## Latest 100% Free Plat-Dev-210 – 100% Free Exam Torrent | Plat-Dev-210 Updated Demo

Though there are three versions of the Plat-Dev-210 practice braindumps: the PDF, Software and APP online, i love the PDF version the most for its printable advantage which is unique and special. After printing, you not only can bring the Plat-Dev-210 study materials with you wherever you go, but also can make notes on the paper at your liberty, which may help you to understand the contents of our Plat-Dev-210 Learning Materials. Do not wait and hesitate any longer, your time is precious!

### Salesforce Plat-Dev-210 Exam Syllabus Topics:

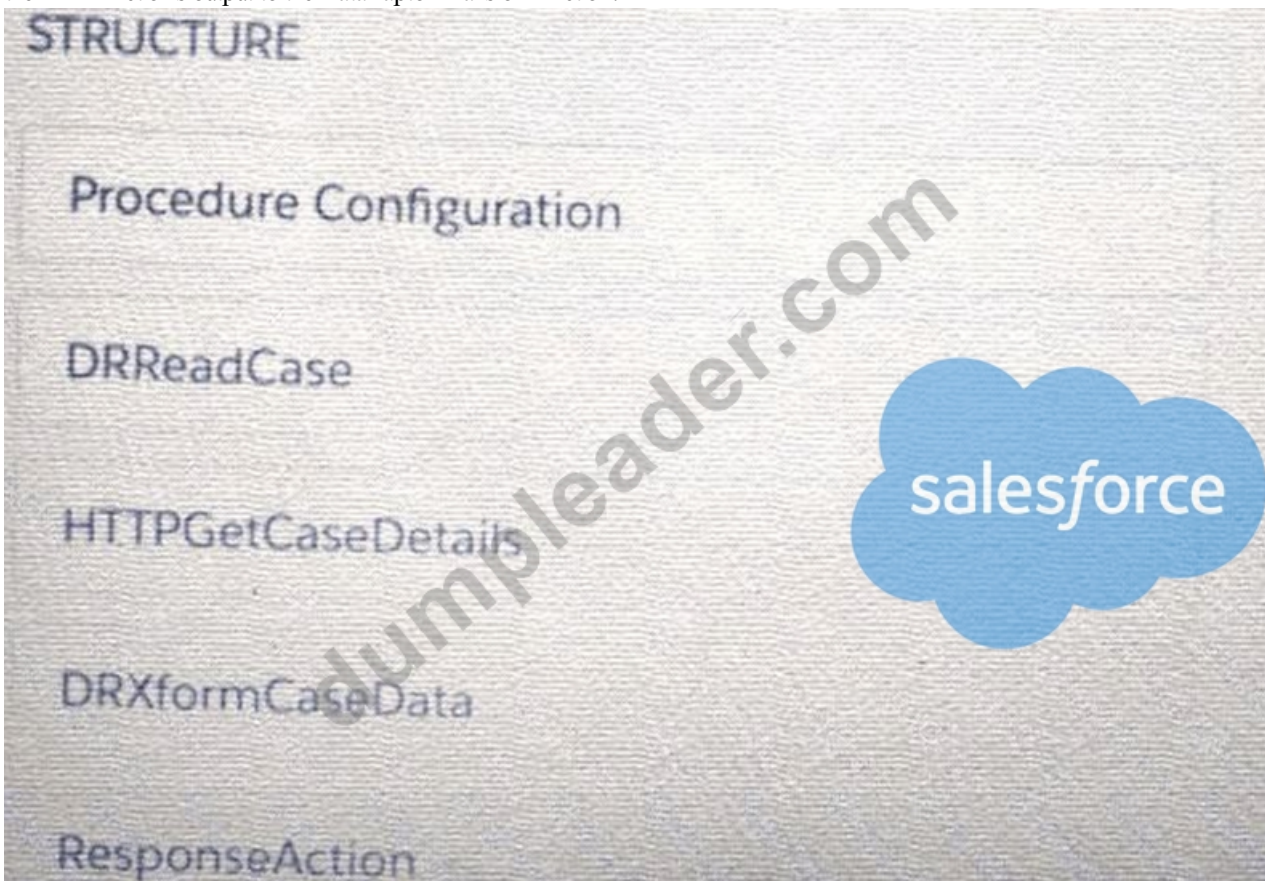

Topic	Details

Topic 1	<ul style="list-style-type: none"> <li>• <b>Expression Sets &amp; Decision Matrices:</b> This section measures the skills of a Logic Designer and covers the configuration and application of Expression Sets and Decision Matrices within Omnistudio tools. It requires demonstrating an understanding of how Expression Sets evaluate conditions and how Decision Matrices use rule-based logic to determine outcomes. This knowledge is essential for automating decisions and streamlining complex business processes.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• <b>Integration Procedures:</b> This section measures the skills of an Integration Architect and involves designing and configuring Integration Procedures to automate processes and integrate systems. It requires comparing and contrasting different elements and configurations within Integration Procedures to meet specific use cases. Candidates are also tested on selecting the correct elements and properties to satisfy functional requirements, ensuring seamless data flow and process automation.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Omnistudio Data Mappers:</b> This part of the exam measures the skills of a Data Engineer and focuses on the use of Omnistudio Data Mappers for extracting, transforming, and loading data. It includes identifying the appropriate Data Mapper for a given requirement, as well as determining the necessary Extract, Load, Transform, and Turbo Extract functionalities based on specific use cases. This section ensures the candidate can effectively map and manipulate data to support business processes.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>OmniScripts:</b> This portion of the exam measures the skills of a Business Analyst and focuses on the use of OmniScripts to create dynamic, guided user experiences. It includes comparing and contrasting various OmniScript elements and their configurations to fulfill given use cases. The section also examines the candidate's understanding of the JSON structure that supports OmniScripts, as well as the ability to select appropriate elements and properties to address functional requirements effectively.</li> </ul>

## Salesforce Certified Omnistudio Developer Sample Questions (Q100-Q105):

### NEW QUESTION # 100

Refer to the exhibit below. What is the merge code needed for this Integration Procedure structure to pass a CaseData node from the HTTP Action's output to the DataRaptor Transform Action?

- A. {{CaseData}}
- B. %DRXformCaseData: CaseData%
- C. %HTTPGetDetails:CaseData%
- D. {{ HTTPGetCaseDetails:CaseData }}

**Answer: D**

Explanation:

The merge code syntax for accessing a node from an Integration Procedure output is {{ProcedureName: NodeName}}. In this case, the ProcedureName is HTTPGetCaseDetails and the NodeName is CaseData. The % sign is used for single-value merge codes, not node merge codes. The \$ sign is used for variables, not merge codes.

