primary Object drop-down list so that you can build lead report types for other users.

- A. True
- B. False

Answer: A

NEW QUESTION # 90

An administrator at Universal Containers is reviewing current security settings in the company's Salesforce org. What should the administrator do to prevent unauthorized access to Salesforce?

- A. Disable TLS requirements for sessions
- B. Customize organization-wide defaults
- C. **Enable multi-factor authentication**
- D. Enable caching and autocomplete on login page

Answer: C

NEW QUESTION # 91

Cloud Kicks (CK) captures whether an opportunity should be reviewed by someone in product engineering with a checkbox field called Needs Review. CK also has a picklist field on the opportunity for Product Type.

When a sales rep saves an opportunity, they need to select the Product Type or check the Needs Review box.

What should an administrator use to accomplish this?

- A. Workflow rule
- B. **Validation rule**
- C. Required fields
- D. Before Save flow

Answer: B

Explanation:

A validation rule is a feature that allows administrators to define criteria for data entry or import operations and display an error message when those criteria are not met. For example, a validation rule can require users to select a product type or check a needs review box when saving an opportunity by using an OR function that evaluates both fields. If neither field is populated, then the validation rule will prevent users from saving records with an error message. References:https://help.salesforce.com/s/articleView?id=sf.fields_about_validation_rules.htm&type=5

NEW QUESTION # 92

The Administrator has created new users for 10 new employees at Universal Containers.

Why are these users unable to access the Account Object in the Salesforce org?

- A. **Users' Profile requires permission to the Account object.**
- B. Users' Roles are low on the Role Hierarchy.
- C. Organization-Wide Defaults are set to Private.
- D. Users' Profile requires a Sharing Rule Accounts.

Answer: A

NEW QUESTION # 93

What data loss considerations should an administrator keep in mind when changing a custom field type from Text to Picklist?
Choose 2 answers

- A. There will be no data loss with use of a global value set.
- B. Any list view based on the custom field is deleted.
- C. Auto updates will be made to Visualforce references to prevent data loss.
- D. Assignment and escalation rules may be affected.

Answer: B,D

Explanation:

Explanation

Two data loss considerations when changing a custom field type from Text to Picklist are:

Assignment and escalation rules may be affected, because the values in the picklist may not match the values that were previously entered in the text field, and the rules may not trigger as expected.

Any list view based on the custom field is deleted, because the filter criteria for the list view may not be valid for the new field type, and the list view cannot be displayed. There will be no data loss with use of a global value set or auto updates to Visualforce references, because these are not related to changing a custom field type from Text to Picklist. References:
