Peoplecert ITIL 4 Leader: Digital & IT Strategy Exam Sample Questions (Q36-Q41):

NEW QUESTION # 36

A service provider is developing an operating model to support a new social media service that enables their business strategy. They have included the following in the operating model:

- * a definition of how suppliers will be involved in the delivery of the service
- * a description of the main performance measures required

Which additional element **MUST** be included to ensure that the essential themes of the operating model are covered?

- **A. Descriptions of the series of steps for the work that is required to create and support the service**
- B. An inventory of the main technology components that will be located at the head office data centre
- C. A list of vendors who will provide the components that form the social media service
- D. Definitions of the service management toolsets needed to support the service

Answer: A

Explanation:

Descriptions of the series of steps for the work that is required to create and support the service are part of the essential themes of the operating model. They define how value is created and delivered through value streams and processes. They also help align the work with the strategy, vision, and goals of the organization and its stakeholders. NEW QUESTION # 37

Which type of risk is **MOST LIKELY** to be identified by modeling and test reviews?

- A. Disruption risk
- **B. Cyber security risk**
- C. Engagement risk
- D. Innovation risk

Answer: B

Explanation:

Cyber security risk is the most likely type of risk to be identified by modeling and test reviews. Modeling and test reviews are methods of assessing risks by simulating or testing different scenarios, outcomes, or impacts. Cyber security risk is the risk of unauthorized access, use, disclosure, modification, or destruction of data or systems. Modeling and test reviews can help identify cyber security risks by exposing vulnerabilities, weaknesses, or flaws in the data or systems.