### NEW QUESTION # 101

Which two in an integration Procedure or DataRaptor can execute a function like CONCAT or DATEDIFF?  
Choose 2 answers

- A. In a Set Values Action in a Value field.
- B. In a Remote Action in an Additional Output value field.
- C. In a DataRaptor Action in an Input Parameters value field.
- D. In a DataRaptor in an Output Tab Output JSON Path.

**Answer: A,B**

Explanation:

A Set Values Action in a Value field and a Remote Action in an Additional Output value field can execute a function like CONCAT or DATEDIFF by using the syntax {{function(parameters)}}. For example, {{CONCAT('Hello', 'World')}} or {{DATEDIFF('2021-01-01', '2021-01-31')}}.

### NEW QUESTION # 102

The OmniScript must retrieve device details stored in the Asset object and then call an external system to send troubleshooting commands via REST API to the device.

Which two OmniScript element should the developer use to configure this functionality?

- A. SOQL Action
- B. HTTP Action
- C. Navigation Action
- D. DataRaptor Extract Action
- E. REST API Action

**Answer: B,D**

Explanation:

According to the OmniScript Action Elements page, a DataRaptor Extract Action can be used to "get data from one or more Salesforce records" and an HTTP Action can be used to "get, save, or delete data through a web application programming interface (API)".

### NEW QUESTION # 103

A developer has an existing DataRaptorLoad that insert Contact records with inputs as LastName and firstName. The DataRaptor works as expected when previewed.

The developer creates an integration Procedure to test the DataRaptor and is using a SetValue element in the Integration Procedure to set the first name and last name for the contact record. The DataRaptor and Integration Procedure are set up as shown in the exhibit below.

When the developer executes the Integration procedure in preview, the following error message displays:

Required fields are missing: [last Name]",

How should the developer address this issue?

- A. The Set values Action Keys should include the DataRaptor Post Action element name path, e.g LoadContactDetails, lastname
- B. The DataRaptor Post Action in the integration procedure should have been executed before the Set Values Action
- C. The valid field names should be added in the Domain object field in theDataRaptor
- D. SetValueContactDetails should have been added to Additional input of DataRaptor Post Action in Integration Procedure

**Answer: D**

Explanation:

According to the Integration Procedure Actions page, "To pass data from a Set Values action to a DataRaptor action, add the Set Values action name to the Additional Input field of the DataRaptor action."

#### NEW QUESTION # 104

Refer to the exhibit below. In this Integration Procedure structure, what Send JSON Path would you use to send the output of the ActionZ element to a Response Action?

- A. BlockX:BlockY:ActionAZ
- B. BlockX.BlockYActionZ
- C. ActionZ:BlockY:BlockX
- D. ActionZ:BlockY:BlockX

**Answer: B**

Explanation:

The Send JSON Path syntax for accessing an element from an Integration Procedure structure is BlockName.

ElementName. In this case, the BlockName is BlockX and the ElementName is ActionZ. The colon (:) is used to separate the input and output parameters, not the block and element names. The order of the block and element names should follow the hierarchy of the structure, from top to bottom.

## NEW QUESTION # 105

.....

If you attend Salesforce certification Plat-Dev-210 Exams, your choosing Dupleader is to choose success! I wish you good luck.
