NSE7 SSE AD-25 Reliable Source - NSE7 SSE AD-25 Cert Exam

Compared to other products in the industry, our NSE7_SSE_AD-25 actual exam has a higher pass rate. If you really want to pass the exam, this must be the one that makes you feel the most suitable and effective. According the data which is provided and tested by our loyal customers, our pass rate of the NSE7 SSE AD-25 Exam Questions is high as 98% to 100%. It is hard to find such

high pass rate in the market. And the quality of the NSE7_SSE_AD-25 training guide won't let you down.

Fortinet NSE 7 - FortiSASE 25 Enterprise Administrator Sample Questions (Q23-Q28):

NEW QUESTION # 23

A company must provide access to a web server through FortiSASE secure private access for contractors. What is the recommended method to provide access?

- A. Configure a TCP access proxy forwarding rule and push it to the contractor FortiClient endpoint.
- B. Update the PAC file with the web server URL and share it with contractors.
- C. Publish the web server URL on a bookmark portal and share it with contractors.
- D. Update the DNS records on the endpoint to access private applications.

Answer: C

Explanation:

The bookmark portal is the recommended method for providing contractors access to private web applications through FortiSASE Secure Private Access, as it offers a user-friendly, secure, and controlled access mechanism without requiring full network connectivity.

NEW QUESTION # 24

Refer to the exhibit. Based on the configuration shown, in which two ways will FortiSASE process sessions that require FortiSandbox inspection? (Choose two.)

The screenshot shows the FortiSASE configuration interface for an endpoint profile. The 'Sandbox' tab is active. Key settings include:

- Sandbox Mode:** FortiSASE (selected), Disabled, Standalone FortiSandbox.
- Region:** Global
- Time Offset:** UTC+00:00
- Wait for FortiSandbox Results before Allowing File Access:** Enabled (checkbox).
- Timeout in seconds:** 300
- File Submission Options:**
 - All Files Executed from Removable Media: Enabled
 - All Files Executed from Mapped Network Drives: Enabled
 - All Web Downloads: Enabled
 - All Email Downloads: Enabled
- Remediation Actions:**
 - Action: Quarantine (selected), Alert & Notify.
- Sandbox Detection Verdict Level:** Clean, Low, Medium (selected), High, Malicious.

- A. All files will be sent to a on-premises FortiSandbox for inspection.
- B. All files executed on a USB drive will be sent to FortiSandbox for analysis.
- C. Only endpoints assigned a profile for sandbox detection will be processed by the sandbox feature.
- D. FortiClient quarantines only infected files that FortiSandbox detects as medium level.

Answer: B,C

Explanation:

The sandbox feature applies only to endpoints assigned this profile, and the configuration explicitly enables the submission of all files executed from removable media (like USB drives) to FortiSandbox for analysis.

NEW QUESTION # 25

An administrator must restrict endpoints from certain countries from connecting to FortiSASE. Which configuration can achieve this?

- A. Configure source IP anchoring to restrict access from the specified countries.
- **B. Configure geofencing to restrict access from the required countries.**
- C. Configure a network lockdown policy on the endpoint profiles.
- D. Configure a geography address object as the source for a deny policy.

Answer: B

Explanation:

Geofencing allows the administrator to restrict or allow access to FortiSASE services based on the geographic location of the endpoints, effectively blocking connections from specified countries.

NEW QUESTION # 26

How can digital experience monitoring (DEM) on an endpoint assist in diagnosing connectivity and network issues?

- **A. FortiSASE runs a trace job on the endpoint using the DEM agent to the Software-as-a-Service (SaaS) application.**
- B. FortiSASE runs a ping from the endpoint to calculate the TTL to the SaaS application.
- C. FortiSASE runs a netstat from the endpoint to the SaaS application to see if ports are open.
- D. FortiSASE runs SNMP traps to the endpoint using the DEM agent to verify the SaaS application health status.

Answer: A

Explanation:

The Digital Experience Monitoring (DEM) agent on the endpoint performs a trace route to the SaaS application to measure latency, packet loss, and hop-by-hop performance. This helps diagnose where in the path connectivity or performance issues are occurring.

NEW QUESTION # 27

Which FortiSASE feature ensures least-privileged user access to corporate applications that are protected by an on-premises FortiGate device?

- A. remote browser isolation (RBI)
- **B. zero trust network access (ZTNA)**
- C. cloud access security broker (CASB)
- D. secure web gateway (SWG)

Answer: B

Explanation:

ZTNA enforces least-privileged access by verifying user identity and device posture before granting access to specific corporate applications, even when protected by an on-premises FortiGate.

NEW QUESTION # 28

.....

If you want to sail through the difficult Fortinet NSE7_SSE_AD-25 Exam, it would never do to give up using exam-related materials when you prepare for your exam. If you would like to find the best certification training dumps that suit you, BraindumpStudy is the best place to go. BraindumpStudy is a well known and has many excellent exam dumps that relate to IT certification test. Moreover all exam dumps give free demo download. If you want to know whether BraindumpStudy practice test dumps suit you, you can

download free demo to experience it in advance.
